About Your WD Drive

Welcome to your My Book® external hard drive, an elegant, high-capacity storage solution for all the chapters of your digital life. Our latest edition features visual, easy-to-use, automatic, continuous backup software and drive lock security protection.

WD’s best-selling My Book USB external hard drive features WD SmartWare™ software that backs up your data automatically and continuously, shows your backup as it happens, and brings back lost files effortlessly.

This chapter includes the following topics:
- Features
- Kit Contents
- Optional Accessories
- Operating System Compatibility
- Disk Drive Format
- Physical Description
- Registering the Drive
- Handling Precautions

Features

Major features of the My Book drive include:

Dual USB 3.0 and USB 2.0 interface—A single drive with universal compatibility today and next-generation speed for tomorrow. Use it with USB 2.0 now and step up to USB 3.0 speed when you are ready.

Up to 3x faster transfer rates—When connected to a SuperSpeed USB 3.0 port, this drive lets you access and save files up to 3 times faster than USB 2.0. Transfer a full-length HD movie in just 3 minutes instead of 13 minutes.*

*Performance may vary based on user’s hardware and system configuration.

Massive capacity—With up to 4 TB capacity, there is plenty of room to store and protect your precious memories and important files.

WD SmartWare software—You are in control of your backup. Install all the features, select just the components you need, or if you prefer, choose not to use the software at all.

Automatic, continuous backup—Works quietly in the background to protect your data using minimal PC resources. Whenever you add or change a file it is instantly backed up.

Password protection for privacy—Gain peace of mind knowing that your data is protected from unauthorized access with password protection and encryption.

WD quality inside and out—For over 20 years, millions of people worldwide have trusted their data to WD hard drives. We are successful because we understand the importance of your data and our first concern is keeping that data safe.
**Kit Contents**

As shown in Figure 1, your My Book disk drive kit includes the following:

- My Book external hard drive
- WD SmartWare software (included on the drive)
- USB cable
- AC adapter
- Quick Install Guide

**Operating System Compatibility**

Your My Book drive and the WD SmartWare software are compatible with the following operating systems:

**Windows®**
- Windows XP
- Windows Vista®
- Windows 7
- Windows 8

**Mac OS X**
- Leopard
- Snow Leopard
- Lion
- Mountain Lion
Compatibility can vary, depending on hardware configuration and operating system.

For highest performance and reliability, always install the latest updates and service pack (SP). For Windows computers, go to the Start menu and select Windows Update. For Mac computers, go to the Apple menu and select Software Update.

**Disk Drive Format**

Your My Book drive is preformatted as a single NTFS partition for compatibility with all updated Windows operating systems. If you want to use the drive with a Mac computer, see “Reformatting the Drive” on page 54 and “Troubleshooting” on page 69.

**Physical Description**

As shown in Figure 2, the My Book drive has:

- A power/activity indicator on the front
- The power connector and button, interface port, and a security slot on the back

---

**Power/Activity LED**

The power/activity LED shows the drive’s power state and activity as follows:

<table>
<thead>
<tr>

Figure 2. My Book Drive
**Power Button**

Use the power button to safely power down the drive and avoid data loss or damage to the drive. The power button only works when the WD SmartWare software is installed on your computer.

*Note:* If you disconnect the drive after using the power button to turn it off, when you reconnect it to your running computer, the drive automatically powers on. If you leave the drive connected to your computer after using the power button to turn it off, you must press the power button again to turn it back on.

**USB 3.0 Interface**

Super-Speed USB 3.0 supports data transfer rates up to 5 Gb/s. USB 3.0 is backward-compatible with USB 2.0. Connection to a USB 2.0 port transfers data at the port speed—up to 480 Mb/s.

**Kensington® Security Slot**

For drive security, the Kensington security slot accepts a standard Kensington security cable (sold separately). For more information about the Kensington security slot and available products, visit [www.kensington.com](http://www.kensington.com).

**Registering the Drive**

Always register your My Book drive to get the latest updates and special offers. You can easily register your drive using the WD SmartWare software, as described in “Registering the Drive” on page 44. Another way is to register online at [http://register.wdc.com](http://register.wdc.com).

**Handling Precautions**

WD products are precision instruments and must be handled with care during unpacking and installation. Rough handling, shock, or vibration can damage drives. Always observe the following precautions when unpacking and installing your external storage product:

- Do not drop or jolt the drive.
- Do not move the drive during activity.
- Do not use this product as a portable drive.
- To allow proper ventilation, do not block any of the drive enclosure’s air slots.
Connecting the Drive and Getting Started

This chapter provides instructions for connecting the drive to your computer and installing WD SmartWare software. It includes the following topics:

- Connecting the Drive
- Getting Started with the WD SmartWare Software
- Getting Started Without the WD SmartWare Software

## Connecting the Drive

1. Depending on your region, if required, change the power adapter as follows:

![Power Adapter Options](image1)

2. Turn on your computer.

3. Connect the My Book drive as shown in Figure 3.

![Figure 3: Connecting the My Book Drive](image2)
4. If a Found New Hardware screen appears, click **Cancel** to close it. The WD SmartWare software that is on the drive installs the proper driver for your My Book drive.

5. Verify that the My Book drive appears under My Computer in Windows Explorer.

6. Several different screens might also appear, depending on your computer’s operating system:

<table>
<thead>
<tr>
<th>IF your operating system is . . .</th>
<th>THEN . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows XP</td>
<td>Proceed to step 7.</td>
</tr>
<tr>
<td>Windows Vista, Windows 7, or Windows 8</td>
<td>Skip to step 9 on page 7.</td>
</tr>
</tbody>
</table>

7. For Windows XP, one or two screens might appear, depending on whether the AutoRun (AutoPlay) function is enabled or disabled:

<table>
<thead>
<tr>
<th>IF AutoRun (AutoPlay) is . . . on your computer,</th>
<th>THEN . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enabled</td>
<td>Proceed to step a.</td>
</tr>
<tr>
<td>Disabled</td>
<td>Skip to step b.</td>
</tr>
</tbody>
</table>

a. With AutoRun (AutoPlay) enabled, the Welcome to WD SmartWare screen displays (see Figure 4).

b. With AutoRun (AutoPlay) disabled, click to open the My Book drive listing in Windows Explorer and double-click the WD SmartWare application file to display the Welcome to WD SmartWare screen (see Figure 4).

8. Continue to “Getting Started with the WD SmartWare Software” in the next section. If you do not want to install the WD SmartWare software, go to “Getting Started Without the WD SmartWare Software” on page 11 instead.

---

**Note:** If a Flash Player is installed on your computer, the screen is animated.

Figure 4. Welcome to WD SmartWare Screen
9. For Windows Vista, Windows 7, or Windows 8, two or three screens might appear, depending on whether the AutoRun (AutoPlay) function is enabled or disabled:

<table>
<thead>
<tr>

<th>THEN . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enabled</td>
<td>Proceed to step a.</td>
</tr>
<tr>
<td>Disabled</td>
<td>Skip to step b.</td>
</tr>
</tbody>
</table>

a. With AutoRun (AutoPlay) enabled, click **Open folder to view files** on the AutoPlay screen and double-click the WD SmartWare application file to display the Welcome to WD SmartWare screen (see Figure 4 on page 6).

b. With AutoRun (AutoPlay) disabled, open **Computer**, click to open the My Book drive listing in Windows Explorer and double-click the WD SmartWare application file to display the Welcome to WD SmartWare screen (see Figure 4 on page 6).

10. Continue to “Getting Started with the WD SmartWare Software” in the next section. If you do not want to install the WD SmartWare software, go to “Getting Started Without the WD SmartWare Software” on page 11 instead.

### Getting Started with the WD SmartWare Software

Steps 1 through 4 of the installation procedure install the version of the WD SmartWare software that you select. Depending on your selection:

<table>
<thead>
<tr>
<th>IF you install the . . .</th>
<th>AND want to . . .</th>
<th>THEN complete steps . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full version of the software,</td>
<td>• Run your first backup 5, 6, and 7.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Password protect or register your drive,</td>

</tr>
<tr>
<td></td>
<td>• Skip the backup 5, 6, and 8.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Password protect or register your drive,</td>
<td></td>
</tr>
<tr>
<td>Drive management version of the software,</td>
<td>• Password protect or register your drive,</td>
<td>9.</td>
</tr>
</tbody>
</table>

1. The **What would you like to do?** prompt on the Welcome to WD SmartWare screen provides three options for getting started with the WD SmartWare software:

<table>
<thead>
<tr>
<th>IF you want to install . . .</th>
<th>THEN click the . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>The full version of the WD SmartWare software, with continuous automatic backup, retrieve, drive lock password protection, and drive management features and:</td>
<td>Install WD SmartWare button.</td>
</tr>

<td></td>
</tr>
<tr>
<td>Only the WD SmartWare software drive lock password protection and drive management features and password protect or register your drive,</td>
<td>Install Drive Settings button.</td>
</tr>
<tr>
<td>The full version of the WD SmartWare software and retrieve files that you have already backed up to your My Book drive on another computer,</td>
<td>Retrieve a backup link.</td>
</tr>
</tbody>
</table>
2. Read the license agreement and click Accept to continue.
3. Wait for the software installation to complete. This could take several minutes.
4. After the software installation completes:
   
   **IF you clicked . . . at step 1, THEN the WD SmartWare software displays . . .**

<table>
<thead>
<tr>
<th>Install WD SmartWare</th>
<th>The initial Backup Plan Selection screen for selecting the type of backup that you want to perform. See Figure 5 and proceed to step 5.</th>

<td>The WD SmartWare Home screen for accessing all WD SmartWare functions. See Figure 8 on page 15 and “Retrieving Backed Up Files” on page 37. This completes the getting started procedure after selecting Retrieve a backup.</td>
</tr>
</tbody>
</table>

5. On the initial Backup Plan Selection screen:
   a. Select the option for the type of backup that you want to run:
      • **Category Backup**—Finds and backs up all of the files of the selected categories on your computer.
      • **File Backup**—Backs up files or folders that you select from a folder view of your computer’s internal hard drive.
   b. Click **Launch WD SmartWare** to display the initial Backup screen. See Figure 6 on page 9 and proceed to step 6 on page 10.

![Figure 5. Initial Backup Plan Selection Screen](image)
Note: The initial Backup screens only appear one time—the first time you install the WD SmartWare software on your computer. After that, launching the software displays the Home screen so you can choose what you want to do.
6. On the initial Backup screen you can either:
   - Run your first backup—See “Backing Up Your Computer Files” on page 32 before clicking Start Backup and then proceed to step 7.
   - Skip the backup by clicking Skip Backup to display the WD SmartWare initial Drive Settings screen. See Figure 7 and skip to step 8.

7. After running your first backup:
   a. Click Continue to Settings to display the WD SmartWare initial Drive Settings screen (Figure 7).
   b. See:
      - “Password Protecting the Drive” on page 27
      - “Registering the Drive” on page 44
   c. After password protecting or registering your drive, click Continue to display the WD SmartWare Home screen (Figure 8 on page 15).

This completes the getting started procedure after selecting Install WD SmartWare and running your first backup.

8. On the initial Drive Settings screen:
   a. See:
      - “Password Protecting the Drive” on page 27
      - “Registering the Drive” on page 44
b. After password protecting or registering your drive, click **Continue** to close the initial Drive Settings screen and display the WD SmartWare Home screen (Figure 8 on page 15).

This completes the getting started procedure after selecting **Install WD SmartWare** and skipping the backup.

9. On the initial Drive Settings screen:
   a. See:
      - “Password Protecting the Drive” on page 27
      - “Registering the Drive” on page 44
   b. After password protecting or registering your drive, click **Finish** to close the initial Drive Settings screen.

This completes the getting started procedure after selecting **Install Drive Settings**. In this case:

- Opening the WD SmartWare software displays the drive management Home screen (see Figure 8 on page 15) with the Settings tab for performing all drive management functions (see “Managing and Customizing the Drive” on page 41).
- Clicking the **Settings** tab displays the drive management Drive Settings screen with a **Preferences** button that you can use to enable the WD SmartWare backup and retrieve functions (see “Enabling the Backup and Retrieve Functions” on page 49).

**Getting Started Without the WD SmartWare Software**

If you do not install the WD SmartWare software, you can still use your My Book as an external hard drive. In this case, however, you will not be able to:

- Protect your data with automatic continuous backups (see “Backing Up Your Computer Files” on page 32)
- Retrieve earlier versions of lost, or damaged files (see “Retrieving Backed Up Files” on page 37)
- Secure you drive and all of the files on it with a password (see “Securing the Drive” on page 27)
- Customize your software and drive settings for the best possible performance (see “Managing and Customizing the Software” on page 51)
- Check the operational condition of your drive with built-in diagnostic features (see “Checking Drive Health” on page 45)
To forego these performance features and get started without installing the WD SmartWare software:

**1.** Click **Do Not Install** at the **What would you like to do?** prompt to display the **Continue without installing WD SmartWare?** prompt:

![Continued without Install](image)

**2.** Click:

- **Continue without Install** if you still do not want to install the WD SmartWare software.
- **Go Back** if you have changed your mind and do want to install the WD SmartWare software. In this case, go to “Getting Started with the WD SmartWare Software” on page 7.
WD SmartWare Software Functional Overview

This chapter provides a brief functional overview of the WD SmartWare software. It includes the following topics:

Home Tab Displays
Backup Tab Displays
Retrieve Tab Displays
Settings Tab Displays
Help Tab Display

All operational features and capabilities of the WD SmartWare software are presented in five tab-selected screen displays where:

<table>

## The . . . tab display | Provides . . .
--- | ---
Retrieve | Three full-screen dialogs for selecting the:
- Backup volume that you want to retrieve files from
- Destination on your computer where you want to copy the retrieved files
- Files that you want to retrieve

See “Retrieve Tab Displays” on page 21.

Settings | One of two dialogs, depending on whether you install the full version or the drive management version of the WD SmartWare software.

The full version dialog provides buttons for displaying Software Settings and Drive Settings screens.

The drive management version dialog displays only the Drive Settings screen.

See “Settings Tab Displays” on page 24.

Help | Instant access to:
- Detailed information about backing up and retrieving files and making your software setup selections
- WD Customer Support and software update services

See “Help Tab Display” on page 25.

In each display, the WD SmartWare software changes the names and graphic images to match the hardware configuration of the connected devices.

### Note:
In addition to the detailed Help tab information, each WD SmartWare display provides easy access to abbreviated online help to quickly guide you through your backup, retrieve, and settings tasks. Whenever you are uncertain about what to do, just click the info/online help icon in the upper-right corner of the display:

To close the info/online help screen after reading the online help, click the X icon in the upper-right corner of the help screen.

### Home Tab Displays

The WD SmartWare software provides two different Home tab displays, depending on which version of the software you install:

- **WD SmartWare Home tab display**
  Use the WD SmartWare Home tab display to view hard drive content gauges and select:
  - The internal hard drive or hard drive partition that you want to back up files from or copy retrieved files to when your computer has more than one
  - The My Book drive or other supported device that you want to back up files to, retrieve files from, or customize when you have more than one connected to your computer
• **Drive management Home tab display**
  
  Use the drive management Home tab display to view the content gauge for each connected My Book drive or other supported device and select the one you want to customize.

  See Figure 8 and Table 1 on page 16 for a brief functional description of the Home tab displays.

Backup Tab Displays

The WD SmartWare software provides one of two different Backup tab displays, depending on how you want to select files to back up:

- By category—As shown in the content gauges
- By file—As shown in the folder structure of your computer’s internal hard drive

Use the WD SmartWare Backup tab displays to select the files or categories of files that you want to back up and control the backup operation.

See Figure 9 and Table 2 on page 19 for a brief functional description of the Backup tab displays.

In category mode, the initial/default configuration of the WD SmartWare software is to back up all of your files. In this configuration, the advanced backup area is blank.

Clicking **Advanced View** displays a backup files selection box that you can use to specify the categories of files that you want to back up:

Clicking **Apply Changes** in the backup files selection box updates the content gauge for your computer and your My Book drive.

Clicking **Switch to File Backup** displays a folder structure view that you can use to specify individual files or folders that you want to back up:

**Note:** The folder structure displaces the content gauge for your computer on the Backup tab display.

Securing the Drive

This chapter includes the following topics:

- Password Protecting the Drive
- Unlocking the Drive
- Changing Your Password
- Turning Off the Drive Lock Feature

Password Protecting the Drive

You should password protect your drive if you are worried that someone else will gain access to your drive and you do not want them to see your files on the drive.

CAUTION! The WD SmartWare software uses your password to electronically lock and unlock your drive. If you forget your password, you will not be able to access the data that is on your drive or write new data to it. You will have to erase the drive before you can use it again.

1. Click the Settings tab to display either the WD SmartWare Settings screen or the drive management Drive Settings screen (Figure 11 on page 24).

2. If you opened the WD SmartWare Settings screen, click Set Up Drive to display the WD SmartWare Drive Settings screen.

3. On the Drive Settings screen, click Security to display the Set Security dialog:

4. On the Set Security dialog:
   a. Type your password in the Choose a password box, using up to 25 characters.
   b. Retype your password in the Verify password box.
   c. Type a hint to help remember your password in the Password hint box.
   d. Select the Remember my password on this computer check box if you want the WD SmartWare software to remember your password.

   Note: This function remembers the password for your currently logged on user name. If you log on as a different user, you will have to type your password and repeat this selection.
e. Read the warning about the possibility of data loss if you forget your password.
f. Click the I understand check box to signify that you accept the risk.
g. Click Save Security Settings.

<table>
<thead>
<tr>
<th>CAUTION! After creating a password, the drive remains unlocked for as long as you continue your current work session. Then, the WD SmartWare software:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Locks the drive when you shut down your computer, disconnect your drive, or—depending on its configuration—your computer goes into the sleep mode</td>
</tr>
<tr>
<td>• Requires you to type your password to unlock the drive when you restart your computer or reconnect your drive, UNLESS you selected the Remember my password on this computer check box when you created your password</td>
</tr>
</tbody>
</table>

Unlocking the Drive

After you have created a password to keep others from accessing the files on your drive, you will have to type your password to unlock the drive whenever:

- You shut down and restart your computer
- You disconnect and reconnect the drive to your computer
- Your computer exits the sleep mode

You will have to do this even if you do not have the WD SmartWare software installed on your computer.

Unlocking the Drive with the WD SmartWare Software

Whenever you shut down and restart your computer, or disconnect and reconnect the drive to your computer, unless you selected the Remember my password on this computer check box when you created your password, the WD SmartWare software adds a lock symbol to the drive icon displays a Drive is locked message in place of the content gauge for your My Book drive:
1. If the WD SmartWare Unlock your drive dialog does not appear automatically, click the drive image above the Drive is locked message to display it:

2. Type your password in the **Password** box.

3. If you want to avoid this dialog in the future, select the **Remember my password on this computer** check box.

4. Click **Unlock**.

### Unlocking the Drive Without the WD SmartWare Software

Whenever you connect your password-protected drive to a computer that does not have the WD SmartWare software installed, you can use the WD SmartWare Drive Unlock utility to unlock the drive there. The WD SmartWare software provides the Drive Unlock utility on a “virtual” CD drive that appears under My Computer in your Windows Explorer display whenever the drive is password protected.

1. Start the WD SmartWare Drive Unlock utility by either:
   - Using your computer’s file management utility to open the WD Unlocker virtual CD and double-clicking the Unlock.exe file
   - Clicking **Start > My Computer** and double-clicking the WD Unlocker virtual CD icon under Devices with Removable Storage

2. Type your password in the **Password** box and click **Unlock** to unlock your drive.

3. At the **Your drive is now unlocked** prompt, click **Exit** to close the WD SmartWare Drive Unlock utility screen.
### Changing Your Password

1. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).

2. If you opened the WD SmartWare Settings tab display, click **Set Up Drive** to display the WD SmartWare Drive Settings screen.

3. On the Drive Settings screen, click **Security** to display the Your Drive is Secure dialog:

   ![Your Drive is Secure dialog](image)

4. On the Your Drive is Secure dialog:
   a. Type your current password in the **Password** box.
   b. Select the **Change password** option.
   c. Type your new password in the **New password** box, using up to 25 characters.
   d. Retype your new password in the **Verify password** box.
   e. Type a hint to help remember your new password in the **Password hint** box.
   f. Select or clear the **Remember my password on this computer** check box to signify whether you want the WD SmartWare software to remember your new password.

   *Note:* This function remembers the password for your currently logged on user name. If you log on as a different user, you will have to type your password and repeat this selection.

   g. Click **Update Security Settings**.

### Turning Off the Drive Lock Feature

1. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).

2. If you opened the WD SmartWare Settings tab display, click **Set Up Drive** to display the WD SmartWare Drive Settings screen.
3. On the Drive Settings screen, click **Security** to display the Your Drive is Secure dialog:

![Your Drive is Secure dialog]

4. On the Your Drive is Secure dialog:
   
   a. Type your password in the **Password** box.
   
   b. Select the **Remove security** option.
   
   c. Click **Update Security Settings** to remove password protection from your drive and redisplay the Set Security dialog.
Back Up Your Computer Files

This chapter includes the following topics:

- How the Backup Function Works
- Backing Up Files

How the Backup Function Works

The WD SmartWare software automatically and continuously backs up all of your important data files to your My Book drive—music, movies, photos, documents, email, and other files.

After the WD SmartWare software categorizes the different types of files on your computer’s internal hard drive, clicking the Start Backup button backs all of them up. Or you can select specific files, folders, or categories of files to back up.

After performing a backup, the WD SmartWare software protects your files by backing up any:

- New file that is created on or copied to your internal hard drive
- Existing file that is changed in any way

This protection is automatic—the WD SmartWare software does it for you without any action on your part—just make sure to leave your My Book drive connected to your computer.

*Note:* Automatic backup protection is continuous for as long as your My Book drive is connected to your computer. Then, whenever you disconnect and reconnect the drive to your computer, the WD SmartWare software rescans your computer for new or changed files and resumes automatic, continuous backup as before.

Backing Up Files

1. On the Home screen:
   a. If you are going to back up files by category AND your computer has more than one internal hard drive or drive partition, use the internal drive selector box under your computer icon to select the one that you want to back up first:

   ![Internal Drive Selector]

   b. If you have more than one My Book drive or other supported devices connected to your computer, select the one that you want to back up files to:

   ![Select My Book Drive]

2. Click the Backup tab to display the Backup screen (see Figure 9 on page 19).
3. On the Backup screen:

<table>

4. To back up all of the categories of files on the internal hard drive:
   a. Verify that the backup mode is category and that **Ready to perform category backup** appears at the upper-left corner of the Backup screen.

   If the backup mode is file and **Ready to perform file backup** appears there, then click the **Switch to Category Backup** button and **OK** on the **Switching Backup Plan** dialog.

   b. Click **Advanced View** to open the backup by categories selection box and verify that the check boxes for all six categories are selected:

   ![Advanced View](image)

   c. As required, select any cleared check boxes and then click **Apply Changes** to create a custom backup plan and refresh the content gauge for your My Book drive.

   d. Click **Start Backup** to begin backing up all categories of files on the internal hard drive and skip to step 8 on page 35.

5. To backup selected categories of files:
   a. Verify that the backup mode is category and that **Ready to perform category backup** appears at the upper-left corner of the Backup screen.

   If the backup mode is file and **Ready to perform file backup** appears there, then click the **Switch to Category Backup** button and **OK** on the **Switching Backup Plan** dialog.
b. Click **Advanced View** to open the backup by categories selection box:

![Advanced View]

- In the backup by categories selection box:
  - Clear the check boxes for the categories of files that you want to exclude from the backup.
  - As required, select the check boxes for the categories of files that you want to include in the backup.

- Click **Apply Changes** to create a custom backup plan and refresh the content gauge for your My Book drive.
- Click **Start Backup** to begin backing up the selected categories of files and skip to step 8 on page 35.

6. To back up all of the files and folders on the internal hard drive:
   a. Verify that the backup mode is file and that **Ready to perform file backup** appears at the upper-left corner of the Backup screen.
      
      If the backup mode is category and **Ready to perform category backup** appears there, then click the **Switch to File Backup** button and **OK** on the **Switching Backup Plan** dialog.
   
   b. In the backup by files selection box, select the check box for your computer's internal hard drive:

   ![Folder]

   If your computer has more than one internal hard drive, select the check box for each one.
   
   c. Click **Apply Changes** to create a custom backup plan and refresh the content gauge for your My Book drive.
   
   d. Click **Start Backup** to begin backing up all of files and folders on the internal hard drive and skip to step 8 on page 35.
7. To backup selected files or folders:
   a. Verify that the backup mode is file and that Ready to perform file backup appears at the upper-left corner of the Backup screen.
      If the backup mode is category and Ready to perform category backup appears there, then click the Switch to File Backup button and OK on the Switching Backup Plan dialog.
   b. In the backup by files selection box, click the pointers to open the folder structure:
   c. Select the check boxes for the individual files or folders that you want to back up.
      Note that selecting a folder check box automatically selects all of the subfolders and files in the folder.
   d. Click Apply Changes to create a custom backup plan and update the content gauge for your My Book drive
      Note: Clicking Revert clears your recent selections and redispays the prior applied configuration.
   e. Click Start Backup to begin backing up the selected files or folders and proceed to step 8.

8. During the backup:
   • A progress bar and message indicate the amount of data that has been backed up.
   • For a category backup, the blue background in the content gauge for your computer's internal hard drive changes to yellow/amber for all of the files that have not yet been backed up.
   • The gray background for categories or files in the content gauge for your My Book drive changes to blue as the backup completes.
   • You can continue to set up your drive or perform any other functions because the WD SmartWare software backs up your files in the background.
   • The Start Backup toggle button changes to Stop Backup for stopping the backup (see step 10 on page 36).
9. Appearance of a backup successfully finished message means that the backup completed normally.

If any files could not be backed up, the WD SmartWare software displays a:

- Caution message indicating the number of files involved
- View link that you can click to see a list of the files and the reasons they were not backed up

Some applications and running processes can keep files from being backed up. If you cannot determine why some of your files were not backed up, try:

- Saving and closing all of your open files
- Closing all running applications—including your email program and Web browser

**Important:** Appearance of a Caution message indicating that your drive is full means that there is not enough free space on the drive to complete the backup.

The best long-term solution would be to relegate the drive to long-term archive storage and:

a. Click the Help tab.

b. Click the WD Store link to view the Western Digital Online Store website.

c. Click External Hard Drives and select the best drive to suit your future requirements.

10. If you clicked Stop Backup at step 8, the Stop backup? confirmation message reminds you that the WD SmartWare software runs your backup job in the background so you can continue using your computer for other things during the backup.

To continue, click either:

- **Continue Backup** to disregard your request and resume the backup
- **Stop Backup** to follow through with your request and stop the backup

11. If you backed up files by category and your computer has more than one internal hard drive or multiple drive partitions, repeat the backup procedure for each one.
Retrieving Backed Up Files

This chapter includes the following topics:

How the Retrieve Function Works
Retrieving Files

How the Retrieve Function Works

The WD SmartWare software makes it easy for you to retrieve backed up files from your My Book drive and copy them to either:

- Their original locations on your computer
- A special retrieve folder

Retrieve is generally a five-step process:

1. Select the My Book drive to retrieve files from on the Home screen.
2. Select the backup volume that you want to retrieve files from.
3. Specify the destination where you want to copy the retrieved files—either a special retrieve folder or their original locations.
4. Specify what you want to retrieve—either individual files, folders, or everything.
5. Retrieve the files.

Retrieving Files

1. On the Home screen:
   a. If your computer has more than one internal hard drive or drive partition, use the internal drive selector box under your computer icon to select the one that you want to copy retrieved files to:

   ![Drive Selector](image)

   b. If you have more than one My Book drive or other supported devices connected to your computer, select the one that has the files you want to retrieve:

   ![Drive Selector](image)

2. Click the Retrieve tab to display either the:
   - Select a destination for retrieved files dialog
   - Select a volume to retrieve from dialog

   (See Figure 10 on page 22.)

![Show deleted files screenshot]

- Select the View icon to list individual files.
- To find a file, type all or part of the file name in the search box and press the Enter key to initiate the search.
  
  To eliminate the search filter, delete all of the text in the search box and press Enter.

- Select the check boxes for the files or folders that you want to retrieve.

6. Click Start Retrieving.

7. During the retrieve:

- The Retrieve screen displays a progress bar and a message indicating the amount of data that has been copied to the specified retrieve location.

- A Cancel Retrieving button is available for stopping the retrieve.

8. A Retrieval accomplished message signifies completion of the retrieve.

A Partial retrieve accomplished message means that all of the files you selected for the retrieve were not copied to the specified retrieve location. In this case, either a:

- Files Not Retrieved message provides the number of files that were not retrieved and a link to a failed-to-retrieve information screen. Click the View files link to see the list of files and the reasons they were not retrieved.

- Destination is full message means that your computer does not have sufficient disk space to complete the retrieve.
Managing and Customizing the Drive

This chapter includes the following topics:

- Using the WD Quick View Icon
- Opening the WD SmartWare Software
- Checking Drive Status
- Monitoring Icon Alerts
- Safely Disconnecting the Drive
- Customizing Your Drive Settings
- Registering the Drive
- Checking Drive Health
- Setting the Drive Sleep Timer
- Erasing the Drive
- Enabling the Backup and Retrieve Functions
- Restoring the WD SmartWare Software and Disk Image

Using the WD Quick View Icon

After you have installed the WD SmartWare software, the WD Quick View icon displays in the Windows taskbar:

By clicking the icon, you can:

- Open the WD SmartWare software
- Check the drive status
- Monitor icon alerts
- Safely disconnect the drive

The following sections describe how to use the icon and other ways to do these things.

Opening the WD SmartWare Software

If the WD SmartWare software does not start automatically, you can start it by:

- Left- or right-clicking the WD Quick View icon and selecting WD SmartWare:

- Clicking Start > (All) Programs > Western Digital > WD SmartWare > WD SmartWare
Checking Drive Status
Hover the pointer over the WD Quick View icon to see the drive capacity used and drive temperature status, and to find out if the drive is locked:

Monitoring Icon Alerts
The WD Quick View icon flashes to indicate drive status:

<table>
<thead>
<tr>
<th>IF the WD SmartWare icon flashes . . .</th>
<th>THEN the drive might be . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green and white,</td>
<td>Locked or in a format that the WD SmartWare software does not understand (non-Windows format in a Windows environment).</td>
</tr>
<tr>
<td>Red and white,</td>
<td>Overheated. Power down the drive and let it cool for 60 minutes. Power it back on, and if the problem persists, contact WD Support.</td>
</tr>
</tbody>
</table>

Safely Disconnecting the Drive

CAUTION! To prevent data loss, close all active windows and applications before shutting down or removing the drive.

You can safely disconnect the drive from your computer by using either:
- The WD Quick View icon
- The drive power button
- The drive icon on the WD SmartWare Home screen

Using the WD Quick View Icon

1. Right-click the WD Quick View icon and then click **Safely remove My Book USB HDD**:

   ![WD Quick View Icon](image)

   You might hear the drive power down.

2. Wait for the power/activity LED to turn off before disconnecting the drive from the computer.
Using the Drive Power Button

1. Press the power button on the back of the My Book drive.
   You might hear the drive power down.

2. Wait for the power/activity LED to turn off before disconnecting the drive from the computer.

Using the Home screen drive icon

1. Right-click the drive icon on the WD SmartWare Home screen and select the **Safely remove** option:

   ![Safely remove option](image)

   You might hear the drive power down.

2. Wait for the power/activity LED to turn off before disconnecting the drive from the computer.

Customizing Your Drive Settings

The WD SmartWare software makes it easy for you to quickly customize the settings of your drive for the best possible performance:

- **Security**—Create, modify, and disable passwords that keep others from accessing the files on your drive.
- **Registration**—Register your drive to receive free technical support during the warranty period and find out about software updates, product enhancements, and price discount opportunities.
- **Diagnostics**—Run diagnostics and status checks to make sure your drive is working properly.
- **Sleep Timer**—Turn your drive off during periods of extended inactivity to conserve power and extend the life of the drive.
- **Drive Erase**—Erase all of the contents on the drive, including your password if you have one.
- **Preferences**—Check for software updates and enable the Backup and Retrieve functions if you selected **Install Drive Settings** at the **What would you like to do?** prompt when you installed the WD SmartWare software.
To customize your drive settings for the best possible performance, on either the WD SmartWare Drive Settings screen or the drive management Drive Settings screen (see Figure 11 on page 24):

**Registering the Drive**

The WD SmartWare software uses your computer’s Internet connection to register your drive. To register your drive to receive free technical support during the warranty period and be kept up-to-date on the latest WD products:

1. Make sure that your computer is connected to the Internet.
2. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).
3. If you opened the WD SmartWare Settings tab display, click **Set Up Drive** to display the WD SmartWare Drive Settings screen.
4. On the Drive Settings screen, click **Registration** to display the Register Drive dialog:

![Register Drive Dialog]

5. On the Register Drive dialog:
   a. Type your first name in the **First name** box.
   b. Type your last name in the **Last name** box.
   c. Type your email address in the **E-mail address** box.
   d. Select your language in the **Preferred language** box.
   e. Select or clear the **Yes, I want to receive communication**... check box to specify whether or not you want to receive notifications about software updates, product enhancements, and price discount opportunities.
   f. Click **Register Drive**.

### Checking Drive Health

The WD SmartWare software has several built-in diagnostic tools to help make sure that your drive is performing well. Run the following tests if you are concerned that your drive is not operating properly:

- **Quick SMART Status**
  SMART is a failure-prediction function that continuously monitors key internal performance attributes of the drive. A detected increase in drive temperature, noise, or read/write errors, for example, can provide an indication that the drive is approaching a serious failure condition. With advanced warning, you could take precautionary measures, like moving your data to another drive, before a failure occurs.
  
The result of a quick SMART status check is a pass or fail evaluation of the drive's condition.
  
The quick SMART status check completes within a second or two.

- **Quick Drive Test**
  Your My Book drive has a built-in Data Lifeguard™ diagnostic utility that tests the drive for error conditions. The quick drive test checks the drive for major performance problems.
  
The result of a quick drive test is a pass or fail evaluation of the drive's condition.
  The quick drive test can take several minutes to complete.
• **Complete Drive Test**

  The most comprehensive drive diagnostic is the complete drive test. It tests every sector for error conditions and inserts bad-sector markers as required.

  The complete drive test can take several hours to complete, depending on the size and data configuration of your drive.

  The best time to run the drive diagnostics and status checks is on a regular basis, before you encounter any problems with your drive. And, because they are so fast, running the quick SMART status check and the quick drive test provides a high level of assurance with minimal inconvenience. Then, run all three whenever you encounter disk error conditions when backing up or retrieving files.

1. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).

2. If you opened the WD SmartWare Settings tab display, click **Set Up Drive** to display the WD SmartWare Drive Settings screen.

3. On the Drive Settings screen, click **Diagnostics** to display the Run Diagnostics dialog:

   ![Run Diagnostics](image)

4. On the Run Diagnostics dialog, click the button for the test that you want to run:
   - **Quick SMART Status**
   - **Quick Drive Test**
   - **Complete Drive Test**

**Setting the Drive Sleep Timer**

The drive sleep timer turns off the power to your drive after a certain period of inactivity to conserve power and minimize long-term wear on the drive.

1. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).

2. If you opened the WD SmartWare Settings tab display, click **Set Up Drive** to display the WD SmartWare Drive Settings screen.
3. On the Drive Settings screen, click **Sleep Timer** to display the Set Sleep Timer dialog:

![Set Sleep Timer dialog](image)

4. On the Set Sleep Timer dialog:
   a. In the **Turn off Drive** box, select the inactivity time interval at which you want to turn off the drive.
   b. Click **Set Timer** to save and implement your sleep timer selection.

## Erasing the Drive

**CAUTION! Erasing your drive permanently deletes all of the data on your drive. Always make sure that you no longer need any of the data on your drive before erasing the drive.**

*Note:* Erasing your drive also deletes the WD SmartWare software and all of the support files, utilities, online help and user manual files. You can download these to restore your My Book to its original configuration after erasing the drive.

The WD SmartWare software provides two ways to erase your drive, depending on whether your My Book drive is locked or not:

<table>
<thead>
<tr>
<th>IF your drive is . . .</th>
<th>AND you . . .</th>
<th>THEN see . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not locked,</td>
<td>Want to erase the drive,</td>
<td>“Using the Drive Settings Drive Erase Function” in the following section.</td>
</tr>
<tr>
<td>Locked,</td>
<td>Have forgotten or lost your password and <em>must</em> erase the drive,</td>
<td>“Using the Drive Unlock Utility” on page 48.</td>
</tr>
</tbody>
</table>

### Using the Drive Settings Drive Erase Function

1. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).
2. If you opened the WD SmartWare Settings tab display, click **Set Up Drive** to display the WD SmartWare Drive Settings screen.
3. On the Drive Settings screen, click **Drive Erase** to display the Erase Drive dialog:
4. On the Erase Drive dialog:
   a. Read the warning about the loss of data if you erase your drive.
   b. Select the I understand check box to signify that you accept the risk.
   c. Click Drive Erase.

After the drive erase operation completes, see “Restoring the WD SmartWare Software and Disk Image” on page 50.

*Note:* Erasing your drive also removes your password. If you still want to use a password to protect your drive, you will need to re-create it after restoring the WD SmartWare software and disk image. (See “Password Protecting the Drive” on page 27.)

**Using the Drive Unlock Utility**

1. If you do not see a prompt to provide your password, then either:
   - Click the My Book image above the Drive is locked prompt on the Home screen to display the WD SmartWare drive unlock screen:
     
     ![Unlock screen]

     - Start the WD SmartWare Drive Unlock utility by either:
       - Using your computer's file management utility to open the WD Unlock virtual CD and double-clicking the Unlock.exe file
       - Clicking Start > My Computer, opening the WD Unlock virtual CD listing under Devices with Removable Storage, and double-clicking the Unlock.exe file

2. Make five attempts to unlock the drive by:
   a. Typing a password in the Password box.
   b. Clicking Unlock.
3. The fifth invalid password attempt displays the **Too Many Password Attempts** prompt:

![Too Many Password Attempts](image)

4. Read the warning about the loss of data if you erase your drive.

5. Click the **I understand** check box to signify that you accept the risk.

6. Click **Format** to erase your drive.

After the drive erase operation completes, see “Restoring the WD SmartWare Software and Disk Image” on page 50.

**Note:** Erasing your drive also removes your password. If you still want to use a password to protect your drive, you will need to re-create it after restoring the WD SmartWare software and disk image. (See “Password Protecting the Drive” on page 27.)

**Enabling the Backup and Retrieve Functions**

If you selected **Install Drive Settings** at the **What would you like to do?** prompt on the Welcome to WD SmartWare screen and now want to enable the Backup and Retrieve functions:

1. On the drive management Drive Settings screen (see Figure 11 on page 24), click **Preferences** to display the Set Preferences dialog:

   ![Set Preferences](image)

   **Set Preferences**
   - Select automation options.
   - [ ] Automatically check for WD SmartWare software updates.
   - Unlock the full potential of WD SmartWare to back up and retrieve the data on your WD drive. To add Backup and Retrieve functionality to WD SmartWare, click **Enable Backup and Retrieve functions**, then click **Enable Backup Now**.
   - [ ] Enable Backup and Retrieve functions.
   - **Enable Backup Now**

2. On the Set Preferences dialog:
   a. Select the **Enable Backup and Retrieve functions** check box.
   b. Click **Enable Backup Now** to:
      - Add the **Backup** and **Retrieve** tabs to the Home screen display
      - Add the **Set Up Software** and **Set Up Drive** options to the Settings screen
      - Remove the **Preferences** option from the Drive Settings screen
Restoring the WD SmartWare Software and Disk Image

In addition to deleting all of the data on your My Book drive, erasing or reformatting the drive also removes the WD SmartWare software and all of the support files, utilities, online help and user manual files.

If you ever need to remove and reinstall the WD SmartWare software on your computer, or move the drive to another computer and install the software there, you will need to restore the WD SmartWare software and disk image on your My Book drive. To do this, after you have erased or reformatted the drive, go to http://support.wdc.com and see Knowledge Base answer ID 7.
Managing and Customizing the Software

This chapter includes the following topics:

- Specifying the Number of Backup Versions
- Specifying a Different Retrieve Folder
- Checking for Software Updates
- Uninstalling the WD SmartWare Software

Specifying the Number of Backup Versions

The WD SmartWare software can keep up to 25 older versions of each file. If you overwrite or delete a file by mistake, or want to see the file a couple of versions ago, the WD SmartWare software has a copy for you. You always have the most-recent specified number of versions of each file available for retrieves, and you can choose to keep from 1 to 25 versions.

Keeping more versions:

- Improves your ability to retrieve files from a longer back-in-time period
- Consumes more disk space

To specify the number of backup versions that you want to keep for each file:

1. Click the Settings tab and Set Up Software to display the Software Settings screen (see Figure 11 on page 24).
2. On the Software Settings screen, click File History to display the Set File History dialog:

   ![Set File History dialog](image)

3. On the Set File History dialog:
   a. Use the selection box to specify the number of backup versions that you want to keep for each file, from 1 to 25.
   b. Click Apply.

Specifying a Different Retrieve Folder

When you start a retrieve, you can choose whether you want to store the retrieved files in either:

- Their original locations on your computer
- A Retrieved Content folder

By default, the WD SmartWare software creates and uses a Retrieved Contents subfolder in your My Documents folder. To specify a different folder:

1. Either create a new folder or determine which existing folder you want to use.
2. Click the **Settings** tab and **Set Up Software** to display the Software Settings screen (see Figure 11 on page 24).

3. On the Software Settings screen, click **Retrieve Folder** to display the Set Retrieve Folder dialog:

   ![Set Retrieve Folder Dialog](image)

   The current retrieve folder is:
   C:\Users\<username>\Documents\Retrieve Folder

   If you want to change this folder, specify the new folder below:

   ![Browse Button](image)

   ![Apply Button](image)

4. On the Set Retrieve Folder dialog:
   a. Click **Browse** and use the browse function to identify the new retrieve folder.
   b. Click **Apply**.

   **Checking for Software Updates**

   When enabled, the Preferences option checks for software updates each time you reconnect your My Book drive to your computer. This ensures that you are always using the most-recent software version.

   To enable or disable the Preferences option:

   1. Click the **Settings** tab to display either the WD SmartWare Settings tab display or the drive management Drive Settings screen (see Figure 11 on page 24).

   2. If you opened the WD SmartWare Settings tab display, click **Set Up Software** to display the Software Settings screen.

   3. On either the Software Settings screen or the drive management Drive Settings screen, click **Preferences** to display the Set Preferences dialog:

   ![Set Preferences Dialog](image)

     **WD SmartWare Set Preferences Dialog**

     **Set Preferences**
     
     Select automation options.
     
     ✔ Automatically check for WD SmartWare software updates.

   ![Drive Management Preferences Dialog](image)

     **Drive Management Set Preferences Dialog**

     **Set Preferences**
     
     Select automation options.
     
     ✔ Automatically check for WD SmartWare software updates.

   4. On the Set Preferences dialog, select or clear the **Automatically check for WD SmartWare software updates** check box to enable or disable the Preferences option.

      **Note:** See “Enabling the Backup and Retrieve Functions” on page 49 for information about the **Enable Backup and Retrieve functions** check box on the drive management Set Preferences dialog.
Uninstalling the WD SmartWare Software

Important: Uninstalling the WD SmartWare software deletes all existing backup job configurations. You must restart the backup job manually after reinstalling the software. (See “Backing Up Your Computer Files” on page 32.)

Use your operating system’s Windows Installer utility to uninstall the WD SmartWare software:

1. Click Start > (All) Programs > Western Digital > WD SmartWare > Uninstall WD SmartWare.

2. Click Yes at the Are you sure... prompt.

Note: You can also use your operating system’s Add or Remove Programs function to uninstall the WD SmartWare software.
Using the Drive with a Mac

The My Book drive is preformatted as a single NTFS partition for compatibility with all updated Windows operating systems. To use the drive with Mac OS X operating systems, and to use Time Machine, if you want, you must first:

- Reformat the drive to a single HFS+J partition
- Restore the WD SmartWare software and disk image

This chapter includes the following topics:

- Reformatting the Drive
- Restoring the WD SmartWare Software and Disk Image
- Connecting the Drive and Getting Started
- Enhancing Performance with WD +Turbo
- Installing the WD SmartWare Software
- The WD SmartWare Home Screen
- Using the WD Quick View Icon
  - Opening the WD SmartWare Software
  - Checking Drive Status
  - Safely Dismounting the Drive
- Unlocking the Drive
- Uninstalling the WD SmartWare Software

Reformatting the Drive

CAUTION! Reformatting the drive erases all its contents. If you have already saved files on the drive, be sure to back them up before reformatting it.

Go to http://support.wdc.com and refer to the appropriate Knowledge Base answer ID for information about reformatting a Windows drive:

- 287 or 3323 for MAC OS X
- 1354 for FAT32

See “Troubleshooting” on page 69 for more information about reformatting a drive.

Restoring the WD SmartWare Software and Disk Image

After you have reformatted your My Book drive for use on a Mac computer, go to http://support.wdc.com and see Knowledge Base answer ID 7 for information about downloading and restoring the Mac version of the WD SmartWare software and disk image on the drive.

Connecting the Drive and Getting Started

After you have reformatted your My Book drive for use on a Mac computer and downloaded and restored the Mac version of the WD SmartWare software and disk image:

1. Turn on your Mac computer.
2. Connect the My Book drive to your computer as shown in Figure 3 on page 5.
3. The drive automatically powers up and mounts to your computer.
4. Verify that the My Book drive appears under DEVICES in the Sidebar area of your Finder display:

5. If the **External disks** check box is selected on your Finder Preferences dialog, the My Book icon appears on your desktop:

6. The first time you connect your My Book drive to your computer, a message asks if you want to use the drive to back up with Time Machine:

   - **On Lion and Mountain Lion Computers**
     
     ```
     Do you want to use "MY BOOK" to back up with Time Machine?
     Time Machine keeps an up-to-date copy of everything on your Mac. It not only keeps a spare copy of every file, it remembers how your system looked, so you can revisit your Mac as it appeared in the past.
     ```
     
   - **On Leopard and Snow Leopard Computers**
     
     ```
     Do you want to use MY BOOK (999.83 GB) to back up with Time Machine?
     Time Machine keeps an up-to-date copy of everything on your Mac. It not only keeps a spare copies of every file, it remembers how your system looked, so you can revisit your Mac as it appeared in the past.
     ```

   **Note:** Currently the **Encrypt Backup Disk** check box only appears on computers using the Lion or Mountain Lion operating system.

   The WD SmartWare software is fully compatible with Apple’s Time Machine software. When using Time Machine, you can still use the WD SmartWare software for password protecting the drive, registering the drive, and running drive diagnostics.

   - If you do not want to use the Time Machine backup software, click:
     - **Don't Use** on Lion or Mountain Lion
     - **Cancel** on Leopard or Snow Leopard
   
   Skip to step 9 on page 56.

   - If you do want to use the Time Machine backup software, then proceed to step 7 on page 56.
7. Depending on your computer’s operating system:
   - Using Leopard or Snow Leopard, click **Use as Backup Disk** and skip to step 8.
   - Using Lion or Mountain Lion:
     - If you want to create a password to secure your backup files, select the **Encrypt Backup Disk** check box and proceed to step a.
     - If you do not want to create a password to encrypt your backup files, click **Use as Backup Disk** and skip to step 8.

   a. Click **Use as Backup Disk** and complete the backup password dialog that displays:

   ![Backup Password Dialog](image)

   b. Click **Encrypt Disk** and proceed to step 8.

8. The My Book icon now displays as:

   ![My Book Icon](image)

9. Your My Book drive is now ready to use as an external storage device. You can enhance its performance by installing the following software that is on the drive:
   - WD +TURBO utility (see “Enhancing Performance with WD +TURBO” in the next section)
   - WD SmartWare software (see “Installing the WD SmartWare Software” on page 58)

**Enhancing Performance with WD +TURBO**

WD +TURBO is a utility on the My Book drive that you can install to improve the performance of the drive on a Mac computer.

If you are going to install the WD SmartWare software, you do not need to install the WD +TURBO utility yourself—the WD SmartWare software will install it for you. If you are not going to install the WD SmartWare software, install WD +TURBO to enhance the performance of your My Book drive.
1. Double-click the My Book icon and then double-click the Extras folder on the screen that displays:

![My Book Screen]

2. Double-click the WD +TURBO Installer icon:

![WD +TURBO Installer Icon]

3. Click Install on the WD +TURBO Driver Installer screen:

![WD +TURBO Driver Installer]

4. Read the license agreement and click Accept to continue.

5. A message informs you that installing the drivers requires you to restart your computer to make them active:

![Driver Installer Confirmation]

Click Yes to continue.
6. Type the password that you normally use to access the computer in the Password box and click OK:

![Password dialog box]

7. As prompted, when the installation completes, click Yes to restart the computer:

![Restart confirmation dialog box]

8. When the computer restarts, the My Book icon now looks like this, where “MY BOOK” is the name you assigned to the volume when you reformatted the drive for use with the Mac computer:

![My Book icon]

Your My Book drive is now ready to use as an enhanced-performance external storage device.

**Installing the WD SmartWare Software**

1. Double-click the My Book icon and then double-click the WD SmartWare Software Installer for Mac application on the screen that displays:
2. The WD SmartWare Software Installer screen displays:

![WD SmartWare Software Installer](image)

3. Click **Install**.

4. Read the license agreement and click **Accept** to continue.

5. Type the password that you normally use to access the computer in the **Password** box and click **OK**:

![Password Entry](image)

6. Wait for the installation to complete. This could take several minutes:

![Installation Progress](image)

7. When the installation completes, the WD SmartWare Home screen displays (see Figure 13 on page 60).
The WD SmartWare Home Screen

In the Content Gauge for your computer’s hard drive, all of your files that are available for backup are shown against a blue background in categories that are based on the following folders on your computer:

- Music
- Movies
- Pictures
- Mail
- Documents
- Other

Each category includes all of the files in the represented folder except the Other category, which includes all of the files in all other folders on your computer.

Note that:

- The **System** category, shown against a dark gray background, includes all of your operating system files that are not available for backup. Files that are not backed up include system files, program files, applications, working files, and any files that are stored in a Temp folder.
- The **Retrieved** category, also shown against a dark gray background, shows the files that you have retrieved from a prior backup. They, too, are not available for backup.
- Hovering the pointer over a category displays the number of files in the category.
In the Content Gauge for your My Book drive, the **Additional Files** category includes all of the files shown in the used space portion of your drive properties. This space is not available for backups.

*Note:* The small number of files that are shown in the **Additional Files** category when you first install the WD SmartWare software—before performing your first backup—represents the system and hidden files that your computer’s operating system put there when you installed the drive.

**Using the WD Quick View Icon**

After you have installed the WD SmartWare Software, the WD Quick View icon displays in the bar at the top-right corner of the screen:

By clicking the icon, you can:
- Open the WD SmartWare software
- Check the drive status
- Safely dismount the drive

The following sections describe how to use the icon and other ways to do these things.

**Opening the WD SmartWare Software**

If the WD SmartWare software does not start automatically, you can restart it by:
- Clicking the WD Quick View icon and selecting **Open WD SmartWare**:

- Double-clicking **WD SmartWare.app** in the Applications list:
Checking Drive Status

Use the WD Quick View icon to determine whether the drive is locked (encrypted), how full the drive is, the drive's serial number, and the temperature condition of the drive.

1. Click the WD Quick View icon to display a list of drives and select the My Book drive:

   ![WD Quick View Icon]

   - Drive is not encrypted
   - Unmount Volumes
   - Mount CD
   - S/N: WCAV5E642533
   - Space Available: 100%
   - Temperature Condition: OK

2. If the drive is unlocked (not encrypted), the submenu shows the serial number of the drive, the space available, and the temperature condition.

   If the drive is locked:

   a. Click **Unlock Drive** on the submenu to display the WD SmartWare Drive Unlock utility screen:

   ![Unlock Drive Screen]

   b. Type your **Password** in the **Password** box.

   c. At the **Your drive is now unlocked** prompt, click **Exit** to close the WD SmartWare Drive Unlock utility screen.

   d. Repeat step 1 to see the drive status.
Safely Dismounting the Drive

You can safely dismount the drive using either the:

- WD Quick View icon
- My Book icon
- Drive power button

**CAUTION! To prevent data loss, close all active windows and applications before shutting down or removing the drive.**

Using the WD Quick View Icon

1. Click the WD Quick View icon to display a list of drives.
2. Select the My Book drive and on the submenu select **Unmount Volumes**: If the drive has more than one volume, a prompt asks you to select the volume. You might hear the drive power down.
3. Wait for the drive icon to disappear from the desktop before disconnecting the drive from the computer.

Using the My Book Icon

1. Right- or control-click the My Book icon on the desktop and click **Eject “MY BOOK”** where “MY BOOK” is the name you assigned to the volume when you reformatted the drive for use on a Mac computer:
   
   You might hear the drive power down.
2. Wait for the drive icon to disappear from the desktop before disconnecting the drive from the computer.
Using the Drive Power Button

1. Press the power button on the back of the My Book drive. You might hear the drive power down.
2. Wait until the drive icon to disappear from the desktop before disconnecting the drive from the computer.

Unlocking the Drive

After you have created a password to keep others from accessing the files on your drive, you will have to type your password to unlock the drive whenever:

- You shut down and restart your computer
- You disconnect and reconnect the drive to your computer
- Your computer exits the sleep mode

You will have to do this even if you do not have the WD SmartWare software installed on your computer.

Unlocking the Drive with the WD SmartWare Software

The procedure for unlocking your drive with the WD SmartWare software can be automatic or manual, depending on whether the Please provide your password prompt appears or not.

Automatically

Whenever the WD SmartWare drive unlock screen appears:

1. Type your password in the Password box.
2. Click Unlock to unlock your drive and enable the WD SmartWare software.

Manually

If your computer goes into sleep mode, an unlock screen might not display when you reactivate it. To unlock the drive, you can use either the:

- WD Unlocker VCD as described in “Unlocking the Drive Without the WD SmartWare Software” on page 65
- WD Quick View icon

To unlock the drive manually using the WD Quick View icon:
1. Click the WD SmartWare icon in the bar at the top-right corner of the screen.
2. Select the My Book drive and then click **Unlock Drive**:

3. Type your password in the **Password** box and click **Unlock** on the WD SmartWare Drive Unlock utility screen:

4. At the **Your drive is now unlocked** prompt, click **Exit** to close the WD SmartWare Drive Unlock utility screen.

**Unlocking the Drive Without the WD SmartWare Software**

Whenever you connect your password-protected drive to a computer that does not have the WD SmartWare software installed, you can use the WD SmartWare Drive Unlock utility to unlock the drive there. The WD SmartWare software provides the Drive Unlock utility on a “virtual” CD drive (VCD) that appears on your desktop whenever the drive is password protected:

1. Double-click the WD Unlocker VCD icon and double-click the Drive Unlock application on the screen that appears:
2. Type your password in the **Password** box and click **Unlock Drive** on the WD Drive Unlock utility screen:

![Unlock Drive screen](image)

3. Click **Exit** at the Your drive is now unlocked prompt to close the WD SmartWare Drive Unlock utility screen.

**Uninstalling the WD SmartWare Software**

**Important:** You can easily uninstall the software. However, you will need to restart the backup job manually after reinstalling the software as uninstalling deletes all existing backup job configurations. (See “Backing Up Your Computer Files” on page 32.)

1. Double-click the My Book icon on the desktop and double-click the WD SmartWare Software Installer for Mac application on the screen that displays:
2. Select the **Uninstall** check box on the WD SmartWare Installer for Mac screen to display the Uninstall WD SmartWare dialog:

![Uninstall WD SmartWare](image1.png)

3. If you want to keep WD Quick View installed to discover network-attached WD storage devices and provide drive status information, clear the **Uninstall WD Quick View** check box.

4. Click **Uninstall**.

5. Type the password that you normally use to access the computer in the **Password** box and click **OK**:

![Password](image2.png)

6. Wait for the uninstallation to complete. This could take several minutes:

![Uninstalling WD SmartWare](image3.png)
7. Reappearance of the WD SmartWare Software Installer screen signifies that the software has been uninstalled:

![WD SmartWare Installer for Mac](image)

8. Click **Quit** to close the WD SmartWare Installer for Mac screen.
Troubleshooting

This chapter includes the following topics:

- Installing, Partitioning, and Formatting the Drive
- Frequently Asked Questions

If you have problems installing or using this product, refer to this troubleshooting section or visit our support website at http://support.wdc.com and search our knowledge base for more help.

Installing, Partitioning, and Formatting the Drive

How to | Answer ID
---|---
Partition, and format a WD drive on Windows (7, Vista, XP, 2000) and Mac OS X | 3865
Reformat from Mac GPT to Windows XP NTFS | 3645
Reformat the drive from Mac GPT to Windows 7 or Vista NTFS format | 3647
Obtain and reinstall the original software included with this product | 1425
Format a WD hard drive in FAT32* (for use in both Windows and MAC OS X) | 291

*The FAT32 file system has a maximum individual file size of 4 GB and cannot create partitions larger than 32 GB in Windows. To create partitions larger than 32 GB in FAT32 when reformating the drive, download the External USB/FireWire FAT32 Formatting Utility from http://support.wdc.com/product/download.

Windows users can avoid these size limitation by formatting the drive to NTFS using either the Windows Disk Management utility or similar third-party software. For further details, see:

Frequently Asked Questions

**Q:** Why is the drive not recognized under My Computer or on the computer desktop?

**A:** If your system has a USB 3.0 or USB 2.0 PCI adapter card, be sure that its drivers are installed before connecting your WD USB 3.0 external storage product. The drive is not recognized correctly unless USB 3.0 or USB 2.0 root hub and host controller drivers are installed. Contact the adapter card manufacturer for installation procedures.

**Q:** Why won’t my computer boot when I connect my USB drive to the computer before booting?

**A:** Depending on your system configuration, your computer might try to boot from your WD USB drive. Refer to your system’s motherboard BIOS setting documentation to disable this feature or visit http://support.wdc.com and see Knowledge Base answer ID 1201. For more information about booting from external drives, refer to your system documentation or contact your system manufacturer.

**Q:** Why is the data transfer rate slow?

**A:** Your system may be operating at USB 1.1 speeds due to an incorrect driver installation of the USB 3.0 or USB 2.0 adapter card or a system that does not support USB 3.0 or USB 2.0.
Q: How do I determine whether or not my system supports USB 3.0 or USB 2.0?
A: Refer to your USB card documentation or contact your USB card manufacturer.

Note: If your USB 3.0 or USB 2.0 controller is built in to the system motherboard, be sure to install the appropriate chipset support for your motherboard. Refer to your motherboard or system manual for more information.

Q: What happens when a USB 3.0 or USB 2.0 device is plugged into a USB 1.1 port or hub?
A: USB 3.0 and USB 2.0 are backward-compatible with USB 1.1. When connected to a USB 1.1 port or hub, a USB 3.0 or USB 2.0 device operates at the USB 1.1 full speed of up to 12 Mbps.

If your system includes a PCI Express slot, you can achieve USB transfer rates by installing a PCI Express adapter card. Contact the card manufacturer for installation procedures and more information.
Installing the SES Driver

This appendix includes the following topics:

- Installing on Windows XP Computers
- Installing on Windows Vista Computers
- Installing on Windows 7 and Windows 8 Computers

If you decide to not install the WD SmartWare software, you must have an SES driver installed on computers running Windows to keep the hardware popup wizard from displaying every time you connect your My Book drive to your computer.

*Note:* The SES driver is installed automatically when you install the WD SmartWare software or if you clicked Do Not Install on the Welcome to WD SmartWare screen (see “Getting Started Without the WD SmartWare Software” on page 11).

### Installing on Windows XP Computers

After you physically connect the drive as shown in Figure 3 on page 5, the Found New Hardware Wizard screen displays.

*Note:* If Autoplay is enabled, two additional screens might appear at the same time as the Found New Hardware Wizard screen. If they appear, close them.

You can use the Found New Hardware Wizard to install the SES driver either:

- Automatically, if your computer is connected to the Internet
- Manually, whether your computer is connected to the Internet or not

#### Installing the Driver Automatically

To install the SES driver automatically, your computer must be connected to the Internet:

1. Verify that your computer is connected to the Internet.
2. On the Found New Hardware Wizard screen, select **Yes this time only** to allow Windows XP to connect to Windows Update:

![Found New Hardware Wizard](image)

3. Click **Next** to continue.
4. Select **Install the software automatically** and click **Next**:

![Image of the software installation wizard]

5. When the installation completes, click **Finish**:

**INSTALLING THE SES DRIVER – 72**
Installing the Driver Manually

If your computer is not connected to the Internet, install the driver manually:

1. On the Found New Hardware Wizard screen, select **No, not this time** to inhibit a connection attempt to Windows Update:

   ![Found New Hardware Wizard](image)

2. Click **Next** to continue.
3. Select **Install from a list or specific location** and click **Next**:

   ![Found New Hardware Wizard](image)

4. Browse to **My Computer** and:
   a. Double-click the My Book drive.
   b. Double-click the Extras folder.
   c. Select **WD SES Device Driver**.
d. Click **Next**:

![Found New Hardware Wizard](image)

**5. When the installation completes, click **Finish**:**

**Installing on Windows Vista Computers**

After you physically connect the drive as shown in Figure 3 on page 5, the Found New Hardware screen displays.

*Note*: If Autoplay is enabled, two additional screens might appear at the same time as the Found New Hardware screen. If they appear, close them.

You can use the Found New Hardware screen to install the SES driver either:

- Automatically, if your computer is connected to the Internet
- Manually, whether your computer is connected to the Internet or not
Installing the Driver Automatically

To install the SES driver automatically, your computer must be connected to the Internet:

1. Verify that your computer is connected to the Internet.
2. On the Found New Hardware wizard screen, click **Locate and install driver software**:

3. On the Found New Hardware - WD SES Device wizard screen, click **Yes, search online this time only** to allow Windows Vista to connect to Windows Update:

Windows Vista automatically:

- Connects to Windows Update
- Finds, downloads, and installs the SES driver
**Installing the Driver Manually**

If your computer is not connected to the Internet, install the driver manually:

1. On the Found New Hardware wizard screen, click **Locate and install driver software**:

   ![Image of locate and install driver software](image)

2. On the Found New Hardware - WD SES Device wizard screen, click **Don't search online**:

   ![Image of don't search online](image)

3. At the **Install the disc that came with your WD SES Device** prompt, click **I don't have the disc. Show me other options**:

   ![Image of install disc other options](image)
4. Browse to **Computer** and:
   a. Double-click the My Book drive.
   b. Double-click the Extras folder.
   c. Select **WD SES Device Driver**.
   d. Click **Next**:

![Image of Found New Hardware - WD SES Device]

5. When the installation completes, click **Close**:

**WD SES Device**
Installing on Windows 7 and Windows 8 Computers

After you physically connect the drive as shown in Figure 3 on page 5, use the Windows 7 Computer Management utility to install the SES driver:

1. Open All Programs and click Computer > Manage:

2. Under Computer Management (Local), click Device Manager > Unknown Device and right-click Update driver software:
3. Click **Browse my computer for driver software**:

4. Browse to **Computer**, double-click the My Book drive, double-click the Extras folder, and select **WD SES Device Driver**:

5. Click **Next** to continue.

6. When the installation completes, click **Close**:
Compliance and Warranty Information

This appendix includes the following topics:

- Warranty Information (All Regions Except Australia/New Zealand)
- Warranty Information (Australia/New Zealand)
- GNU General Public License ("GPL")

Regulatory Compliance

FCC Class B Information

This device has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This unit generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. Any changes or modifications not expressly approved by WD could void the user's authority to operate this equipment.

ICES/NMB-003 Compliance

Cet appareil de la classe B est conforme à la norme NMB-003 du Canada.

This device complies with Canadian ICES-003 Class B.

Safety Compliance

Approved for US and Canada. CAN/CSA-C22.2 No. 60950-1, UL 60950-1: Safety of Information Technology Equipment.

Approuvé pour les Etats-Unis et le Canada. CAN/CSA-C22.2 No. 60950-1: Sûreté d’équipement de technologie de l’information.

This product is intended to be supplied by a listed limited power source, double insulated, or direct plug-in power unit marked “Class 2.”

CE Compliance for Europe

Marking by the CE symbol indicates compliance of this system to the applicable Council Directives of the European Union, including the EMC Directive (2004/108/EC) and the Low Voltage Directive (2006/95/EC). A “Declaration of Conformity” in accordance with the applicable directives has been made and is on file at Western Digital Europe.

Warranty Information (All Regions Except Australia/ New Zealand)

Obtaining Service

WD values your business and always attempts to provide you the very best of service. If this Product requires maintenance, either contact the dealer from whom you originally purchased the Product or visit our product support website at [http://support.wdc.com/warranty/policy.asp](http://support.wdc.com/warranty/policy.asp) for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided on your return paperwork. Your original box and packaging materials should be kept for storing or shipping your WD Product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via [http://support.wdc.com/warranty/policy.asp](http://support.wdc.com/warranty/policy.asp). WD shall have no liability for lost data regardless of the cause, recovery of lost data, or data contained in any Product placed in its possession.
Limited Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD's specification therefor. The term of your limited warranty depends on the country in which your Product was purchased. The term of your limited warranty is for 3 years in the North, South and Central America region, 3 years in the Europe, the Middle East and Africa region, and 3 years in the Asia Pacific region, unless otherwise required by law. The term of your limited warranty period shall commence on the purchase date appearing on your purchase receipt. WD shall have no liability for any Product returned if WD determines that the Product was stolen from WD or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, unless the product is on the list of limited user-serviceable products and the specific alteration is within the scope of the applicable instructions, as found at http://support.wdc.com/warranty/policy.asp), accident or mishandling while in the possession of someone other than WD. Subject to the limitations specified above, your sole and exclusive warranty shall be, during the period of warranty specified above and at WD's option, the repair or replacement of the Product.

The foregoing limited warranty is WD's sole warranty and is applicable only to products sold as new. The remedies provided herein are in lieu of a) any and all other remedies and warranties, whether expressed, implied or statutory, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose, and b) any and all obligations and liabilities of WD for damages including, but not limited to accidental, consequential, or special damages, or any financial loss, lost profits or expenses, or lost data arising out of or in connection with the purchase, use, or performance of the Product, even if WD has been advised of the possibility of such damages. In the United States, some states do not allow exclusion or limitations of incidental or consequential damages, so the limitations above may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Warranty Information (Australia/New Zealand)

Nothing in this warranty modifies or excludes your legal rights under the Australian Competition and Consumer Act or the New Zealand Consumer Guarantees Act. This warranty identifies WD’s preferred approach to resolving warranty claims which is likely to be quick and simple for all parties.

No other warranties either express or implied by law, including but not limited to those contained in the Sale of Goods Act, are made with respect to the Product. If you purchased your Product in New Zealand for the purposes of a business, you acknowledge and agree that the New Zealand Consumer Guarantees Act does not apply. In Australia, our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure. What constitutes a major failure is set out in the Australian Consumer Law.
Obtaining Service

WD values your business and always attempts to provide you the very best of service. Should you encounter any problem, please give us an opportunity to address it before returning this Product. Most technical support questions can be answered through our knowledge base or e-mail support service at http://support.wdc.com. If the answer is not available or, if you prefer, please contact WD at the applicable telephone number shown in the front of this document.

If you wish to make a claim, you should initially contact the dealer from whom you originally purchased the Product. If you are unable to contact the dealer from whom you originally purchased the Product, please visit our product support Web site at http://support.wdc.com for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided with your RMA number. If following receipt of a qualifying claim under this warranty, WD or the dealer from whom you originally purchased the Product determines that your claim is valid, WD or such dealer shall, at its discretion, either repair or replace the Product with an equivalent or better Product or refund the cost of the Product to you. You are responsible for any expenses associated with a claim under this warranty. The benefits provided to you under this warranty are in addition to other rights and remedies available to you under the Australian Competition and Consumer Act or the New Zealand Consumer Guarantees Act.

Your original box and packaging materials should be kept for storing or shipping your WD product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via http://support.wdc.com.

Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD’s specifications. The term of your warranty is 3 year in Australia and New Zealand, unless otherwise required by law. The term of your warranty period shall commence on the purchase date appearing on your purchase receipt from an authorized distributor or authorized reseller. Warranty service will not be provided unless the Product is returned to an authorized distributor, authorized reseller or regional WD return center where the Product was first shipped by WD. WD may at its discretion make extended warranties available for purchase. WD shall have no liability for any Product returned if WD determines that the Product was (i) not purchased from an authorized distributor or authorized reseller, (ii) not used in accordance with WD specifications and instructions, (iii) not used for its intended function, or (iv) stolen from WD, or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, including the mounting frame, unless the
product is on the list of limited user-serviceable products and the specific alteration is
within the scope of the applicable instructions, as found at http://support.wdc.com),
accident or mishandling while in the possession of someone other than WD.

PRODUCTS ARE COMPLEX AND FRAGILE ITEMS THAT MAY OCCASSIONALY FAIL
DUE TO (A) EXTERNAL CAUSES, INCLUDING WITHOUT LIMITATION,
MISHANDLING, EXPOSURE TO HEAT, COLD, AND HUMIDITY, AND POWER
FAILURES, OR (B) INTERNAL FAULTS. SUCH FAILURES CAN RESULT IN THE
LOSS, CORRUPTION, DELETION OR ALTERATION OF DATA. NOTE THAT YOU
SHALL BE RESPONSIBLE FOR THE LOSS, CORRUPTION, DELETION OR
ALTERATION OF DATA HOWSOEVER CAUSED, AND FOR BACKING UP AND
PROTECTING DATA AGAINST LOSS, CORRUPTION, DELETION OR ALTERATION.
YOU AGREE TO CONTINUALLY BACK UP ALL DATA ON THE PRODUCT, AND TO
COMPLETE A BACKUP PRIOR TO SEEKING ANY GENERAL SERVICE AND
TECHNICAL SUPPORT FROM WD.

In Australia, if the Product is not of a kind ordinarily acquired for personal, domestic or
household use or consumption, provided it is fair and reasonable to do so, WD limits its
liability to replacement of the Product or supply of equivalent or better Product.

This warranty shall extend to repaired or replaced Products for the balance of the
applicable period of the original warranty or ninety (90) days from the date of shipment of
a repaired or replaced Product, whichever is longer. This warranty is WD’s sole
manufacturer’s warranty and is applicable only to Products sold as new.
