An active, customer-purchased, broadband Internet account is required for connecting this router and other connected devices. Some devices may require additional wireless adapters or an Ethernet cable to connect to this router.

*FasTrack and FasTrack Plus streaming service performance may vary based on broadband Internet service, wireless performance factors and stream application provider and technology.

As used for storage capacity one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for transfer rate or interface, Megabits per second (Mbps) = 1 million bits per second, Gigabits per second (Gbps) = 1 billion bits per second.

** Maximum wireless performance rate derived from IEEE standard 802.11 specifications. Actual data throughput and wireless coverage may vary based on wireless network capacity, data throughput rate, range and coverage. Performance depends on factors including distance from the access point, volume of network traffic, building materials and construction, operating system used, configuration of wireless products used, interference and other adverse conditions. As used for transfer rate or interface, Megabits per second (Mbps) = 1 million bits per second, Gigabits per second (Gbps) = 1 billion bits per second.

- Fast Wi-Fi speed and enhanced range
- FasTrack technology accelerates HD entertainment
- 4 Fast Ethernet ports and 1 USB port instantly expand your network
- Easy CD or browser set up

Exclusive FasTrack™ technology.

WD's My Net HD Dual-Band Routers with exclusive FasTrack* technology, automatically prioritizes popular internet services for brilliant HD streaming. My Net Dual-Band Routers deliver the ultimate entertainment experience to all your Wi-Fi™ devices anywhere in your home.

FasTrack technology analyzes your incoming traffic and automatically detects and prioritizes the services that need more bandwidth. FasTrack organizes your media traffic as fast as it comes in to your network, delivering smoother streaming and more efficient load times. This helps to avoid hesitations and pauses, providing proper bandwidth to all the Wi-Fi devices on the network.

Accelerate what entertains you.

FasTrack technology delivers smooth accelerated HD streaming for the best possible entertainment experience. This breakthrough technology does more than just preserve bandwidth for your entertainment, it also instantly prioritizes incoming movies, video and music network traffic for the smoothest HD streaming possible. Now your movies won't be interrupted even while other people on the network are video chatting or playing online games.

- My Net N900 and My Net N900 Central feature **FasTrack Plus** technology which instantly manages your entertainment traffic in real time for brilliant HD streaming. There's no need for customization, because FasTrack Plus prioritizes it all for you.
- My Net N600 and My Net N750 feature **FasTrack** technology that automatically detects popular services including from Netflix®, Hulu Plus™, CinemaNow®, YouTube™ and Pandora®. It also allows you to prioritize up to 16 additional Internet services to customize your entertainment choices.

Simple setup.

WD's streamlined CD or browser setup is designed to get you up and running in just a few quick steps. Use the easy setup CD or set it up wirelessly from your iPad® or other connected device. The intuitive user interface is designed for touch screens, so setup from your smartphone or tablet is a snap.

Push button setup (WPS).

Easily connect new devices to your wireless network with the push of a button. Within seconds you can expand your network to include PCs, smart phones, tablets, and other UPnP™ enabled wireless devices.

↑ Setup button

Antenna amplifiers.

Built into the sleek design of the routers are multiple antenna amplifiers that help boost the router's range so that you get excellent coverage and speed in almost any size home.

Network diagnostic tool.

With WD's network diagnostic tool, you can easily see the number and type of devices on your network. The tool continually analyzes common network connectivity issues and helps correct them when they occur so you are back up and running quickly.
