

WD SMARTWARETM PRO

Automatic Backup Software

Backup software
you'll really use.

Continuous or scheduled backup

DropboxTM compatibility for cloud backup

Supports backup for 3rd party external drives

Your files are not just files, they are your family photos, your financial documents, your music - your life. You know you should back it up, but many of you don't. Because we understand the importance of your data we developed WD SmartWare Pro automatic backup software. It offers multiple backup options to make it easy to protect your digital life.

WD SMARTWARE PRO

Automatic Backup Software

Product Features

Easy setup

After just a few simple steps, you're up and running. And once you set it up, you can forget it because the software takes care of the rest.

Back up on your schedule

WD SmartWare Pro allows you to determine your own regular backup schedule - hourly, daily, weekly, monthly. With scheduled backup, you choose the schedule that fits your needs.

Back up to the cloud

WD SmartWare Pro gives you the option of backing up your files to the cloud using your Dropbox account. And for double safe protection, you can back up your Dropbox account to your drive with WD SmartWare Pro.

Dropbox account required for cloud backup. Cloud services may be changed, terminated or interrupted without notice.

Back up to any external USB drive

Use WD SmartWare Pro to back up your computer to any external hard drive whether that drive is from WD or from a third party.

Back up continuously

When you choose automatic, continuous mode, WD SmartWare Pro runs quietly in the background, so when you change a file and save it, create new files or add pictures, videos or songs, WD SmartWare Pro will instantly back them up.

It's easy to bring back lost files.

If you ever accidentally delete an important file or need to get an earlier version of a file, WD SmartWare Pro helps you retrieve the file in seconds with the easy-to-use retrieve interface.

File and folder backup

Use the file and folder backup option to choose the files and folders that you want to protect with your chosen backup mode.

Category backup

Use the category backup option to conveniently back up all the files within a specific category - photos, videos, word documents, etc.

Visual interface shows backup progress

WD SmartWare Pro features a visual interface with gauges that display how much data you have to be backed up in each category. And as your backup progresses the gauges change color, showing you the backup as it happens.

Available only on the WD Store.
