WD® Service and Support

Should you encounter any problem, please give us an opportunity to address it before returning this product. Most technical support questions can be answered through our knowledge base or e-mail support service at http://support.wd.com. If the answer is not available or if you prefer, please contact WD at the best telephone number shown below.

Your product includes 30 days of free telephone support during the warranty period. This 30-day period starts on the date of your first telephone contact with WD Technical Support. E-mail support is free for the entire warranty period and our extensive knowledge base is available 24/7. To help us keep you informed of new features and services, remember to register your product online at http://register.wd.com.

Accessing Online Support

Visit our product support website at support.wd.com and choose from these topics:

- **Downloads** — Download drivers, software, and updates for your WD product.
- **Registration** — Register your WD product to get the latest updates and special offers.
- **Warranty & RMA Services** — Get warranty, product replacement (RMA), RMA status, and data recovery information.
- **Knowledge Base** — Search by keyword, phrase, or answer ID.
- **Installation** — Get online installation help for your WD product or software.
- **WD Community** — Share your thoughts and connect with other WD users.
- **Online Learning Center** — Start here to get the most out of your personal cloud storage device (http://www.wd.com/setup).

Contacting WD Technical Support

When contacting WD for support have your WD product serial number, system hardware, and system software versions available.

Important User Information

Important Safety Instructions

Recording Your WD Product Information

Important Safety Instructions

This device is designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated into this unit will protect you if you observe the following procedures for installation, use, and servicing.

- Follow all warnings and instructions marked on the product.
- Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- Do not use this product near any liquids.
- Do not place this product on an unstable surface. The product may fall, causing serious damage to the product.
- Do not drop the product.
- Do not block the slots and openings on the top and bottom of the chassis; to ensure proper ventilation and reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered. Making sure the drive is standing upright also helps prevent overheating.
- Operate this product only from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
- If an extension cord is used with this product, make sure that the total ampere rating of the equipment plugged into the extension cord does not exceed the extension cord ampere rating. Also, make sure that the total rating of all products plugged into the wall outlet does not exceed the fuse rating.
- Never push objects of any kind into this product through the chassis slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock.
- Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
  - When the power cord or plug is damaged or frayed.
  - If liquid has been spilled on the product.
  - If the product has been exposed to rain or water.
  - If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions since improper adjustment may result in damage and require extensive work by a qualified technician to the product to normal condition.
  - If the product has been dropped or the chassis has been damaged.
Recording Your WD Product Information

Remember to write down the following WD product information, which is used for setup and technical support. Your WD product information is found on the label on the bottom of the device.

- Serial Number
- Model Number
- Purchase Date
- System and Software Notes
Product Overview

About the System

The WD My Cloud EX4 personal cloud storage system is a high-performance system providing secure wireless access to your media and files from any computer, tablet, or smartphone when connected to a wireless router.

Connect this powerful system to your wireless router for shared storage on your home network and accessing your files from within and outside the home. Share files with your Mac and PC, stream media to your television through your DLNA-enabled devices, and access your files remotely with the WD My Cloud EX4 apps and web site.

This user manual provides step-by-step installation instructions and other important information about your WD product. Translated versions and updates to this user manual can be downloaded from http://products.wd.com/updates. For more information and news about this product, visit our website at http://www.wd.com/.

Features

Ultimate reliability from the trusted name in storage – Built from the ground up with the quality and reliability you’ve come to expect from WD and backed by a two-year warranty, My Cloud EX4 is a high-performance, four-bay NAS for your home or small office. It offers a robust all-metal enclosure, multiple RAID volumes, easy drive installation and a full suite of apps for the power and flexibility to expand your NAS features.

Your options are endless – Choose the diskless enclosure with easy drive install and hot swap to effortlessly add up to four drives and grow as your needs expand. Or, choose a populated system that works right out of the box, featuring WD Red™ hard drives for ultimate compatibility in the unique 24x7 NAS operating environment.

Drive management and data protection at its best – You’re armed with multiple options to secure your data from loss. Choose RAID 0, 1, 5, 10 or select from spanning and JBOD modes for even more options to manage your data.

Easy to manage – A powerful dashboard and LCD display means your system is always under your control. Monitor your drives, manage users and utilize energy-saving features. Email and mobile alerts keep you informed on My Cloud EX4 status.

Award-winning desktop and mobile apps – With WD’s My Cloud mobile and desktop apps, you can upload, access and share your documents from anywhere. Conveniently transfer files from your public cloud service to the EX4 directly from the mobile app.

Powerful apps to customize your NAS – Featuring industry-leading apps, including aMule, Icecast, Joomla!®, phpBB®, phpMyAdmin and SqueezeCenter.

Advanced Serving Options – Integrated file server, FTP server, backup server and P2P download server.
Stream media to your connected devices – Stream videos and photos to connected TVs, media players, gaming consoles and other DLNA®/UPnP® devices. Features a Twonky 7.2 and a DLNA-certified 1.5 media server. And with My Cloud EX4’s iTunes® server, you can easily stream your music collection.

Back up, your way – Protect your data with remote backup to another EX4, integrated cloud backup or local LAN/WAN backup. PC users, WD SmartWare™ Pro offers options for how, when and where you back up your files for up to ten computers. Mac® users, utilize all the features of Apple® Time Machine® backup software to protect your data.

Increase your personal cloud capacity – Simply attach a compatible USB 3.0 hard drive directly to one of the two USB expansion ports on My Cloud EX4 and instantly expand your storage capacity.

Integrated energy-saving features – Save money on your energy bill with disk spin-down and scheduled power on/off.

Your own personal cloud – Unlike public clouds, My Cloud EX4 allows you to keep all your content in one safe place on your home or office network instead of a remote server. No mysterious location of your data. No monthly fees. No limits. Just blazing-fast performance for your high-speed digital life.

Advanced features – iSCSI target, full-featured FTP services, link aggregation and failover support, jumbo frame support, IPv6 ready, UPS support (USB and network), real time resource monitor, volume encryption with boot-up password, SNMP and virtual volumes.

About the Online Learning Center

WD’s Online Learning Center provides the latest information, instructions, and software to help users get the most out of their personal cloud storage. This web-based guide offers step-by-step help with setting up remote access, backing up data, monitoring device status and more. It’s an interactive resource to walk users through installing and using their WD My Cloud EX4 device. The Online Learning Center allows you to:

- Learn about your new personal cloud storage product.
- Download the latest software for your product.
- Find in-depth, interactive information on how to explore each of your product’s features.
- Update your product whenever new features become available.
- Access an always-available resource online, without a manual or CD.
Package Contents

- WD My Cloud EX4 Personal Cloud Storage device
- Ethernet cable
- AC power adapter
- Quick Install Guide

Operating System

**Windows®**
- Windows 8
- Windows 7
- Windows Vista®
- Windows XP (32 bit) SP3 or later

**Mac OS X®**
- Mountain Lion*
- Lion*
- Snow Leopard

For Windows OS, you will need to install Java runtime client

* For Lion and Mountain Lion, you will need to install the Java runtime client. For additional information, visit [http://support.apple.com/kb/dl1421](http://support.apple.com/kb/dl1421)

Note: Compatibility may vary depending on your computer's hardware configuration and operating system.
Web Browsers
- Internet Explorer 8.0 and later on supported Windows computers
- Safari 5.0 and later on supported Mac computers
- Firefox 12 and later on supported Windows and Mac computers
- Google Chrome 14 and later on supported Windows and Mac computers

Local Network
- Router/switch (Gigabit recommended to maximize performance.)

Internet
- Broadband Internet connection is required for initial setup and software downloads, as well as for remote access and mobile apps.

Pre-installation Instructions
Before beginning installation, select a suitable location for your device to obtain maximum efficiency. Place it in a location that is:
- Near a grounded power outlet
- Clean and dust free
- On a stable surface free from vibration
- Well ventilated, with nothing blocking or covering the slots and openings on the top and bottom of the device, and away from sources of heat
- Secluded from electromagnetic fields from electrical devices such as air conditioners, radio and television receivers.

Handling Precautions
WD products are precision instruments and must be handled with care during unpacking and installation. Rough handling, shock, or vibration can damage the device drives. Observe the following precautions when unpacking and installing your external storage product:
- Do not drop or jolt the device.
- Do not move the device while it is powered on.
- Do not use this product as a portable device.
- Do not remove all four data drives at the same time. This will cause your device to become unresponsive.

Getting Started

Physically Connecting the Device

Getting Started Using Online Setup Software
Getting Started Without Online Setup Software
Accessing Content

It’s easy to set up the WD My Cloud EX4 Personal Cloud Storage device -- all you have to do is unpack your device, connect it, and wait for the Power LED on the front of your device to turn a solid Blue. Then, download and run the quick setup software, available at http://www.wd.com/setup.

Note: For information about safely shutting down and disconnecting the device, see “Utilities” on page 131

Physically Connecting the Device

Note: Remove the sticker from the back of the unit prior to connecting your device.
Follow the steps below to connect the WD My Cloud EX4 Personal Cloud Storage device to a home or small office network.

**Important:** To avoid overheating, make sure the device is upright as shown in the illustration above and nothing is blocking or covering the slots and openings on the top and bottom of the device. In the event of overheating, the device will perform a safe shutdown, interrupting all processes currently being performed. If this occurs, data may be lost.

1. Using the provided Ethernet cable, connect one end of the Ethernet cable to the Ethernet port located on the back of the device.

   **Important:** We recommend that you use the enclosed Ethernet cable for best performance.

2. Connect the other end of the Ethernet cable directly into a router or network switch port.
3. Using the provided power adapter, connect one end of the adapter into the power supply socket on the back of the device.
4. Plug the power adapter into a power outlet. The unit powers up automatically.

   **Important:** Wait for the WD My Cloud EX4 device to finish powering up (approximately three minutes) before configuring it. You will know it is ready when the LED stops flashing and turns blue.

5. When the LED on your device turns a solid blue, click **Next** on your computer page.

**LCD**

The LCD on the front of the WD My Cloud EX4 device displays information that make using and maintaining your device easier. This includes:

- Status Messages
- Device name
- IP address
- Current firmware version
- Fan speed
- Drive status
The WD My Cloud EX4 device allows you to scroll through the various informational messages on your device by pressing the scroll buttons:

![WD My Cloud EX4 device](image)

**Alerts**

When an alert occurs, the alert message displays on the LCD screen as well as the Alert icon and window within the WD My Cloud EX4 Dashboard. For information on managing your alerts, see “Managing Alerts” on page 31.

**LEDs**

**Front Panel Power LED**

The following table describes the front panel power LED behavior.

Getting Started Using Online Setup Software

The online setup software walks you through the steps necessary to easily connect your device to your home or small office network. Use the following steps to download and run the online setup software, discover the device and get started using your device. The online setup software is available from WD’s Online Learning Center at http://wd.com/setup/wdmycloudex4.

Downloading and Installing the Online Setup Software

Before plugging in your WD My Cloud EX4 device, use the following steps to download the software necessary to set up your device.

1. Open a web browser. For browser requirements, see “Web Browsers” on page 6.
2. In the address field, type http://wd.com/setup/wdmycloudex4 to display the Welcome to the Learning Center page:

3. Click WD My Cloud EX4 to display the download page:
Note: The Learning Center automatically detects your operating system (OS). If you’d like to download setup software for a different operating system, select your OS from the pull-down menu at the top of the page before selecting the Download Setup Software button.

4. Click the Download Setup Software button. The setup software downloads to your computer.

5. Access your downloaded files, then double-click **Setup.exe** (Windows) or **WD My Cloud EX4 Personal Cloud Storage Setup.dmg** (Mac) to open the setup software. The Getting Started window displays.

6. Click **Get Started**.

7. Read the Western Digital License Agreement that displays, then select the “I accept the terms of the License Agreement” check box and click **Next**.
Connecting the Device to your Network

1. Review the information on the screen, then check your device to ensure that the device name displays on the LCD of your WD My Cloud EX4.

2. When the LED on your WD My Cloud EX4 device is solid blue, click Next. The software discovers your device.

3. Select your WD My Cloud EX4 device and click Next.

4. The software checks your device then begins installing your software. Continue following the instructions outlined in “Creating a Personal Cloud” on page 16.

   Note: If your device is not detected, continue to “Creating a Personal Cloud”.

   ![Connecting the Device to your Network](image-url)
Creating a Personal Cloud

WD My Cloud EX4 web access provides fee-free remote access to your WD My Cloud EX4 personal cloud device. Once you create your account, you can access your device using your mobile devices with Internet access and from the WD My Cloud desktop application.

1. On the Set up your personal cloud screen, ensure that the Also register WD My Cloud EX4 with this information is selected.

2. Optionally, enter your First Name, Last Name, your email address. Click Next. Your name is listed on the screen.

- If you’d like to add additional users, click Add more users and enter your user information, then click the plus sign (+).
- If you’d like to skip the add an account step, click Next. You have the opportunity to create your personal cloud when you create a user account (see “Adding a Single User” on page 36).

   Note: You may see a message saying that it may take a few minutes for your email inbox to receive instructions on accessing the WD My Cloud EX4 device remotely.

3. Check your email to confirm your new account, and then click Next to display the Setup Complete screen.
Note: You may need to check your email spam folder if your spam filter does not allow email from WD.

4. You’ve successfully set up your WD My Cloud EX4 device and can now:
   - Select (default) or clear the Install the WD My Cloud application check box.
   - Select (default) or clear the Place helpful shortcuts on my desktop check box.
   - Select (default) or clear the Recommended: Automatically update My Cloud whenever new firmware becomes available check box.

5. Click Finish to close the setup wizard.
   - If you selected the Install the WD My Cloud application check box:
     - Click Yes if you receive a warning prompt.
     - On the My Cloud screen, select a language from the pull-down menu, then click OK.
     - Review the Western Digital License Agreement, then select I accept the terms of the License Agreement, and click Next.
     - Review the Apple License Agreement, then select I accept the terms of the License Agreement, and click Install. The installation begins.
     - When installation is complete, click Done.

Desktop Icons

If you are using a Windows computer, check the desktop to locate the following icons:

- Opens the My Cloud EX4 Dashboard.
- Displays the contents of the Public Share.
- Opens the My Cloud application.

For Mac computers, check the desktop to locate your desktop icons.
Getting Started Without Online Setup Software

If you do not use the online setup software to get started, you can still:

- Use your WD My Cloud EX4 personal cloud storage device as an external hard drive, dragging and dropping files to and from it.
- Configure the device using the WD My Cloud EX4 device’s dashboard. (See “The Dashboard at a Glance” on page 20.)
- Back up files using USB, Remote, Internal, and Cloud backup (see “Backing Up and Retrieving Files” on page 52).

Accessing Content

The WD My Cloud EX4 device’s Public folder contains Shared Music, Shared Pictures, and Shared Videos subfolders. The existing content of the subfolders are files that you dragged and dropped or files that have been backed up from your computer or an attached USB drive.

Note: This manual uses the term shares and folders interchangeably.

Once you’ve physically connected your WD My Cloud EX4 device (see “Connecting the Device to your Network” on page 15), use the following steps to access the contents of your device.

<table>
<thead>
<tr>
<th>If you're operating systems is...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Windows 8                        | 1. On the Windows 8 Start page, type **Computer**  
  2. Click **Computer**.  
  3. In the left pane, click **Network**.  
  4. Double-click **WDMYCloudEX4** and locate the device’s Public folder.  
  5. Double-click the Public folder to display the Shared Music, Shared Pictures, and Shared Videos subfolders. You can now drag and drop files into (and from) the shared media folders using Windows Explorer. |
| Windows Vista / Windows 7        | 1. Click **Computer > Network > WDMYCLOUDEX4** and, if required, enter your network (router) credentials. The device’s Public and private folders (shares) display.  
  2. Double-click the Public folder to display the Shared Music, Shared Pictures, and Shared Videos subfolders. You can now drag and drop files into (and from) the shared media folders using Windows Explorer. |
Mapping the Public Folder (Windows)

To map the WD My Cloud EX4 public folder for quick access in the future:

1. In Windows Explorer, under Network, click WDMYCLOUDEX4.
2. Right-click the Public folder and select Map Network Drive from the menu.
3. Select the desired letter from the Drive drop-down list.
4. Select the Reconnect at login check box.
5. Click Finish. Your Public drive is now mapped.

Mapping the Public Folder (Mac OS X)

</tbody>
</table>
| A browser or Windows Explorer   | **Using Device Name:**
|                                 | 1. Enter the name of your WD My Cloud EX4 device (default name: wdmycloudex4EX4) in the browser's address field:
|                                 |   - http://<device name> (Windows)
|                                 |   - https://<device name>.local (Mac)
|                                 | 2. Click Go. |
|                                 | **Using IP Address:**
|                                 | 1. Obtain the IP address from the WD My Cloud EX4 LCD screen
|                                 |   - Press the scroll bar to scroll through the LCD screen information and obtain the IP address, as necessary.
|                                 | 2. Enter the IP address of your WD My Cloud EX4 device in the browser's address field: http://<IP Address>
|                                 |   - (Example: http://192.168.1.22)
|                                 | 3. Click Go. |
| Windows 8                       | 1. On the Start page, type Computer
|                                 | 2. Click Computer.
|                                 | 3. In the left pane, click Network.
|                                 | 4. In the right panel, locate your WD My Cloud EX4 device under Storage.
|                                 | 5. Double-click the device, or right-click and select View device webpage from the resulting menu. |
| Windows 7/Vista                 | 1. Click 🗄️ > Computer.
|                                 | 2. In the left panel, select Network
|                                 | 3. In the right panel, locate your WD My Cloud EX4 device under Storage.
|                                 | 4. Double-click the device, or right-click and select View device webpage from the resulting menu. |
Accessing the Dashboard for the First Time

Use the following steps when you initially access the WD My Cloud EX4 Dashboard.

**Note:** When initially log into WD My Cloud EX4, leave the Password field blank.

1. Click **Login**.

2. Select a language from the pull-down menu.

3. Click the **WD End User License Agreement** link, review the agreement, then click the **I agree to the WD End User License Agreement** check box.

4. Click **Continue**.
5. Enter your First Name, Last Name, and Email address to create an admin login for your WD My Cloud EX4 device, then click **Save**.

6. If you’d like to add additional users, enter the User Name, First Name, Last Name, and Email address of the additional users, then click **Save** for all additional users.

7. Click **Next**.

8. Review the information on the screen.
   - Click the **Automatically update device firmware when available** check box.
   - Click the **Register the WD My Cloud EX4 device to receive continuous product support** check box.

8. Click **Finish**. The WD My Cloud EX4 Dashboard displays.
The Dashboard Home Page

The WD My Cloud EX4 Home page has an information bar at the top right, an icon bar across the page, and an instant overview of the status of the device’s main functions and links for updating settings.

Viewing Device Status and Making Updates on the Home Page

The main body of the Home page shows the status of the device and its functions and provides shortcuts to the most necessary tasks.

**Capacity**

The Capacity panel displays the amount of free storage left on your WD My Cloud EX4 device.

1. To see detailed information, click the arrow in the lower right to display the current usage of the drive’s capacity:

2. To return to the Home page, click **Close**.
**Device**

The Device section identifies the overall health of the system, indicates the current version of your firmware and, informs you if firmware updates are available.

**Diagnostics**

The Diagnostics panel displays a snapshot of the system’s components and identifying the overall health of the WD My Cloud EX4 device.

1. To see details about the status of system components, click the arrow on the right side of the panel.

2. To return to the Home page, click Close.

**Firmware**

The Firmware panel displays the current version of firmware loaded on your WD My Cloud EX4 device. A green check mark indicates that your firmware is up-to-date.
1. To view whether an updated version of the firmware is available, click the arrow on the right side of the panel to display firmware availability:

   ![Update Firmware](image)
   ![New firmware available](image)

   - If an update is available, click **Install and Reboot** to update your device.

2. To return to the Home page, click **OK** or **Cancel**.

   Note: If new firmware is available, see “Firmware Update” on page 136 for information on updating your WD My Cloud EX4 device.

**Network Activity**

The Network Activity panel displays the system activities and processes that are running on your WD My Cloud EX4 device. At a glance, you can see the network, CPU, and RAM activity.

1. To view a list of all the system activities and processes that are running on your WD My Cloud EX4 device, click arrow in the lower right of the panel to display:
- **CPU**: Click the right arrow to view the CPU activity. Click **Back** to return to the Device Activity pane. Click **Close** to return to the Home page.

- **Memory**: Click the right arrow to view the Memory activity. Click **Back** to return to the Device Activity pane. Click **Close** to return to the Home page.

- **Network**: Click the right arrow to view the network activity. Click **Back** to return to the Device Activity pane. Click **Close** to return to the Home page.

- **Process**: Click the right arrow to view the process information. This list displays the list of active processes and the amount of CPU and Memory usage for each process. Click **Back** to return to the Device Activity pane. Click **Close** to return to the Home page.
**Cloud Devices**

The Cloud Devices panel displays the number of cloud devices currently accessing the WD My Cloud EX4 device remotely.

1. To add cloud access for a user, click the plus sign (+) in the lower right of the panel to display:

2. To generate an activation code, click the Get Code button.
3. Follow the page instructions to connect your tablet or mobile device to the WD My Cloud EX4 device.

**Users**

The Users panel displays the number of users currently set up to use the WD My Cloud EX4 device.

1. To add a user, click the plus (+) sign in the lower right of the panel:

*Note:* When you enter the email address on the Add User screen, a new account is created for wdmycloud.com. An email is sent to the email address entered with instructions on how to access wdmycloud.com for cloud access.
2. Enter the required information and click **Next**.

3. To assign a password, click the toggle button, enter a password, then confirm your password. Click **Next**.

4. To assign a group to the new user, click the check box next to a group, then click **Next**.

5. Enter the Quota Amount, or leave the values blank for unlimited space, then click **Save**. You’ve added a new user.

**Apps**

The Apps panel displays the apps currently installed on your WD My Cloud EX4 device.
1. To view the installed apps, click the arrow in the lower right of the panel to display:

![Installed Apps]

*Note:* To install an app, see “Managing Apps on the WD My Cloud EX4” on page 83.

2. To return to the Home page, click **Close**.

**Managing Alerts**

Alerts display system messages containing pertinent information about the status of your WD My Cloud EX4 device. There are three types of alerts:

<table>
<thead>
<tr>
<th>Alert Icon</th>
<th>Type of Alert</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔄</td>
<td>Informational</td>
<td>Informational alerts keep you updated on non-vital system information. Example: Reboot Required</td>
</tr>
<tr>
<td>⚠️</td>
<td>Warning</td>
<td>Warnings presents a condition that might cause a problem in the future. Example: Network Disconnected.</td>
</tr>
<tr>
<td>🚨</td>
<td>Critical</td>
<td>This alert is presents an error or problem that has occurred, usually a system failure. Example: Fan Not Working</td>
</tr>
</tbody>
</table>

These alerts appear on the LCD display of your device and on the WD My Cloud EX4 device Dashboard in the upper right side of the screen.
### Viewing Alert Details

1. On the Dashboard, click the Alert icon in the upper right corner.
2. Select the arrow next to the alert you’d like to view from the Alert list or click **View All** to review details for all of your alerts.

3. Review the selected alert, then click **Close**.

### Dismissing an Alert

1. On the Dashboard, click the Alert icon in the upper right corner.
2. Select the delete icon next to the alert you’d like to dismiss.
   - To dismiss all alerts, click **View All**, then click **Dismiss All**.
Obtaining Customer Support

To open the Support page:
1. Click the Help icon on any page to display the Help menu.
2. Click Support to display the following page:

If a problem occurs with the WD My Cloud EX4 device, WD Technical Support will need information about your WD My Cloud EX4 device to troubleshoot and determine the best solution. There are two ways in which you can get your device info and request support:

- Run a system report and send it to WD automatically,
- Create a system report manually and send it to WD.

Requesting Automatic Support

In the Request Automated Customer Support section:
1. Click the Privacy Policy link to review WD’s privacy policy.
2. Click the Attach my device’s diagnostic report and request support check box.
3. Click the Request Support button.

Creating and Saving a System Report

In the Create and Save System Report section:
1. Click Create and Save. This saves the file to your computer.
2. If desired, email the report to WD Technical Support.

Obtaining Other Support

In the Support Resources section are links to additional resources:
- To obtain the most recently updated user manual, click the Product Documentation link.
- To see answers to frequently asked questions and instructions, click the FAQs link.
- To discuss your WD My Cloud EX4 device with other users, click the Forum link.
- To see WD phone numbers and other contact information, click the Contacts link.
Common Tasks

The next few chapters step you through the procedures for configuring and using the WD My Cloud EX4 device. The following table provides shortcuts to instructions for some common tasks.

<table>
<thead>
<tr>
<th>How do I ...</th>
<th>See ...</th>

Managing Users, Groups and Shares

About Users

The Administrator, normally the device owner, is the person in charge of setting up the device. As the WD My Cloud EX4 device owner, you have a special user account (admin) that provides you with administrator privileges. With these privileges, you can set up and configure the device to your specific needs and add other users to your personal cloud. You also have the power to determine exactly what users can access on the device.

As a default, the administrator (admin) user name does not have a password. You can create one at anytime (see “Updating a User Password” on page 41).

Note: Only one individual at a time can use the Administrator logon ID to log into the web browser application. Because of this, ensure that you log out of the WD My Cloud EX4 device web browser application when you’re not using it. This allows other users authorized to use the Administrator logon ID to access the web browser application. See Energy Saver - Web Access Timeout on page 115 to automatically log out of the application after a set amount of time.

The Users screen displays a list of the current users and allows the Administrator to view user details, create new users, create groups, and grant a user access to existing shares.
Viewing Users

1. On the navigation bar, click **Users** to display the Set Up Users screen.

2. To view user details, click a user name on the left pane. The user’s profile and share access information display. A user can have view only, read/write, or no access to a share.

Adding a Single User

The Administrator adds user accounts and sets the parameters of the shares that a user can access. Use the following steps to add a single user account.

1. To add a user, click **+** in the lower left side of the screen.
2. Enter the User Name, First Name, Last Name and Email address (optional) of the user you’d like to add in the applicable fields, then click **Next**.

3. To assign a password, click the toggle button, enter a password, then confirm your password. Click **Next**.

4. To assign a group to the new user, click the check box next to a group, then click **Next**.
5. Enter the Quota Amount, or leave the values blank for unlimited space, then click Save. (See “Quota Rules” on page 43 for information on quotas.) You’re new user account displays on the left pane of the Set Up Users screen.

![Create Multiple Users](image)

Adding Multiple Users

Use the following steps to add multiple user accounts.

1. To add multiple users, click Add Multiple Users in the lower left side of the screen.

   ![Set Up Users](image)

2. Select how you’d like to enter your users into the device, then click Next.
   - **Create Multiple Users**: Allows you to enter users manually. See “Create Multiple Users” on page 39
   - **Import Users**: Allows you to import a list of users into the device. Continue to See “Import Multiple Users” on page 40
Create Multiple Users

1. Enter the following information on the Create Multiple Users screen, then click **Next**:
   - **Username Prefix**: Enter a prefix for your user name. This will be added to the Account Prefix to create the User Name. (Example: HR)
   - **Account Prefix**: Enter a numeric account prefix. This will be added to the Username Prefix to create the User Name (Example: 143)
   - **Number of Users**: Enter the number of User accounts you’d like to create. The maximum number you can add displays to the right of this field.
   - **Password**: Enter a password for the user accounts.
   - **Confirm Password**: Confirm the password for the user accounts.
   - **Overwrite Duplicate Accounts** (optional): Select this check box to overwrite any existing duplicate accounts on your device.

2. To assign a group to the new users, click the check box next to a group, then click **Next**.

3. Enter the Quota Amount, or leave the values blank for unlimited space, then click **Next**.
   (See “Quota Rules” on page 43 for information on quotas.)
4. You’re new user accounts display on screen. Click **Save** to save them to your device.

**Import Multiple Users**

1. Click **Download**. This downloads a .txt file identifying the format you’ll need to set up your user import file.

2. Create and save your import file. Your import file should be formatted as follows:
   - **User import file format**: 
     - #user name/user password/user groups/ shared folder(rw)/ shared folder(ro)/ shared folder(deny)/user quota
   - **Example**: #user/pw/g1:g2/folder1:folder2/folder3:folder4/folder5:folder6/0:0:0

3. Click **Import User List**, then select the import file you created.

4. Click **Next**.

5. Select the applications you’d like the new user accounts to have access to, then click **Next**.

6. Click **Save**. Your new user accounts save to your device.
Editing User Settings

1. On the Set Up Users screen, select the user whose information you’d like to edit. The User Profile and Share Access panels display.
2. Modify the required and optional settings as desired. To update the user’s access to shares, see “Assigning Share Access to Users” on page 42.

Updating a User Password

When viewing details about a user, the Administrator can add or change the user’s password (no password is the default setting). Use the following steps to update a user password:

1. On the Set Up Users screen, select a user from the list on the left.
2. Click the toggle button if no password has been previously created.
3. Click Configure to the right of the toggle button to display the Edit Password screen:
4. Enter the new password in both the Password and Confirm Password fields.
5. Click Save.
Assigning Share Access to Users

Once a user account is created, you can assign access to the various shares on your WD My Cloud EX4 device using the following steps.

1. On the Set Up User screen, select the user for which you’d like to assign a share.

![Set Up Users Screen](image)

**Note:** Only private shares can be edited. Public shares always have read/write access and are therefore grayed out on the screen.

2. In the Share Access area, select the type of access you’d like to assign to the selected user:

   - ![Read/Write Access](image): Select this option to provide the user account with read/write access to the selected share. The user can view and update the share.

   - ![Read Only Access](image): Select this option to provide the user account with read only access to the selected share. The user can view the share but can’t update it.

   - ![Deny Access](image): The User account has no access to this share. The user account is updated with your share access selections.
Assigning a Group to a User

Use the following steps to assign a Group to a user account.
1. On the Set Up Users screen, select the user from the left pane.
2. In the Group Membership field, click Configure.
3. Select the check box next to the Group you’d like the user to join, then click Save.

Quota Rules

Assigning user quotas allows you to better control the disk space allocated to a user or a group. There are various rules dictating which quota takes precedence over another.

- User quota must be ≤ the group quota. (e.g., If your group has a 20GB quota and you try to set the user quota to 30GB quota, you will be prompted to reduce your user quota to be equal to or less than the group quota).
- If the user quota is not set, the group quota will be assigned to the user.
- When a user quota is set prior to joining a group and a group is assigned:
  - If the user quota > group quota, the individual user’s quota will automatically be reduced to the group quota amount.
  - If the user quota is ≤ group quota, the individual user quota will remain unchanged.

Assigning Quotas to a User

Use the following steps to assign a quotas to a user account. A quota determines the amount of disk space allocated to the user on the WD My Cloud EX4 device.
1. On the Set Up Users screen, select the user from the left pane.
2. In the Quotas field, click Configure.
3. Enter the amount of space you’d like to assign to the user on the WD My Cloud EX4 device.
   - To assign unlimited space, leave the Quota Amount field(s) blank.
4. Click **Save**.

### Removing a User

Use the following steps to delete users from the WD My Cloud EX4 device.

*Note:* The Administrator account cannot be deleted.

1. On the Set Up Users screen, select the user you’d like to delete in the left pane.
2. Click the **Remove User** icon.
3. In response to the confirmation message, click **OK**. The user account is removed from the device and no longer displays in the user account list.

### About Groups

A group allows easier management of multiple users. The permissions and privileges you assign to group accounts determine the actions that can be taken by that group.

### Viewing Groups

1. On the navigation bar, click **Users** to display the Set up User screen.
2. Select the Group icon in the upper left part of the screen.
3. To view group details, click a group name on the left pane. The group profile information displays.

Adding a Group

1. To add a group, click + in the lower left side of the Set Up Groups screen.
2. Enter a Group Name.
3. Click the check box next to the user's you’d like to add to your new Group, then click Next.
4. Enter the Quota Amount, or leave the values blank for unlimited space, then click Save. You’re new group account displays on the left pane of the Set Up Groups screen.
Editing Group Settings

1. On the Set Up Groups screen, select the Group whose information you’d like to edit. The Group Profile and Share Access panel displays.
2. Modify the required and optional settings as desired. To update the group’s access to shares, See “Assigning Share Access to Groups” on page 46

Assigning Share Access to Groups

Once a group account is created, you can assign access to the various shares on your WD My Cloud EX4 device using the following steps.

1. On the Set Up Groups screen, select the group for which you’d like to assign a share.

2. In the Share Access area, select the type of access you’d like to assign to the selected user:
   - **Read/Write Access**: Select this option to provide the group account with read/write access to the selected share. The group members can view and update the share.
   - **Read Only Access**: Select this option to provide the group account with read only access to the selected share. The group member can view the share but can’t update it the share.
   - **Deny Access**: The group has no access to this share.

The group is updated with your share access selection once it is selected.
Assigning Quotas to a Group

Use the following steps to assign quotas to a Group. A quota determines the amount of space assigned to the user on the WD My Cloud EX4 device. (See “Quota Rules” on page 43 for information on quotas.)

1. On the Set Up Groups screen, select the group from the left pane.
2. In the Quotas field, click Configure.
3. Enter the amount of space you’d like to assign to the group on the WD My Cloud EX4 device. To assign unlimited space, leave the Quota Amount field(s) blank.
4. Click Save.

Removing a Group

Use the following steps to delete users from the WD My Cloud EX4 device.

1. On the Set Up Group screen, select the user you’d like to delete in the left pane.
2. Click the Remove Group icon.
3. In response to the confirmation message, click OK. The Group account is removed from the device and no longer displays in the Group account list.
About Shares

A share is an area on the WD My Cloud EX4 device for storing files (similar to a folder or directory).

**Note:** In this manual, we use the terms share and folder interchangeably.

A share can be public so that all users can access the contents, or private to limit access to selected users. The Shares icon on the navigation panel displays a list of shares on the WD My Cloud EX4 device and enables the Administrator to manage shares and user access.

**Note:** USB flash drives can be mounted as a share, however, they are not editable.

Viewing a List of Shares

Click the Shares icon on the navigation bar to display a list of shares on the WD My Cloud EX4 device. For each share name, the description, and the media serving and public access status display.

Use the following steps to view a list of shares.

1. On the navigation bar, click Shares to display the About Shares page.
2. Click a share to display its profile and user access information.

Note: Only private shares can be edited. Public shares always have read/write access and are therefore greyed out.

Creating a New Share

You can create a share and designate it as public or private. For example, if the share contains financial information, you may want to make the share private. Or, if there are photos you would like a friend to see, you can make the share public to that friend.

1. Click the Shares icon on the navigation bar to display the About Shares screen.
2. Click the Add a Share icon.

3. Complete the following settings:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volume</td>
<td>Select the volume from the pull-down menu.</td>
</tr>
<tr>
<td>Share Name</td>
<td>Assign a name to the share. (Names must be case sensitive, and contain 1-32 alphanumeric characters but no spaces.)</td>
</tr>
<tr>
<td>Share Description (optional)</td>
<td>Enter a brief description of the share to remind yourself of what it contains. Note that share descriptions must begin with an alphanumeric value and can contain up to 256 characters.</td>
</tr>
</tbody>
</table>
Enable Recycle Bin (optional) The Recycle Bin contains any files deleted from the WD My Cloud EX4 device. If you’d like to use the Recycle Bin, click the toggle button (Default is OFF.)

Note: The Recycle Bin is only available for Windows SMB files.

4. Click Next.

5. Complete the following settings:

   Enable Media Serving (optional) This option allows you to stream media stored in this share to other devices. If you’d like to Enable Media Serving, click the toggle button.

   FTP Access (optional) This allows FTP access on this share. If you’d like to use FTP Access, click the toggle button.

   WebDAV Access (Optional) This allows WebDAV access on this share. If you’d like to use WebDAV Access, click the toggle button.

   Note: FTP access must be enabled before you can provide FTP access for a share. See “Network Services” on page 120 for instructions on how to enable FTP access.

   WebDAV access must be enabled before you can provide FTP access for a share. See “Network Services” on page 120 for instructions on how to enable WebDAV access.

6. Click Next.

7. If you’d like to allow NFS Access, click the toggle button, then click Save. The About Shares window returns, listing the new share and displaying its profile and user access information.
Editing Share Settings

1. On the Set Up Shares screen, select the share you’d like to edit. The Share Profile panel display.
2. Modify the required and optional settings as desired.

Making a Share Private

If you decide to limit access to a public share, use the following steps to convert it to a private share.

Note: Once you make a share private, you must access the share with a user name and password.

1. On the Set Up Shares screen, select the share that you’d like to make private.
2. In the Public field, click the toggle button to turn public access to the share off.
3. In the User Access section, select the level of access for each user. Your Share is updated as you make your selections.

Deleting a Share

WARNING! Deleting a share erases all files and folders on that share.

1. On the Set Up Shares screen, select the share that you’d like to delete.
2. Click the Delete Share icon.
3. In response to the confirmation message, click OK. The selected share is now deleted and removed from the list of shares.
Backing Up and Retrieving Files

About Backups
There are various ways to backup your data on the WD My Cloud EX4 device. These include:

- **USB Backup**—Allows you to backup WD My Cloud EX4 device data to and from your a USB device.
- **Remote Backup**—Allows you to backup WD My Cloud EX4 device data to and from another WD My Cloud EX4 device.
- **Internal Backup**—Allows you to backup data from one storage location to another on your WD My Cloud EX4 device.
- **Cloud Backup**—Allows you to backup WD My Cloud EX4 device data to an external cloud backup service.

Managing a USB Device and USB Backups
When you attach a USB drive to the WD My Cloud EX4 device, you turn it into a network drive. Once connected, the USB drive has the following capabilities:

- When you connect an external USB drive such as a WD Passport, a memory stick, or a camera to the WD My Cloud EX4 device, you can access it with Windows Explorer or Mac Finder.
- The USB drive can serve as a target for backups.
- You now have the option of mapping the drive as a user share drive.
- If a WD external drive has been locked, when it is attached to the WD My Cloud EX4 device, it maintains that security and can be unlocked or relocked using the Dashboard.

Connecting A USB Drive
Connect a USB hard drive to the USB port on the rear of your WD My Cloud EX4 device for additional storage and backup capabilities. The USB drive appears as a share on the WD My Cloud EX4 dashboard. (See“About Shares” on page 48.)

The WD My Cloud EX4 device supports the following formats for externally attached USB drives:

- FAT/FAT32
- NTFS (read and write capability)
- HFS+
- Linux Ext2, Ext3/Ext4
- XFS

**WARNING!** Mounting or ejecting a USB drive while performing an NFS or AFP file transfer will interrupt the file transfer process.
Creating a USB Backup

Use the following steps to backup your data on your WD My Cloud EX4 to or from a USB device.

1. On the navigation bar, click **Backups** to display the Backups screen.

2. Click **USB Backups**, if not already selected.

3. Complete the following fields to create a USB backup job:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Job Name</td>
<td>Enter a Job Name for your backup.</td>
</tr>
</tbody>
</table>
   | Direction      | Indicate the direction of your backup from the pull-down menu. Options include:  
                    - USB to NAS: Backs up the data on your USB device to the WD My Cloud EX4 device.  
                    - NAS to USB: Backs up the data on your WD My Cloud EX4 device to a USB device.  
   | Source Folder  | Click **Browse** and select the folder you’d like to backup from your destination device |
   | Destination Folder | Click **Browse** and select the folder to which you’d like to backup your source device. |

4. Click **Create**. This creates the backup job for the requested backup
5. In the USB Backup Jobs area, click the arrow to begin your backup.

The progress of the backup displays in the USB Backup Jobs area.

Viewing the Details of a USB Backup Job

1. On the USB Backups screen, under USB Backup Jobs, select the job you’d like to modify, then click the Edit Job button.

2. Review the USB Details screen, then click Close to close the screen.
Editing a USB Backup Job
1. On the USB Backups screen, under USB Backup Jobs, select the job you’d like to modify, then click the Edit Job button.

2. In the USB Backup area, make the necessary changes to your job, then click Save.

Deleting a USB Backup Job
1. On the USB Backups screen, under USB Backup Jobs, select the job you’d like to delete.

2. In response to the confirmation message, click OK. The selected USB Backup job is now deleted and removed from the USB Backup Jobs list.

Remote Backups
Backup your WD My Cloud EX4 device to another WD My Cloud EX4 device.

Before you proceed with a remote backup, ensure the following:
- You have a remote WD My Cloud EX4 device to backup this device to. Existing shares and data from this device will be copied to the target device in addition to previously existing data.
- The remote Server setting is turned ON in the remote WD My Cloud EX4 device.
- The backup password for the remote WD My Cloud EX4 device is enabled.
- You have enabled port forwarding in order to see the remote WD My Cloud EX4 device over the internet.

For additional information on remote backups, see Knowledge Base Answer ID 10637.

Creating a Remote Backup
Use the following steps to backup your WD My Cloud EX4 to a remote device.
1. On the navigation bar, click Backups to display the Backups screen.
2. Click **Remote Backup**.

3. Click the **Create Remote Backup** button.

4. Place a check mark in the box next to the share you’d like to backup, then click **Next**.

5. In the Remote IP field, enter the IP address of the remote backup server. (Example 192.168.1.16)

6. In the Password field, enter the password for the remote backup server, then click **Next**.
7. Place a check mark in the box next to the share where you’d like to back up your data, then click **Next**.

![Remote Backup interface]

8. Complete the following fields to create a Remote backup job, then click **Next**:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Job Name</td>
<td>Enter a Job Name for your backup.</td>
</tr>
<tr>
<td>Auto Update</td>
<td>Click the toggle button to enable the Autoupdate feature.</td>
</tr>
<tr>
<td>Backup Now</td>
<td>Click <strong>Yes</strong> to begin your remote backup now. Click <strong>No</strong> to create a remote backup job for future backup.</td>
</tr>
</tbody>
</table>

![Remote Backup Job details]

9. Review the details of your Remote Backup job, then click **Finish**.

![Remote Backup Job summary]
Viewing the Details of a Remote Backup Job

1. On the Remote Backup screen, under Remote Backup Jobs, click the Details button next to the job you’d like to view.

2. Review the Details screen, then click Close to close the screen.

Recovering a Remote Backup

Use the following steps to recover the data you saved on your remote server. This process saves/recover the data you saved on the remote server to your local server.

1. On the Remote Backup screen, under Remote Backup Jobs, click the Recover button next to the job you’d like to view.

2. On the Recover screen, click OK. Your data recovery begins.
Deleting a Remote Backup

1. On the Remote Backup screen, under Remote Backup Jobs, click the Delete button next to the job you’d like to view.

2. In response to the confirmation message, click OK. The selected Remote Backup job is now deleted and removed from the Remote Backup Jobs list.

Internal Backups

Internal backups allow you to make backups of the existing content from one storage location to another on your WD My Cloud EX4 device.

Creating an Internal Backup

Use the following steps to backup your WD My Cloud EX4 internally.

1. On the navigation bar, click Backups to display the Backups screen.
2. Click Internal Backups, if not already selected.

3. Complete the following fields to create a USB backup job:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Job Name</td>
<td>Enter a Job Name for your internal backup.</td>
</tr>
<tr>
<td>Source Folder</td>
<td>Click <strong>Browse</strong> and select the folder you’d like to backup from your source device.</td>
</tr>
<tr>
<td>Destination Folder</td>
<td>Click <strong>Browse</strong> and select the folder to which you’d like to backup your destination device.</td>
</tr>
</tbody>
</table>
5. Click **Create**. Your job displays in the Internal Backup Queue area and will begin backing up at the indicated time.

| Recurring Backup | If you’d like to use the Recurring Backup feature,:
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Click the toggle button to enable the Recurring Backup feature.</td>
</tr>
<tr>
<td>2.</td>
<td>Select the frequency of the backup: Daily, Weekly, Monthly</td>
</tr>
<tr>
<td>3.</td>
<td>Select a time (hour and minutes) from the pull-down menu.</td>
</tr>
<tr>
<td>4.</td>
<td>If you did not enable the Recurring backup field:</td>
</tr>
<tr>
<td></td>
<td>• Click the Date field and select the date you’d like the backup to occur.</td>
</tr>
<tr>
<td></td>
<td>• Select a time (hour and minutes) from the pull-down menu.</td>
</tr>
</tbody>
</table>

| Incremental Backup | Click the check box if you’d like this job to be an incremental backup. |

Initiating an Immediate Internal Backup

- On the Internal Backups screen, under Internal Backup Queue, select the job you’d like to modify, then click the Begin Now button.

The internal backup begins.

Modifying an Internal Backup Job

1. On the Internal Backups screen, under Internal Backup Queue, select the job you’d like to modify, then click the Edit button.

2. In the Internal Backup area, make the necessary changes to your job, then click **Save**.

Viewing Internal Backup Details

1. On the Internal Backups screen, under Internal Backup Queue, select the job you’d like to modify, then click the Details button.

2. Review the details of your Internal Backup job, then click **Close**.
Deleting an Internal Backup Job

1. On the Internal Backups screen, under Internal Backup Queue, select the Delete button.

2. In response to the confirmation message, click OK. The selected Internal Backup job is now deleted and removed from the Internal Backup Jobs list.

Cloud Backups

A cloud backup allows you to create remote backups that are accessible over the internet and through various mobile devices. WD My Cloud EX4 device uses the following cloud services to create remote backups:

- **ElephantDrive**: ElephantDrive is a cloud backup service that provides secure and automatic backups to your files remotely.
- **Amazon S3**: Amazon Simple Storage Service (S3) is an online file storage web service that can be used to store and retrieve any amount of data, at any time, from anywhere on the web.

Enabling ElephantDrive Cloud Backup

ElephantDrive is a cloud backup service that provides secure and automatic backups to your files remotely. Once enabled, ElephantDrive automatically syncs with your device. For additional information about ElephantDrive Cloud Backups, see [http://home.elephantdrive.com/welcome/wdc/](http://home.elephantdrive.com/welcome/wdc/).

Use the following steps to enable a cloud backup using ElephantDrive.

1. On the navigation bar, click Backups to display the Backups screen.
2. Click Cloud Backups, if not already selected.
3. Click **Elephant Drive** at the top of the screen.

4. In the ElephantDrive field, click the toggle button **on** to turn on your ElephantDrive cloud backup.

5. Click **Register**. The Register screen displays.

6. Enter the following information, then click **Register**:
   - **Email address**: Enter the email address you’ll use to receive information from ElephantDrive.
   - **Password**: Enter a password for your new account
   - **Verify Password**: Reenter your password.

7. You’ve now enabled your ElephantDrive cloud backup.

**Backing Up with ElephantDrive**

Once you’ve enabled ElephantDrive, use the following steps to create a cloud backup.

1. On the navigation bar, click **Backups** to display the Backups screen.
2. Click **Cloud Backups**, if not already selected.

![Cloud Backups Image]

3. Click **Elephant Drive** at the top of the screen.

![Elephant Drive Image]

4. In the Access Backups field, click **Login**.
5. Enter the E-mail and Password you used when you registered with ElephantDrive in Step 6 on page 62.

![Login Image]

6. Click **Login**.
7. In the Elephant Drive field, click the **New device backup wizard link**.
8. Follow the steps outlined in the ElephantDrive backup wizard to create your cloud backup.
Enabling an Amazon S3 Cloud Backup

Note: Before creating your Cloud backup, sign-up with for the Amazon S3 service at http://aws.amazon.com/s3.

Once your Amazon S3 account is setup, use the following steps to create a cloud backup.

1. On the navigation bar, click Backups to display the Backups screen.
2. Click Cloud Backups, if not already selected.
3. Click Amazon S3 button at the top of the screen.
4. Click Create.
5. Enter a Job Name for your cloud backup, then click Next.
6. Enter the following information supplied by Amazon S3:
   - **Region**: Select the Region used for your cloud from the pull-down menu.
   - **Access Key**: Enter the Access Key supplied to you by Amazon S3.
**Private Key**: Enter the Private Key supplied to you by Amazon S3.

**Remote Path**: Enter the remote path for your cloud. This is normally your Bucket name.

7. Click **Next**.

8. Enter the following information, then click **Next**:

<table>
<thead>
<tr>
<th>Type</th>
<th>Select one of the following options:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Upload</strong>: Backs up your WD My Cloud EX4 data to your Amazon S3 bucket.</td>
</tr>
<tr>
<td></td>
<td><strong>Download</strong>: Backs up your Amazon S3 bucket to your WD My Cloud EX4 device.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Backup Type</th>
<th>Select the type of backup you’d like to perform from the pull-down menu. Options include:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Overwriting existing file(s)</strong>: Overwrites files in the target folder that have the identical name as your source file.</td>
</tr>
<tr>
<td></td>
<td><strong>Full Backup</strong>: Creates a separate folder containing all of the backup data each time the backup is performed.</td>
</tr>
<tr>
<td></td>
<td><strong>Incremental Backup</strong>: Overwrites files with source files that are newer than the target files.</td>
</tr>
</tbody>
</table>

9. In the Local Path field, enter a path for your backup on your WD My Cloud EX4 server.
   - Click **Browse** to browse to a location for your backup on the device.
     (Example Volume_1/backup)

10. Click the toggle button to activate the Autoupdate feature. This automatically updates your backup based on a schedule you create.
    - If you activate the Autoupdate feature:
      - Select the Autoupdate schedule: Daily, Weekly, or Monthly
      - Select the Autoupdate Time from the pull-down menu (Daily option).
• Select Autoupdate Date and Time from the pull-down menus (Weekly or Monthly option).

11. If you don’t select Autoupdate, in the Backup Now field, indicate whether you want to begin the backup now.
   • Select Yes to begin your backup now.

12. Click Next.

13. Review your settings, then click Finish. Your Amazon S3 Cloud backup is created. The new job displays in the Amazon S3 Queue section of the Amazon S3 Backup page.

   Note: Access your Amazon S3 Cloud backup bucket to view your device backups.
Managing Storage on the WD My Cloud EX4

Storage Types
- RAID Storage
- iSCSI Storage
- Volume Virtualization

There are several ways to manage your storage on the WD My Cloud EX4 device:

- RAID Storage
- iSCSI
- Volume Virtualization

The Storage page within the WD My Cloud EX4 allows you configure the storage within your device and view the status and capacity of the disks within your device. This chapter provides details on managing the storage on your WD My Cloud EX4 device.

RAID Storage

RAID (Redundant Array of Independent Disks) allows you to store the same data in different places on multiple hard drives, providing necessary redundancy, greater performance, and data integrity. There are several different levels of RAID, each one providing a different method of sharing or distributing data among the drives. Your WD My Cloud EX4 server allow you to select from the following storage modes:

<table>
<thead>
<tr>
<th>RAID Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>JBOD</td>
<td>The use of one or more drives not in a RAID configuration but managed as separate logical volumes.</td>
</tr>
<tr>
<td>Spanning</td>
<td>Combination of drives in a linear fashion to create one large logical volume.</td>
</tr>
<tr>
<td>RAID 0</td>
<td>RAID 0 mode provides disk striping across all drives in the RAID drive group. RAID 0 does not provide data redundancy but does provide the best performance of any RAID levels. RAID 0 breaks up data into smaller segments and stripes the data segments across each drive in the drive group.</td>
</tr>
</tbody>
</table>
Viewing the Current RAID Mode

Use the following steps to view the RAID mode currently being used on your device.

1. On the navigation bar, click **Storage** to display the Storage screen.
2. Click **RAID**, if not already selected.

3. In the RAID Profile, the following information displays:
   - Raid Health
   - Auto-Rebuild status
   - Raid Volume

Changing the RAID Mode

Use the following steps to change the current RAID mode on your WD My Cloud EX4 device.

**WARNING!** Changes made to your RAID Mode will delete all of your data and your user settings. See “Saving a Configuration File” on page 132 for information on saving your user settings.

<table>
<thead>
<tr>
<th>RAID Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RAID 1</td>
<td>In RAID 1 mode, the RAID controller duplicates all data from one drive to a second drive in the drive group. RAID 1 provides complete data redundancy but doubles the required data storage capacity.</td>
</tr>
<tr>
<td>RAID 5</td>
<td>RAID 5 mode provides data redundancy, high read rates, and good performance in most environments. It also provides redundancy with the lowest loss of capacity. RAID 5 is best suited if you are performing a lot of small input/output (I/O) transactions simultaneously.</td>
</tr>
<tr>
<td>RAID 10</td>
<td>RAID 10 mode is a combination of RAID 0 and RAID 1. RAID 10 breaks up data into smaller blocks and mirrors the blocks of data to each RAID 1 drive group. The first RAID 1 drive in each drive group then duplicates its data to the second drive. RAID 10 is best used with data storage that needs 100 percent redundancy of mirrored drive groups and that also needs the enhanced I/O performance of RAID 0.</td>
</tr>
</tbody>
</table>
1. On the navigation bar, click Storage to display the Storage screen.
2. Click RAID, if not already selected.
3. Click Change RAID Mode at the bottom of the screen.

4. Review the Warning message, then click **OK**.

5. Select the RAID mode you’d like to use for your WD My Cloud EX4 server.

Options include:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>JBOD</td>
<td>The use of one or more drives not in a RAID configuration but managed as separate logical volumes.</td>
</tr>
<tr>
<td>Spanning</td>
<td>Combination of drives in a linear fashion to create one large logical volume.</td>
</tr>
</tbody>
</table>
### RAID Options

<table>
<thead>
<tr>
<th>RAID Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RAID 0</td>
<td>Data is striped across multiple hard drives, enabling accelerated reading and recording of data by combining the work of two or more drives to increase performance.</td>
</tr>
<tr>
<td>RAID 1</td>
<td>Two instantaneous copies of the data are recorded on separate hard drives so if one of them fails, other(s) continue to read/write data until the faulty hard drive is replaced.</td>
</tr>
<tr>
<td>RAID 5</td>
<td>Offers superior performance and protection by striping data across 3 or more drives and dedicating a quarter of each drive to fault tolerance.</td>
</tr>
<tr>
<td>RAID 10</td>
<td>RAID protocol in which data is written in stripes across primary disks that have been mirrored to the secondary disks.</td>
</tr>
</tbody>
</table>

6. Select the **Switch to <RAID Mode>** check box, then click **Next**.

7. Review the status of your hard drives, then click **Next**.

8. Using the Volume slider, select the amount of space you’d like to dedicate to the selected RAID mode.

- To configure your volume as RAID 5+spare, click **Create Spare Disk**.
If you choose not to use the entire volume for your RAID selection, you can configure the remaining disk space as Spanning by selecting the **Configure the remaining disk space as Spanning** check box.

9. Click **Next**.

10. Select the type of encryption you’d like on the volume.

   **Note:** Encryption is not available for certain regions.

   - Click 🗝️ to encrypt the selected volume.
   - Click 🎖️ to keep the volume unencrypted.

11. Review the summary of your selections, then click **Next**.

12. Review the warning screen, then click **Finish**.

   The requested hard drive changes begin. Do not turn off your WD My Cloud EX4 device while these changes are in progress.

13. When the process is complete, click **Finish** again.
Auto-Rebuilding your RAID

The Auto-Rebuilding option allow you to automatically rebuild the RAID for your WD My Cloud EX4 device in case of drive corruption. Use the following steps to enable the auto-rebuild option.

1. On the navigation bar, click Storage to display the Storage screen.
2. Click RAID, if not already selected.
3. Review the Auto-Rebuild field to determine whether your WD My Cloud EX4 server is currently setup for auto-rebuild.

- If Auto-Rebuild is off, Click the toggle button to enable Auto-Rebuild.

iSCSI Storage

Internet SCSI (iSCSI) is an industry standard developed to enable transmission of iSCSI block storage commands and data over an existing IP network by using the TCP/IP protocol. The encapsulated iSCSI commands and data can be transmitted over a local area network (LAN) or a wide area network (WAN). As with traditional iSCSI, an iSCSI storage solution requires at least one “initiator” residing on the client computer and at least one “target” residing on the storage server.

Once the connection is established between the iSCSI initiator and the iSCSI target, the operating system on the iSCSI initiator sees the storage as a local storage device that can be formatted, read, and written in the usual manner.

Your WD My Cloud EX4 allows you to create and manage iSCSI targets. The iSCSI target provides storage, similar to a local hard disk drive, but is accessed over a network rather than locally. The iSCSI target is protected by the underlying RAID structure of the WD My Cloud EX4 server.

iSCSI Roles

- **Initiator**: A client computer that accesses storage devices using iSCSI commands over an IP network.
- **Target**: A network-attached storage device that provides access to logical disks (which can be created on the WD My Cloud EX4 server).
Creating an iSCSI Target

Use the following steps to create an iSCSI target

1. On the navigation bar, click Storage to display the Storage screen.
2. Click iSCSI, if not already selected.
3. Click the toggle button to enable iSCSI.
4. Click Create iSCSI Target at the bottom of the screen.
5. On the Create iSCSI Target screen, enter the following information:
   - **Alias**: The alias should be a descriptive name for your target.
   - **Created On**: Select the Volume where you’d like the iSCSI target to reside.
• **Size:** The size of your target and the unit of information for that size (e.g. GB, TB)

6. Click **Next**.

   ![Create iSCSI Target]

   - If you’d like to assign security for your target, click **CHAP**.
     - Enter an existing User Name and Password, then confirm the Password.

7. Click **Save**. Your new iSCSI target is created and displays in the iSCSI Target List.

### Enabling / Disabling an iSCSI Target

Use the following steps to enable or disable an iSCSI target.

**Enabling an iSCSI Target**

1. On the Storage page, click **iSCSI**.
2. Under iSCSI Target list, click **Details** next to the target you’d like to enable.
3. Click **Enable**. The selected target is now enabled.

**Disabling an iSCSI Target**

1. On the Storage page, click **iSCSI**.
2. Under iSCSI Target list, click **Details** next to the target you’d like to disable.
3. Click **Disable**. The selected target is now disabled.

### Modifying an iSCSI Target

Use the following steps to modify an iSCSI target.

1. On the Storage page, click **iSCSI**.
2. Under iSCSI Target list, click **Details** next to the target you’d like to modify.
3. Make all of your necessary changes, then click **Save**.
Deleting an iSCSI Target

Use the following steps to delete an iSCSI target.
1. On the Storage page, click **iSCSI**.
2. Under iSCSI Target list, click **Details** next to the target you’d like to delete.
3. Ensure that this is the target you want to delete, then click **Delete**. The selected target is deleted and removed from the iSCSI Target list.

Enabling iSCSI iSNS Client

The Internet Storage Name Service (iSNS) protocol is used for interaction between iSNS servers and iSNS clients. iSNS clients are computers, also known as initiators, that are attempting to discover storage devices, also known as targets, on an Ethernet network. Use the following steps to configure the iSCSI iSNS client.

1. On the navigation bar, click **Storage** to display the Storage screen.
2. Click **iSCSI**, if not already selected.

3. Click the toggle button **OFF** to enable iSCSI.
4. In the iSCSI iSNS Client field, click the toggle button.

5. Click Configure.

6. Enter the iSNS client server address, then click Save.

**Volume Virtualization**

Volume Virtualization simplifies scalability by allowing you to map iSCSI targets on other network storage devices and present them as volumes on your WD My Cloud EX4 device.
Creating a Virtualized Volume

Use the following steps to create a virtualized volume on your device.

1. On the Storage page, click **Volume Virtualization**, if not already selected.
2. Click **Create**.

3. In the Device IP field, enter the IP address of the device where the iSCSI target resides, then click **Next**.

4. Select an iSCSI target from the retrieved list, then click **Next**.
5. To add authentication to the target, click the toggle button, enter a User Name and Password, then click Next.

- Disabled authentication is the default. To keep the default, ensure that the Authentication field is Off, then click Next.

6. Select a LUN (Local Unit Number) from the list, then click Next.

7. Enter a name for the share folder, then click Next.
8. Review the Volume Virtualization summary to ensure that your settings are correct, then click Save. A virtual volume is created.

Connecting a Virtualized Volume to a Target

Use the following steps to connect a virtualized volume on your device.

1. On the Storage page, click Volume Virtualization, if not already selected.
2. Click Details next to the virtual volume you’d like to connect.

3. Click Connect. Once connected to the target, the system automatically formats the LUN, if it hasn’t been done before.
4. Once your virtual volume is formatted, click **Close**.

The state of the volume is changed to Connect.

Your new virtual volume is now available on your WD My Cloud EX4 device.

**Modifying a Virtualized Volume**

Use the following steps to modify a virtualized volume on your device.

1. On the Storage page, click **Volume Virtualization**, if not already selected.
2. Select the virtual volume you’d like to modify, then click **Modify**.
3. Make the necessary changes to the volume, then click **Save**. When the modified settings are saved, the virtual volume is connected again.

**Disk Status**

The Disk Status screen identifies the health of the disk drives as well as the status and information on each drive used in your WD My Cloud EX4 device. The Disk status screen consists of the following areas:

- **Disks Profile**: This area displays the general status of all of the disk drives on your device.
- **System Disks**: This area identifies all of the drive on your device, the status of each drive, and the amount of space on that drive.

![Disk Status Screen](image)

**Viewing Hard Drive Information**

Use the following steps to view status of the disks on your WD My Cloud EX4 device.

1. On the Storage page, click **Disk Status**, if not already selected.
2. Select **Drive <drive #>** next to the disk for which you’d like to view information.
3. Review the hard drive information, then click **Close**. The Hard Drive Information screen displays the following data:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vendor</td>
<td>The vendor from whom the hard drive was obtained.</td>
</tr>
<tr>
<td>Model</td>
<td>The model number of the hard drive selected.</td>
</tr>
<tr>
<td>Serial Number</td>

Managing Apps on the WD My Cloud EX4

About Apps

Apps is short for Applications. Apps are little self-contained programs used to enhance the existing functions of your device or service. The WD My Cloud EX4 device provides various apps that allow you to use your device more productively.

Note: WD recommends that you fully understand the nature of any app before you install it on your device.

Note: Support for each app should be obtained through the individual vendor.

WD My Cloud EX4 comes with various apps installed. There is also a list of available apps for you to choose from on the Add an App screen.

Managing Apps

The Apps screen displays a list of the currently installed apps. From this screen, you can use your installed apps, add new apps, or remove apps you no longer want to use.

Viewing Apps

1. On the navigation bar, click Apps to display the Apps screen.

2. To select an app, click the name of the app in the left pane. The app displays in the right pane.
Adding an App

Use the following steps to add an app to your WD My Cloud EX4 device.

1. On the navigation bar, click **Apps** to display the Apps screen.

2. Click in the lower left side of the screen.

3. On the Add an App screen, place a check next to the app you’d like to add to the device.

4. Review the available apps.
   - For details about the app, click **Details**. Click **Close** to close the Details screen.

5. Place a check next to the app(s) you’d like to add to your device, then click **Install**. The selected apps are added to your device.
Manually Adding an App

If you have an app you’d like to add that is not listed on the Add an App screen, use the following steps to manually add that app to your WD My Cloud EX4 device.

Note: WD recommends that you fully understand the nature of any app before you install it on your device.

1. On the navigation bar, click Apps to display the Apps screen.

2. Click + in the lower left side of the screen.
3. Scroll to the bottom of the Add an App screen, then click the here link.

4. Navigate to the app you’d like to install on your device.
5. Select the app, then click Open.
6. The selected app is added to your device.
Deleting an App

Use the following steps to delete an app from your WD My Cloud EX4 device.

1. On the navigation bar, click Apps to display the Apps screen.

2. From the Apps list in the left pane, select the app that you’d like to delete from the device.
3. Click in the lower left side of the screen.
4. In response to the confirmation message, click OK. The app removed from the device and no longer displays in the user account list.

Updating an App

Use the following steps to update an app that you’ve added to your WD My Cloud EX4 device.

1. On the navigation bar, click Apps to display the Apps screen.
2. If there is an update for one of the apps you’ve added to your device, a link displays in the upper right corner of the Apps screen.
3. Click the **Updates Available** link.

4. Select the app you’d like to update from the list, then click **Update**.
   - If you’d like to view the details of the update, click **Details**.
   - Click **Back** to return to the Update screen.
Accessing Your Cloud Remotely

Enabling Cloud Access for the WD My Cloud EX4 Device
Configuring Cloud Access for a User
Mobilizing Your Files with WD My Cloud EX4 Mobile Apps
About WD My Cloud Mobile App
WD My Cloud Desktop Application

A personal cloud is your content, at home, secure and under your control. Unlike public clouds, a personal cloud allows you to keep all of your content in one safe place on your home network. Share files, stream media, and access your content anywhere, from the web and from mobile devices. No monthly fees. No mysterious location for your data. Keep your videos, music, photos, and files safe at home and always with you.

This chapter explains how to set up the WD My Cloud EX4 device for remote access and describes some of the ways you can take advantage of its many capabilities.

Enabling Cloud Access for the WD My Cloud EX4 Device

Before you can use your WD My Cloud EX4 device remotely, you have to enable it for cloud access. To enable the WD My Cloud device for remote access and to check the status of its remote connection(s), see “Cloud Access” on page 113

Configuring Cloud Access for a User

Once you’ve enabled cloud access on the WD My Cloud EX4 device, use the following steps to assign remote access to your device users.

1. On the navigation bar, click **Cloud Access**.
2. In the left pane, select the user you’d like to configure for cloud access.

To give the user access to the WDMyCloud.com web site:
1. In the WDMyCloud.com Login for <user name> area, click one of the following icons:
   - **Add/ Change Email Address**: Click this button if you have not previously added an email address to the user account or if you need to update/change the user’s email address. And email address is required to receive login information and to obtain cloud access.
     - Enter the user’s email address. This email address will be used to send confirmation information and instructions on how to log into the WDMyCloud.com site for your remote access.
     - Once you’ve entered an email address, click **Save**.
   - **Email WDMyCloud.com information**: If you’ve added an email address to the user account, click this button to send login information and instructions for access to the WDMyCloud.com site to the selected user.

   *Note:* If you have not set up an email address, this icon will be greyed out. Add an email address, then return to this link to send WDMyCloud.com information.

To generate an activation code for a user's mobile device(s):

**Important:** Codes are valid for 48 hours from the time of the request and can be used one time only

1. On the bottom of the screen, click **Get Code**. You’ll need to generate one code for each device you want to activate. A dialog box displays the user’s activation code and its expiration date and time.

   *Note:* Make sure to write down the access codes you generate.

2. Click **OK**. Once you use the code(s), the Configure Access page displays the cloud devices for which the user now has access, along with the activation code used.
Mobilizing Your Files with WD My Cloud EX4 Mobile Apps

WD My Cloud EX4 and WD Photos mobile apps bring your photos and files to your fingertips on your Apple iPhone, iPod touch, iPad, Android tablet, or Android smartphone. Requirements include:

- Western Digital WD My Cloud EX4 personal cloud storage connected to the Internet.
- Your device access code generated by your WD My Cloud EX4 device.
- Android devices—Most smart phones and tablets with OS 2.1 or later
- Apple devices:
  - WD Photos—iPhone, iPod touch, or iPad with OS 3.2 or later
  - WD My Cloud EX4 —iPhone, iPod touch, or iPad with OS 4.x or later

About WD Photos Mobile App

Entertainment is happening all around you. Now you can capture every moment of it and send it to your device for access on any page in your home. Take a photo or video clip on your smartphone or tablet and upload it directly to your WD My Cloud EX4 device when you get home, you have new files waiting for you so you can enjoy them in your entertainment center.

**Important:** WD Photos enables you to view photos in .jpg format only.

Show off your entire photo collection without taking up tons of space on your smartphone. WD Photos is compatible with leading Apple mobile devices and many popular Android devices. Photos are automatically optimized for viewing on your mobile device.

WD Photos lets you view your most recently accessed photos even when you are offline. Display your photos vertically or view them horizontally and turn your mobile device into the ultimate photo album.

*Note:* Thumbnail images are not available for an attached USB device.

With WD Photos, you can:

- Instantly post photos to Facebook.
- Create a slideshow with transitions to create digital art.
- Access previously viewed photos even when you are offline.
- View your photos all at once or filter them by folder or album.
- Search by file name, folder name, or date using the built-in search options.
- Email a photo to a friend.
- Assign a photo to a contact.
- Download a photo from your personal cloud storage to the camera roll on your mobile device.
- Upload photos and videos from the camera roll on your mobile device directly to your personal cloud storage, no matter where you are.

*Note:* WD Photos automatically creates a sub folder with the mobile device name in the Public/Shared Pictures directory on the WD My Cloud EX4 device for uploaded photos. Similarly, the app creates a sub folder with the mobile device name in the Public/Shared Videos directory for uploaded videos.
For more features and instructions for using WD Photos, see its online Guide Me page and Quick Tips, and go to http://wdphotos.wd.com.

Installing WD Photos on Your Mobile Device

**Important:** Make sure the photos you want to view on the mobile device are stored in the Shared Pictures subfolder in the Public share of your WD My Cloud EX4 device. WD Photos lets you view photos in .jpg format only.

To install WD Photos on your mobile device:

1. Download WD Photos from the Online Learning Center, the Apple App Store, or Google Play and install it on your mobile device.
2. Launch WD Photos on your mobile device to display the Welcome page.

3. Tap **Connect Now** to display the WD Photos welcome page. The WD Welcome page contains the following sections:
   - **Found in Network:** If the mobile device is on the same Local Area Network or Wi-Fi Network as the WD My Cloud EX4 device, the activation code is automatically provided behind the scenes and does not need to be entered.
     - In the Found in Network section, tap ☑ to the left of WDMyCloudEX4.
     - Select your user name from the Select User Account list.
     - Enter your user password.
   - **Add Manually:** If the mobile device is not on the same LAN or Wi-Fi network as the WD My Cloud device:
     - In the Add Manually section, tap ☑ to the left of WD Device.
- Enter the activation code generated on the WD My Cloud EX4's dashboard and tap **Activate**.

![Activation Code]

**Note:** You must generate one code for each app you want to activate. Codes are valid for 48 hours from the time of request and can be used one time only. For details on how to generate an activation code, see .

- Enter your user name and password.

4. Tap your WD My Cloud EX4 device to view your album(s), then tap an album to display the photos contained within it.

![Photo Album]

**Note:** If you have problems installing WD Photos, visit [http://websupport.wd.com/rn/wdphotos.asp](http://websupport.wd.com/rn/wdphotos.asp). For more features and instructions, see the app’s online Guide Me page and tips, and go to [http://wdphotos.wd.com](http://wdphotos.wd.com).

**Note:** If you suspect that your WD My Cloud EX4 database has been corrupted, rebuild the content database, see “System Restore” on page 132.

### About WD My Cloud Mobile App

You are always connected to your personal cloud with your WD My Cloud mobile app. Save valuable space on your iOS, Android, Windows, or Blackberry devices with easy photo and video uploads directly to your personal cloud, then securely access and share your memories from anywhere. Have a public cloud account? Conveniently expand your personal cloud with full access to your Dropbox or other cloud accounts. Download the WD My Cloud EX4 mobile app from the Google Play or the Apple iTunes store. With the WD My Cloud EX4 mobile app, you can:

- Open and view the important files stored on your WD My Cloud EX4 device from anywhere without copying them to your mobile device.
• Show off the photos stored on your WD My Cloud EX4 device.
• Connect to other cloud sites such as Dropbox, Google Drive, and Skydrive from your tablet or smartphone.
• Stream and enjoy music and video files stored on your WD My Cloud device.

Note: Video streaming performance is best over your LAN and when your mobile device is connected using Wi-Fi wireless connections. WAN streaming performance may be limited by upload speeds on your home Internet connection.

• Share your presentations on your Apple or Android tablets.
  Your WD My Cloud EX4 device supports most major file types, such as Microsoft Word documents, Microsoft Excel spreadsheets, and PowerPoint presentations.

For more features and instructions, see the Help, Guide Me page, and Quick Tips within the WD Photos application, or go to http://wdmycloud.wd.com.

Note: WD My Cloud brings your data from the WD My Cloud EX4 device to your tablet, handset, or other portable devices using Google Android or Apple iOS. WD My Cloud provides a convenient file list of the WD My Cloud EX4 device contents and then launches your favorite player or viewer for any files you wish to open. For file types your mobile device supports, see the device's manual.

Installing the WD My Cloud Mobile App
1. Download the WD My Cloud mobile app from the Apple App, Google Play, Blackberry World, or Windows Store and install it on your mobile device.
2. Launch the app to display the Welcome page.

   Welcome
   
   My Cloud
   
   Connect Now
   Demo Drive

3. Tap Connect Now.
4. You have the following options for connecting to the WD My Cloud device:
   • From Your Local Network: If the mobile device is connected by Wi-Fi to the same Local Area Network as the WD My Cloud device, the app is automatically activated.
   • From the Web: Tap and sign into your personal cloud using your WDMyCloud.com login account email address and password.
   • Connect Manually: If the mobile device is not on the same LAN or Wi-Fi network as the WD My Cloud device:
- In the Add Manually section, tap ➕ to the left of WD Device.
- Enter the activation code generated on the WD My Cloud’s dashboard and tap **Activate**.
- You must generate one code for each app you want to activate. Codes are valid for 48 hours from the time of request and can be used one time only. See Enter your user name and password.

5. Tap **Done**.
6. Tap your WD My Cloud EX4 device to display its share(s).

7. Tap a share to display its subfolders.

8. Tap a subfolder to display a list of files.
9. Tap a file to display it.

Note: If you have problems installing the WD My Cloud app, visit http://websupport.wd.com/rn/wdmycloud.asp. For more features and instructions, see the app’s online Guide Me page, Help, FAQs, and tips, or go to http://wdmycloud.wd.com. If you suspect that your WD My Cloud database has been corrupted, rebuild the database. See “Cloud Access” on page 74.

**WD My Cloud Desktop Application**

The WD My Cloud desktop application allows you to view and manage the information available on your WD My Cloud EX4 device to which the user is assigned. Using this application, you can:

- View the files to which you have access.
- Assign favorites for quick access to your favorite folders, files and recently accessed information.
- Add and remove device content by dragging and dropping files and folders from your computer.
Installing WD My Cloud Desktop

Windows
1. Open a web browser. For browser requirements, see “Web Browsers” on page 6.
2. In the address field, type http://wd.com/setup/wdmycloudex4 to display the Welcome to the Learning Center page:

3. Click WD My Cloud EX4 to display the download page:

4. In the Software Downloads area, click Go to Downloads.
5. In the WD My Cloud for desktop area, click **Download**. The setup software downloads to your computer.

6. Access your downloaded files, then double-click **wdmycloud.exe** (Windows)

7. Select a language from the pull-down menu, then click **OK**.

8. Read the WD License Agreement, then click **I accept the terms of the License Agreement**.

9. Click **Next**.
10. Read the Apple License Agreement, then click **I accept the terms of the License Agreement**.

11. Click **Install**. Installation begins.

12. Once the installation is complete, click **Done** to close the WD My Cloud installer.

**Mac**

1. Complete Steps 1 - 5 above.

2. Click Downloads and select **WD My Cloud Installer**.
   - If asked to install Java SE6 runtime, click **Install**.
   - If a warning screen displays, click **Open**.

3. Read the Apple Software License Agreement, than click **Agree**.
4. Select a language from the pull-down menu

5. Read the WD Software License Agreement, than click I accept the terms of the License Agreement.

6. Click Install. The installation begins.

7. Once the installation is complete, click Done to close the WD My Cloud installer.

Launching WD My Cloud Desktop

Once you’ve installed the WD My Cloud Desktop application, use the following steps to access your WD My Cloud EX4 media files.

**IF you want to launch from . . .** | **THEN . . .**
---|---
Desktop Icon | Double-click the WD My Cloud Desktop icon to launch the WD My Cloud Desktop application.
Windows 8 | 1. On the Start page, type WD My Cloud
            2. Click WD My Cloud.
Accessing WD My Cloud Desktop

Use the following steps to access the WD My Cloud Desktop application.

1. Select your WD My Cloud EX4 device.

   - If requested, enter your WD My Cloud EX4 device **Name** and **Password**.
   - If your device does not display on the screen, click **Connect to a device manually**.
     - Click **WDMyCloud.com Login** to log in using your email address and password. To setup your WDMyCloud.com login, see “To give the user access to the WDMyCloud.com web site:” on page 89.
     - Click **Activation Code** to log in using the activation code generated by WD My Cloud EX4. To generate an activation code, see “To generate an activation code for a user’s mobile device(s):” on page 89.

   The WD My Cloud Desktop application opens.

2. Review the Getting Started screen, then click **Start**.

---

**IF you want to launch from . . . THEN . . .**

| Windows 7/Vista | 1. Click > All Programs.  
|                 | 2. In the left panel, select **WD My Cloud>WD My Cloud**. |
| Mac OS X        | 1. Click **Finder>Applications**  
|                 | 2. Select **WD My Cloud>WD My Cloud**. |
Playing/Streaming Videos, Photos, & Music

Media Servers

The WD My Cloud EX4 Personal Cloud Storage device is designed to serve as your home’s media server. It enables you to stream photos, music and videos to your DLNA-compatible devices and music to your iTunes-compatible devices.

Both DLNA-compatible and iTunes-compatible devices search for media stored in any public share that has media serving enabled. When the WD My Cloud EX4 device is new, only the Public share defaults to DLNA on. WD SmartWare, Time Machine, and new shares default to DLNA off.

If you do not want DLNA to display specific media files, place them in a private share that is set to disable media sharing. (See “Making a Share Private” on page 51.) Both the DLNA and iTunes servers are pre-set, so you can just transfer your multimedia content to the Public share on your WD My Cloud EX4 device, and you are ready to stream and view content on your home entertainment center, game consoles (for example, Xbox 360 or PlayStation 3), WD TV Live HD media player, DLNA 1.5 Digital Media players, and other PCs on your home network. Visit [http://www.dlna.org](http://www.dlna.org) for further information on DLNA.

Media Server Overview

The WD My Cloud EX4 device uses TwonkyMedia as its DLNA media server. It streams your music, photos and videos to compatible devices in your home. Playing media on a compatible device is easy.

The Media server searches for all the media stored in the Public share on the WD My Cloud EX4 device connected to your home network. The server is pre-set, so you can just transfer your multimedia content to the Public share on your WD My Cloud EX4 device, and you are ready to stream and view content on your home entertainment center, game consoles (for example, Xbox 360 or PlayStation 3), WD TV HD Live media player, or DLNA 1.5 Digital Media Adapters), and other PCs on your home network.

iTunes Overview

You or anyone connected to the WD My Cloud EX4 device can use iTunes to play stored music files. iTunes creates a virtual music library on the device and treats it as an iTunes repository, making it possible to stream music files from the WD My Cloud EX4 device to Windows or Mac computers running iTunes.

iTunes scans any shares that have the Media Serving setting enabled, including the Public share by default.

</table>

**Note:** Some devices may not support playback of all these files. Please refer to your device’s user manual to see which formats are supported.
**Media Types Supported by iTunes**

*Note:* iTunes 10.4 or later only supports music files. See Knowledge Base Answer ID 8412 for additional information on iTunes supported versions.

The iTunes Media Server supports the following file extensions: FLAC, M4A, MP3, MP4A and WAV.

*Note:* Some devices may not support playback of all these files. Please refer to your device’s user manual to see which formats are supported.

**Media Storage**

You can access and store media content on the WD My Cloud EX4 device by means of network shares. Shares, similar to folders or directories, are areas set up to organize media and access them from your network. Shares can be shared with everyone (public) or with selected users on your network (private).

The device comes pre-configured with the Public network share, which contains the following folders for media storage:

- **Shared Music**—Stores music files you want to share with other users
- **Shared Pictures**—Stores image files you want to share with other users
- **Shared Videos**—Stores video files you want to share with other users

*Note:* You will notice that the Public share’s Shared Music and Shared Pictures shares contain mirrored and uploaded subfolders. These folders are needed by Twonky 7.2. You can now upload all media types to the uploaded subfolder from a DLNA client with “upload” capability.

Go to the Twonky configuration site (NAS_IP:9000) to aggregate content from all NAS devices with DLNA capability on your network to the mirrored folder. Uploading and mirroring are best left to expert users, as these features are not supported by WD customer support.

**Enabling/Disabling DLNA and iTunes**

The Media page of the Settings Screen allows you to enable or disable the DLNA and iTunes media servers. Media server utilities for re-scanning the NAS or fully rebuilding the DLNA database are also on the Media page.

**Enabling/Disabling DLNA**

1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.
1. In the DLNA area Media Streaming field, click the toggle button to enable/disable DLNA.

   Note: Media Streaming is ON by default.

2. Click View Media Players. This displays a list of the media players/receivers on your home network.

   Note: If Media Streaming is OFF, this field will not display on your screen.

3. On the Media Streaming Options screen, select which media device you’d like to receive streaming music, video, or photos.

   - On: Select this option to allow DLNA media streaming to the device.
   - Off: Select this option to disable DLNA media streaming to the device.

4. Once your selections are made, click Close.

Viewing DLNA Media Server Information

The DLNA area displays the current version, the number of music, video, and pictures available on your device, and when the last update occurred.

- To view DLNA media server information, on the Settings screen, click Media in the left panel.
Rescanning/Rebuilding the DLNA Database

The WD My Cloud EX4 device automatically rescans and rebuilds the DLNA database, however, if you suspect that your database is corrupted, use the following steps to either rescan or rebuild your DLNA database.

**Important:** Use caution when completing this procedure. Rebuilding the DLNA server database could take a considerable amount of time, depending on the number and size of the files involved.

1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.
2. In the DLNA Database field, click one of the following.
   - **Rescan:** The WD My Cloud EX4 device searches for changes made to your media libraries. Try this option first.
   - **Rebuild:** The WD My Cloud EX4 device rebuilds the DLNA database from scratch.

Enabling/Disabling iTunes

1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.

   ![iTunes settings](image)

   1. In the iTunes area iTunes field, click the toggle button to enable/disable iTunes.

      **Note:** iTunes is ON by default.

   2. In the Folder field, select **Root**, if not previously selected. This field points iTunes to the root directory on your WD My Cloud EX4 device.

      - If you want to specify a directory on your device where iTunes can access your media:
        - Deselect the Root check box.
        - Click **Browse**, then navigate to the folder where iTunes can access your media.
        - Click **Save** at the bottom of the iTunes area.

   3. In the Password field, enter a password to be used when accessing your WD My Cloud EX4 device on iTunes.

      **Note:** Leave the Password field blank if you don’t want to use a password to access your device media in iTunes.
4. If you’d like to change the default MP3 Tag Codepage, select the page from the pull-down menu.
5. In the Auto Refresh field, select the frequency of the media refresh for iTunes from the pull-down menu.
6. Click **Save** to save your settings.

**Refreshing iTunes**

Use the following steps to refresh the iTunes directory. This allows iTunes to pick up any new media.

1. On the Navigation bar, click **Settings** and then click **Media** in the left panel.
2. In the iTunes database field, click **Refresh**.

**Adding Media Content to the Folders**

1. Open **Windows Explorer** or **Mac Finder**.

2. Copy your music files to the Shared Music folder.
3. Follow the same process to place your videos and pictures into their respective Pictures and Video folders.

   **Note:** You can also access your media files using WD My Cloud Desktop application (see “WD My Cloud Desktop Application” on page 95).
Accessing Your Personal Cloud Using Media Players

Now that you have copied your files to one of the Shared folders, you can use a variety of media players to stream media. The following types are supported:

- WD TV Live/Live Plus HD Media Players
- Windows Media Player 11 (comes with Windows Vista)
- Windows Media Player 12 (comes with Windows 7 and Windows 8)
- XBox 360
- PlayStation 3
- Other media players:
  - BluRay Players
  - Network Connected TVs
  - Digital Picture Frames
  - Network Music Player
- DLNA Devices

*Note:* For specific information on using and updating the media player, go to the appropriate support site.

WD Media Players

You can connect the various WD Media Players to your home network for access to media content stored in a network drive such as the WD My Cloud device. For details on using a WD Media Player to access files on your WD My Cloud device, see Knowledge Base Answer ID 2676 or refer to your WD Media Player User Guide.

Other Media Players

Following are general steps for setting up devices such as digital picture frames, Blu Ray players, network connected TVs, and digital media adapters:

1. Make sure that your WD My Cloud EX4 device is connected to your home’s local network and is powered on.
2. Follow the user instructions provided with your media player to proceed through any initial setup or installation of drivers.
3. Using the navigation feature on your player, scan and detect your WD My Cloud device on your network.
4. Depending on the player you have, you may need to access a Settings/Network Setup page in the user interface to establish connection so that your player can link to your WD My Cloud device. Please refer to your player’s user guide for specific instructions.
DLNA Devices

See specific DLNA media device user manuals for instructions on connecting a DLNA device to your local area network so you can access content on the WD My Cloud device. Go to http://www.dlna.org for a list of DLNA-certified devices and for further information.

Media Server

The Media server streams your music, photos and videos to compatible devices in your home. Playing media on a compatible device is easy. The Media server searches for all the media stored in the Public share on the WD My Cloud EX4 device connected to your home network. The server is pre-set, so you can just transfer your multimedia content to the Public share on your WD My Cloud EX4 device, and you are ready to stream and view content on your home entertainment center, game consoles (for example, Xbox 360 or PlayStation 3), WD TV HD Live media player, or DLNA 1.5 Digital Media Adapters), and other PCs on your home network.

Accessing Your Personal Cloud Using iTunes

You or anyone connected to the WD My Cloud EX4 device can use iTunes to play stored music files. This service creates a virtual music library on the device and treats it as an iTunes repository, making it possible to stream music files from the WD My Cloud EX4 device to Windows or Mac computers running iTunes. For a list of supported media types, see “Media Types Supported” on page 102.

Note: iTunes 10.4 or later only supports music files. See Knowledge Base Answer ID 8412 for additional information on iTunes supported versions.

Note: iTunes scans any shares that have the Media Serving setting enabled, including the Public share by default.

See Knowledge Base Answer ID for additional information on iTunes Server supported media types.

You can drag and drop media files into the corresponding folders in the Public share (e.g., music files into the WDMyCloudEX4/Public/Shared Music default share).

Streaming Media in iTunes

iTunes is enabled by default in the dashboard. See “Enabling/Disabling iTunes” on page 105 for more information on configuring iTunes.

1. Launch iTunes on your computer.
2. Click WDMyCloudEX4 under the Shared section of the left pane. If you have copied music to the /Public/Shared Music folder or a video to/Public/Shared Videos, and it is in a format supported by iTunes, it should be listed in the right pane.

3. Double-click a media file you’d like to play.
Configuring Settings

The Settings option on the navigation bar allows the Administrator to view and customize the WD My Cloud EX4 device's system, network, media, utilities, notifications, and firmware settings. This chapter explains how to configure the various settings for your WD My Cloud EX4 device.

**General**

On the General page you can:

- View and modify the device name and description,
- Select the language in which the web pages should display,
- Set the date, time, and time zone for the device,
- Enable cloud access for your device,
- Set energy saving options,
- Enable and configure Time Machine backups for your Mac,
- Enable various services for your device.

---

**WARNING!** Renaming the WD My Cloud EX4 device forces all the network computers to remap their shared network resources. Change the device name only when necessary.

---

Use the following steps to configure the options available on the General screen.
Accessing the General Screen

- On the Navigation bar, click **Settings**. The General page displays.

![General Settings Screen](image)

Device Profile

1. In the Device Profile section of the General page, view or modify the following settings:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Device Name</td>
<td>Enter a unique name for your device to identify it on the network. The device name can be up to 15 characters long and can not include special characters (e.g., @, #, $ etc.).</td>
</tr>
<tr>
<td>Device Description</td>
<td>The default description is WD My Cloud EX4. If desired, enter a different description for your device. The device description can be up to 32 characters long and can not include special characters (e.g., @, #, $ etc.).</td>
</tr>
<tr>
<td>Serial Number</td>
<td>Displays the WD-assigned number that identifies the specific unit. This field can not be updated.</td>
</tr>
</tbody>
</table>

2. If you made any changes, click **Save** (appears next to the updated field once a change is made).

*Note:* Throughout the WD My Cloud EX4 dashboard, the **Save** and **Cancel** buttons display only if you make changes.
Language and Clock

In this section of the General page, you can change the language that displays in the WD My Cloud EX4 device’s interface and set the date and time. The date and time are synchronized to the NTP (Network Time Protocol) server by default. You have the option of setting the date and time manually or allowing the NTP to access the Internet and automatically set the time. If you are not connected to the Internet, you must enter the date and time manually.

1. In the Language & Clock section, view or modify the following settings:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Language</td>
<td>From the drop-down list, select the language you’d like to display on your WD My Cloud EX4 Personal Cloud Storage web pages. The default language is English.</td>
</tr>
<tr>
<td>Time Zone</td>
<td>From the drop-down list, select the time zone where your device is located.</td>
</tr>
<tr>
<td>NTP Service</td>
<td>Enable or disable NTP service, which automatically synchronizes your device to update the time and date. A dialog box displays current NTP servers. You can add another NTP server if you choose.</td>
</tr>
<tr>
<td>Primary Server</td>
<td>Change the primary server used for your NTP service.</td>
</tr>
<tr>
<td></td>
<td>• To change the primary server used for your NTP service, click Configure.</td>
</tr>
<tr>
<td></td>
<td>• Click Add User NTP then enter the URL address of the new primary server.</td>
</tr>
<tr>
<td></td>
<td>• Click Save.</td>
</tr>
<tr>
<td>Date &amp; Time</td>
<td>Displays the device date and time. This information is synchronized to the NTP (network time protocol) server by default.</td>
</tr>
</tbody>
</table>

2. Click **Save** for each change you make.
Cloud Access

Use the following steps to turn cloud access on or off for all users (i.e., control whether computers and mobile devices can access the content on the WD My Cloud EX4 device).

1. Scroll down to the Cloud Access area of the General Screen.
2. In the Cloud Service field, click the toggle button to turn on Cloud Services. The Connection Status changes to Connected (Relay connection established).
3. Click Configure to change the type of connection you use for your cloud access.

On the Cloud Access Connection Options screen, there are three access options:

- **Auto**: Auto uses uPnP to attempt to open ports on your router. If successful, a direct connection is established between your device and your applications.
- **Manual**: Establishes a connection through the two selected ports. If either port is unavailable, a relay connection is established. A Manual router configuration is required for this option. See Knowledge Base Answer ID 8526 for information on how to set up your router for manual setup.
- **Win XP**: Establishes a connection through ports 80 and 443. If these ports are unavailable, a relay connection is established. This option is required if you’re using Windows XP.

**Note:** By default, the WD My Cloud EX4 device automatically establishes an automatic direct connection between your mobile devices and router.

**Note:** This turns on cloud access for the entire device. To turn on access for an individual user, see “Configuring Cloud Access for a User” on page 88.
4. Select a connection type:
   - **Auto**: Click **Auto**.
   - **Manual**: Click **Manual**, then enter the External Port 1 (HTTP) and External Port 2 (HTTPS) numbers.
   - **Win XP**: Click **Win XP**.
5. Click **Save**.
6. In the Dashboard Cloud Access field, click the toggle button to turn on access to the Dashboard from the cloud remotely.

   **Note**: Selecting this option allows you to perform administrator functions remotely.
7. Review the information on the screen, then enter and reenter a password for your administrator account.

   - If your administrator account already has a password associated with it, review the Dashboard Cloud Access screen, then click **OK**.

   **Note**: If you set your Cloud Setting to Manual, you will have to access your device remotely using the ports you selected during the manual cloud setup. Example: If you setup your manual HTTP port as 5040, you’d use the following address to access your device: http://<Device IP Address>:5040.
Energy Saver

The Energy Saver fields allow you to reduce the energy required to run your WD My Cloud EX4 device. Use the following information to configure the energy saving options on your WD My Cloud EX4 device.

1. View or change the following settings:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drive Sleep</td>
<td>Enabling this function allows the hard drives to go into standby mode to save power after a designated period of inactivity. Drive Sleep is enabled to sleep after approximately 10 minutes by default.</td>
</tr>
<tr>
<td></td>
<td>• To enable/disable Drive Sleep, click the toggle button.</td>
</tr>
<tr>
<td>LED</td>
<td>Enabling this function allows the device LEDs to go into standby mode to save power. LED is enabled by default.</td>
</tr>
<tr>
<td></td>
<td>• To enable/disable LED, click the toggle button.</td>
</tr>
<tr>
<td>LCD</td>
<td>Enabling this function allows the device LCD to go into standby mode to save power after a designated period of time. LCD is enabled to go into standby mode after 10 minutes by default.</td>
</tr>
<tr>
<td></td>
<td>• To enable/disable LCD, click the toggle button.</td>
</tr>
<tr>
<td>Power Recovery</td>
<td>Automatically restarts your device from a previously unexpected shutdown due to power failure. Power Recovery is enabled by default.</td>
</tr>
<tr>
<td></td>
<td>Note: If you disable this feature, your device will not automatically power on after an unexpected shutdown.</td>
</tr>
<tr>
<td></td>
<td>• To enable/disable Power Recovery, click the toggle button.</td>
</tr>
<tr>
<td>Power Schedule</td>
<td>The Power Schedule allows you to schedule shutdowns for your WD My Cloud EX4 device.</td>
</tr>
<tr>
<td></td>
<td>1. To enable/disable Power Schedule, click the toggle button.</td>
</tr>
<tr>
<td></td>
<td>2. Click Configure.</td>
</tr>
<tr>
<td></td>
<td>3. Use the slider bar to configure the start and stop times for your device.</td>
</tr>
<tr>
<td></td>
<td>• Click to shut down the device for 24-hours.</td>
</tr>
<tr>
<td></td>
<td>4. Click Save.</td>
</tr>
<tr>
<td></td>
<td>Note: You can use WD Quick View to wake up the system.</td>
</tr>
</tbody>
</table>

Note:

Web Access Timeout
Mac Backups

This section of the General screen enables or disables Time Machine backups of Mac computers.

**Important:** You must set a password for your Administrator account in order to restore your Time Machine backups.

**To configure backup settings:**

1. In the Mac Backups area, click the toggle button to enable Time Machine backups if not previously enabled.
2. Click the **Configure** link to display the Time Machine Settings dialog.
3. From the **Select a Share** drop-down list, select a share you’d like to use to backup your Mac data.
4. Click **Save**.

**Important:** Once your Time Machine begins to back up your files to a selected share, we recommend that you continue to back up to that share. Switching shares generates a new backup file which will not contain your previously saved information.
Services
This section of the General screen enables or disables various services available on your WD My Cloud EX4 device.

Distributed File System:
Enabling this function allows you to improve data availability. Distributed File System is disabled by default.

1. To enable/disable Distributed File System, click the toggle button.
2. Click Configure.
3. In the Root Folder field, enter the name for your Root Folder, then click Config Link.

4. Enter the following information:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local Share Name</td>
<td>Enter the name of the local share where you’d like to store your information.</td>
</tr>
<tr>
<td>Host IP</td>
<td>Enter the IP address of the local NAS where you’d like to store your information.</td>
</tr>
<tr>
<td>Remote Share Folder</td>
<td>Enter the name of the remote folder where you’d like to store your information or select the folder from the Select a Folder pull-down list at the right of the field.</td>
</tr>
</tbody>
</table>
5. Click **Get Remote Share Folder** to connect to your remote folder.
6. Click **Save**.

---

**Active Directory**

Enabling this function allows your WD My Cloud EX4 device to join an existing Windows domain. Active Directory is disabled by default.

1. To enable/disable Active Directory, click the toggle button.
2. Click **Configure**.
3. Review the information on the screen, then click **Enable**.

4. Enter the following information:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Name</td>
<td>Enter the Active Directory server account name.</td>
</tr>
<tr>
<td>Password</td>
<td>Enter the Active Directory server password.</td>
</tr>
</tbody>
</table>
5. Click **Save**.

**Recycle Bin**

The Recycle Bin contains any files deleted from the WD My Cloud EX4 device. To clear the recycle bin for your device, click **Clear**.

*Note:* Recycle Bin is only available for SMB protocols.

**Network**

The **Network** screen displays the device’s MAC and IP addresses and allows you to set network options such as FTP access, remote servers, and workgroups.
Network Profile

The Network Profile section of the Network screen displays network information for the WD My Cloud EX4 device.

The Network Profile section displays the following information:

| MAC Address | The Media Access Control (MAC) address for this device. |
| IPv4 IP Address | The IP version 4 address for this device. |
| IPv6 IP Address | The IP version 6 address for this device. |

Network Services

The Network Services section of the Network screen allows you to enable or disable the services available on your WD My Cloud EX4 device.
1. Review or update the following:

**IPv4 Network Mode**

By default, the network mode is set to DHCP, which means the WD My Cloud EX4 device automatically gets the IP address and other settings from your network. Select the method of assigning the device’s unique IPv4 address:

- **Static**: Static IP lets you set an IP address manually. You will be prompted for IP Address, Subnet mask, Gateway IP address, and DNS Server. (If you don’t know this information, please check your router settings.)
- **DHCP**: DHCP Client causes the WD My Cloud EX4 device to obtain an IP address and associated settings automatically from the local DHCP server.

*Note:* When configuring Static or DHCP, record your Subnet mask, Gateway IP address, and DNS Server in a safe location for future reference. This information will not be displayed once it is entered into the WD My Cloud EX4 server.

**IPv6 Network Mode**

The IPv6 format is a new IP standard that specifies the formats of packets and the addressing scheme across multiple IP networks. By default, this option is set to Off. Select the method of assigning the device’s IPv6 address:

- Auto
- DHCP
- Static
- Off

Once selected, complete the following fields on the associated screen, then click **Save**:

- IP Address
- Prefix Length
- Default Gateway
- DNS Server

*Note:* When configuring the Static or DHCP, record your Subnet mask, Gateway IP address, and DNS Server in a safe location for future reference. This information will not be displayed once it is entered into the WD My Cloud EX4 server.

**Link Aggregation**

This is also called Bonding and refers to the use of two LAN cards, present in your NAS, and two cables connected to your router simultaneously. This improves performance and reliability.

- Select the type of link aggregation you’d like to use for your device from the pull-down menu.

**Link Speed**

Select the link speed for your network from the pull-down menu, then click **Save**. Options Include:

- Auto
- 100
- 1000

**Jumbo Frames**

Jumbo frames are large IP frames used to increase performance over supported networks. Select the Jumbo Frame for your network from the pull-down menu, then click **Save**.

*Note:* All devices on your network (e.g., router, computer) must support and be configured for this option in order to maximize performance.
### SMB2

Server Message Block, version 2. Select this option to support Windows File History in Windows 8.
- To enable/disable SMB2, click the toggle button.

*Note:* If you enable SMB2, read/write performance will be impacted.

### FTP Access

File Transfer Protocol enables the transfer of data from one computer to another through a network. FTP is disabled by default.
1. To enable/disable FTP Access, click the toggle button.
2. Click **Configure**.
3. On the FTP Settings screen, enter the following information:
   - **Maximum Users:** Select the maximum number of users you’d like to have FTP access from the pull-down menu.
   - **Idle Time:** Enter the amount of time, in minutes, you’d like the FTP to be idle before it times out.
   - **Port:** Enter the port to be used for FTP access.
   - **Flow Control:** Select either **Unlimited** or **Customize**. If you select Customize, enter a Flow Control value.
4. Click **Next**.
5. In the Passive Mode field, select either **Default** or **Customize**. If you select Customize, enter Passive Mode values.
6. Select the check box if you’d like to report external IP in PASV mode, then click **Next**.
7. Enter the following information:
   - **Client Language:** Select the client language from the pull-down menu.
   - **SSL/TLS:** Select this check box if you’d like to allow only SSL/TLS connections.
   - **FXP:** To enable FXP, click the toggle button.
8. Click **Next**.
9. Enter all IP address that you’d like to block from FTP access, then select either Permanent or Temporary from the pull-down menu. Click **Save** to save your entries.
10. Click **Finish**.

### AFP Service

Apple File Protocol. AFP Service is automatically enabled if you are set up for Time Machine backups.
- To enable/disable AFP Service, click the toggle button.

**WARNING!** Mounting or ejecting a USB drive while performing an NFS or AFP file transfer will interrupt the file transfer process.

### NFS Service

Network File System. Select this option to enable NFS Service for your network.
- To enable/disable NFS Service, click the toggle button.

**WARNING!** Mounting or ejecting a USB drive while performing an NFS or AFP file transfer will interrupt the file transfer process.
**WebDAV Service**

Web Distributed Authoring and Versioning (WebDAV). Select this option to enable WebDAV service for your network.

- To enable/disable WebDAV Service, click the toggle button.

*Note:* In order to connect to the WebDAV service, use the following IP address: `http://<server ip address>:8080/Public`

---

**LLTD**

Link Layer Topology Discovery protocol. Select this option to enable LLTD on your network for enhanced network discovery and diagnostics on Microsoft Windows machines.

- To enable/disable LLTD, click the toggle button.

---

**SNMP**

Simple Network Management Protocol. Select this option to manage devices over IP networks.

- To enable/disable SNMP, click the toggle button.

*Note:* See the WD Tech Support Downloads page at `http://support.wd.com` to download the MIB configuration file.

---

**SSH**

Secured Shell protocol. Select this option to securely access your personal cloud and perform command-line operations via the Secured Shell (SSH) protocol. SSH is disabled by default.

- To enable/disable SSH, click the toggle button.

**WARNING!** Please note that modifying or attempting to modify this device outside the normal operation of the product voids your WD warranty.

*Note:* The SSH login User Name is `sshd`.

---

**Dynamic DNS**

Select this option to host a server (Web, FTP, Game server, etc.) using a domain name.

1. To enable/disable Dynamic DNS, click the toggle button.
2. Click **Configure**.
3. On the DDNS Settings screen, enter the following information:
   - **Server Address**: Select a server address from the pull-down menu.
   - **Host Name**: Enter a Host Name for the server.
   - **User Name or Key**: Enter a User Name or Key for the server.
   - **Password or Key**: Enter a password or key for the server.
   - **Verify Password or Key**: Re-enter the password or key for the server.
4. Click **Save**.

---

**Network Workgroup (Windows)**

The Network Workgroup section of the Network screen allows you to enable or disable the workgroup options available on your WD My Cloud EX4 device.
**Workgroup**

The Workgroups feature allows devices in the same workgroup to access one another. This option is only available for Windows operating systems. Each time you add a device to your network, assign it the same workgroup name to enable access.

1. In the Workgroup file, enter the name of the workgroup for your network.
2. Click **Save**.

**Local Master Browser**

The Local Master Browser feature allows you to collect and record resource and/or service information across multiple locations.

- To enable/disable the Local Master Browser, click the toggle button.

**Remote Server**

The Remote Server section of the Network screen allows you to enable your WD My Cloud EX4 device to act as a remote server, allowing you to backup shares from another EX4 on the local LAN or WAN.

- **Note:** Ensure that you’ve added port forwarding rules for both SSH and Remote Backup services (“Port Forwarding” on page 124) to see your WD My Cloud EX4 device over the internet.

1. To enable/disable Remote server, click the toggle button.
2. Click **Configure**.
3. In the Password field, enter a password to be used to access remote backups for this device to a remote server.
4. Click **Save**
5. Review the SSH information, then click the I accept check box.
6. Create a password for SSH login, then click **OK**.

**Port Forwarding**

The Port Forwarding section of the Network screen allows you to manage your connections to particular services by assigning default or custom port numbers.

For additional information on Port Forwarding, see Knowledge Base Answer ID 10649.
Adding Port Forwarding Services
1. To Add to add port forwarding service(s) to your WD My Cloud EX4 device.
2. On the Port Forwarding Settings screen, click either Select the default service scan or the Customize a port forwarding service, then click Next.
   - If you selected Select the default service scan: Select the default service scan you’d like to use for port forwarding, then click Save.
   - If you selected Customize a port forwarding service, complete the following fields:
     - Service: Enter a service for your port forwarding.
     - Protocol: Select a protocol from the pull-down menu.
     - External Port: Enter an external port number for your port forwarding.
     - Internal Port: Enter the internal port number for your port forwarding
     - Click Finish.

Modifying Port Forwarding Services
1. Click Details next to the port forwarding service you’d like to modify
2. Make all necessary changes, then click Finish.

Deleting Port Forwarding Services
1. Click Details next to the port forwarding service you’d like to delete.
2. Click Delete. Your Port Forwarding service is deleted and removed from Port Forwarding list.

ISO Mounting

Mounting an ISO file located on your network shares provides file-level access to the file and folder content of the ISO file to users with access to the network share.
Creating an ISO Image

An ISO image is a file that is an exact copy of an existing file system. Use the following steps to create an ISO image.

1. On the Navigation bar, click Settings, then click ISO Mount.
2. Click Create ISO Image.
3. In the Image Size field, select the image size you’d like to use for your ISO image.
4. In the Image Path field, enter the path for the data you’d like to image or click Browse, select the folder you’d like to image, then click OK.
5. In the Image Name field, enter a name for your ISO image.
6. Click Next.
7. In the Select field, click Overwrite or Skip.
   - Overwrite: When overwrite is selected, files with the same name will be overwritten.
   - Skip: When skip is selected, files with the same name will not be skipped.
8. Select the folders and files you’d like to add to your image file in the left column, then click Add>>.
9. Select the folders and files that you’d like to remove from the ISO image, then click <<Remove.
10. Click **Next**. Your ISO image is created.

11. Click **Finish**.

Creating an ISO Share

Use the following steps to create an ISO share.

1. On the Navigation bar, click **Settings**, then click **ISO Mount**.
2. Click **Create ISO Share**.
3. Browse to the ISO file you’d like to include in your ISO share and place a check next to the file.
4. Click **Next**.
5. Enter a description for your ISO share, then click **Next**.

6. Complete the following fields:
   - **Enable Media Serving**: To enable Media server for the ISO Share, click the toggle button.
   - **FTP Access**: To enable FTP Access for the ISO Share, click the toggle button.
   - **WebDAV Access**: To enable WebDAV Access for the ISO Share, click the toggle button.

   *Note:* If FTP Access or WebDAV access are disabled for the device, the FTP Access and WebDAV Access fields will be grayed out.

7. Click **Next**.

8. Click the toggle button to enable NFS Access for the ISO Share.

   *Note:* If NFS Access is disabled for the device, the NFS Access fields will be grayed out.

9. Click **Save**. Your ISO Share is created.

**Viewing the Details of an ISO Share**

Use the following steps to modify an ISO share.

1. On the ISO Mount screen, select **Details** next to the ISO Share that you’d like to view.
2. Review the ISO Share details, then click **Close**.

![Image1's Detail](image1's Detail)

**Modifying an ISO Share**

Use the following steps to modify an ISO share.

1. On the ISO Mount screen, select **X** next to the ISO Share that you’d like to modify.
2. Make any necessary changes, then click **Save**.

**Delete an ISO Share**

Use the following steps to delete an ISO share.

1. On the ISO Mount screen, select **X** next to the ISO Share that you’d like to delete.
2. Review the confirmation message, then click **OK**. The ISO Share is deleted and removed from the ISO Share List.
Media

On the Media screen, you can enter DLNA (Digital Living Network Alliance) media server and iTunes media player settings so that you can enjoy media in every room in your house.

1. On the Navigation bar, click **Settings**, then click **Media** in the left panel.

   *Note:* DLNA and iTunes only works on your local network.

2. For instructions on entering media settings on this page and then displaying or streaming media, see “Playing/Streaming Videos, Photos, & Music” on page 101.
Utilities

On the Utilities page, you can test the WD My Cloud EX4 device and get diagnostic information, restore the device to factory defaults, reboot or shut down the device, and import or export a configuration file.

To access the Utilities screen, click Settings, then click Utilities in the left pane.

System Diagnostics

Run diagnostic tests if you are having problems with your device. There are three types of diagnostic tests.

- **Quick Test**: The quick test checks the hard drives for major performance problems. The result of a quick test is a pass or fail evaluation of the hard drive's condition. The quick test can take several minutes to complete.

- **Full Test**: The full test is a more comprehensive drive diagnostic. It methodically tests each and every sector of the hard drives. You will be informed of the condition of the hard drive once the test is performed. The full test may take hours to complete, depending on the size and data configuration of the hard drives.

- **System Test**: The system test reviews the health of your device hardware (hard drives, fan, system clock, and device temperature.)

Running a Diagnostic Test

1. On the Utilities page, click Quick Test, Full Test, or System Test. A progress bar displays, indicating test progress and whether the device passed or failed the test.

2. Review the test results, then click Close.

   - If the device fails the test, click ?, then click Support to get assistance.
System Restore

The system restore allows the Administrator to perform a full factory restore on the WD My Cloud EX4 device. This option restores your device to factory default settings with no data loss.

**Important:** Before doing a factory restore or a system update, you may choose to save your device’s current configuration. At a later time, you can import a previously saved configuration. Keep in mind that importing a configuration after restoring factory defaults does not restore shares or users. See “System Configuration” on page 132 to create or restore a configuration file.

**Note:** To erase all of the data on your device, see “Format Disk” on page 133.

1. In the System Restore area, click **System Restore**.
2. Review the confirmation message, then click **OK**.

   The device will reboot. Don’t unplug the device during this rebooting process. Once the reboot is complete, launch the Dashboard (see “Accessing the Dashboard for the First Time” on page 21).

System Configuration

The system configuration area allows you to save a configuration file or import an existing configuration file. This is useful if you perform a system restore and want to maintain your current configurations.

**Saving a Configuration File**

Use the following steps to save a configuration file.

1. In the System Configuration area, click **Save Config File**.
2. The configuration file saves to your desktop.

**Importing a Configuration File**

Use the following steps to save a configuration file.

1. In the System Configuration area, click **Import File**.
2. Navigate to the location of your saved configuration file and select it Open. The configuration file is loaded. The device will reboot. Don’t unplug the device during this rebooting process. Once the reboot is complete, launch the Dashboard.
Device Maintenance

The Device Maintenance area allows you to shutdown and reboot your WD My Cloud EX4 device. This area also displays the amount of time the device has been up and running.

Shutting down the Device

Use the following steps to safely shut down your WD My Cloud EX4 device.

1. In the Device Maintenance area, click **Shutdown**.
2. Review the confirmation message, then click **OK**. Your WD My Cloud EX4 safely shuts down.

Rebooting the Device

1. In the Device Maintenance area, click **Reboot**.
2. Review the confirmation message, then click **OK**. Your WD My Cloud EX4 safely reboots.

Scan Disk

The Scan Disk area allows you to scan your device’s hard disks for any errors.

Scanning Your Disk

Use the following steps to run a disk scan on your WD My Cloud EX4 device.

1. In the Scan Disk area, select the volume you’d like to scan from the pull-down menu.
2. Click **Scan Disk**.
3. Review the confirmation message, then click **OK**. Your WD My Cloud EX4 is scanned for disk errors.

Format Disk

The Format Disk area allows you to format your device’s hard disks.
WARNING!  The Format Disk option erases all of the user data and shares permanently, retaining default shares. Data recovery programs cannot be used to restore data; all user data and shares are permanently deleted.

Formatting your disk will take several hours to complete.

Formatting Your Disk

Use the following steps to format the disks on your WD My Cloud EX4 device.

1. In the Format Disk area, select the volume you’d like to format from the pull-down menu.
2. Click Format Disk.
3. Review the confirmation message, place a check in the check box, then click OK. Your WD My Cloud EX4 is formatted

Notifications

The WD My Cloud EX4 device provides notifications about various events, such as firmware updates, the success of a firmware installations, system shutdowns, etc. Notifications display in a the Alert area at the top of the screen and are also available by email, depending on how your device is configured (for additional information on Alerts, see “Managing Alerts” on page 31).

The Notification section of the page allows you to set up email addresses for up to five users who will receive notifications, set up SMS alert messages for mobile devices, and set the level of alert for which you will be notified.
Notification Email

The Notification Email area allows you to set up email alerts and SMS notifications for specified users.

![Notification Email](image)

**Enabling Email Alerts**

1. On the Navigation bar, select **Settings**, then click **Notifications** from the left pane.
2. To enable Alert emails, click the toggle button.
3. Click **Configure**.
4. On the Alert Notification screen, select the level of alerts you’d like to receive by email on the slider bar.
   - **Critical Only**: Send only critical alerts to the specified email address.
   - **Critical and Warning**: Sent both critical and warning alerts to the specified email address.
   - **All**: Sent all alerts (Informational, Critical, Warning) to the specified email address.
5. Click **New Email**.
6. Enter the email address where you’d like to receive alert emails, then click **Save**.
7. Repeat steps 5 - 6 to enter up to 5 email addresses.
8. Click **Send Test Email** to validate the email addresses you entered.
9. Click **OK**, then check your email for accounts for a validation email.

**Enabling SMS Notifications**

**Note:** Check with your SMS service provider to obtain their requirements for sending SMS messages. Certain carriers may require you to send SMS/text messages by email.

1. On the Navigation bar, select **Settings**, then click **Notifications** from the left pane.
2. To enable SMS, click the toggle button.
3. Click **Configure**.
4. On the SMS Settings screen, enter the name of your SMS provider.
5. Enter the SMS URL with the message content set to be “Hello world”
   **Note:** This SMS URL is used only for setup. No SMS message will be sent after setup is completed. Obtain the URL format requirements from your SMS service provider. They should contain the following parameters: username, password, destination phone, and message content.
6. Click **Next**.
7. Select the corresponding category for each SMS parameter from the pull-down menu.
8. Click **Finish**. Your SMS notification is now set up.
Notification Display

The Notification Display allows you to select the type of notifications that are sent to you.

1. On the Notification Display screen, select the level of notifications you’d like to view on the Alert icon, using the slider bar.
   - Critical Only: Send only critical alerts.
   - Critical and Warning: Sent both critical and warning alerts.
   - All: Sent all alerts (Informational, Critical, Warning).

   The system automatically updates with your selection.

Firmware Update

The Firmware Update page allows you to set up the device to update the My Cloud EX4 firmware automatically or to manually check for an update file. The current version number and the date of last update of the WD My Cloud EX4 firmware also display on this screen.
Auto Update

Auto Update allows you to schedule your WD My Cloud EX4 device to conveniently check for available software updates and install them automatically. This is the easiest way of ensuring the WD My Cloud EX4 firmware is current.

Note: After a firmware update installs, the WD My Cloud EX4 device reboots. Since a reboot will affect users’ ability to access the cloud, you should schedule the updates to occur at times when the likelihood of users accessing the cloud are minimal.

Note: If you enable auto update, you will be asked to manually reboot your system when the update is completed.

Updating Firmware Automatically

1. To enable Auto Update, click the toggle button.
2. In the Update Schedule field, specify the frequency (e.g., daily) and the time at which the device should look for an update on the WD website from the pull-down menus.
3. Click Save.

Once saved, your device will check for firmware updates at the specified time and day. If an update is available, it will automatically install and prompt you for a reboot.

Available Updates

You can check for available updates at any time in the Available Updates area. This area also displays the current version of the firmware and indicates when the last firmware update was made.

Checking for Updates

1. In the New Firmware field, click Check for Updates.
2. Review the Update Firmware screen, then click OK.
If an update is available, click Install and Reboot.

Manual Update

If you need to perform a manual update, this is where you’ll go to perform that task.

Note: Ensure that you’ve downloaded the firmware file you need to install on your device from the WD Tech Support Downloads page at http://support.wd.com/product/download.asp.

Manually Installing an Update

1. In the Manual Update section, click Update from File
2. Navigate to the firmware update file, then click Open.
3. Review the confirmation message, then click OK.
   The update installs on your device. When the update is complete, your WD My Cloud EX4 device reboots.
Appendix

Appendix C: phpBB Setup Guide
Appendix D: Supported RAID Modes
Appendix E: RAID Migrations
Appendix F: Safe Mode Firmware Update Procedures

Appendix A: WD My Cloud EX4 Quick User Guide

Logging into WD My Cloud EX4

1. Enter the name of your WD My Cloud EX4 device (default name: wdmycloudex4EX4) in the browser's address field:
   - http://<device name> (Windows) (Example: http://wdmycloudex4)
   - https://<device name>.local (Mac) (Example: https://wdmycloudex4.local)

2. Click Go.

3. On the WD My Cloud EX4 Login page, click Other, then enter your User Name.
4. In the Password field, enter your password.
5. Click Login. The WD My Cloud EX4 Dashboard displays.
The Dashboard Home Page

The WD My Cloud EX4 Home page has an information bar at the top right, an icon bar across the page, and an instant overview of the status of the device’s main functions and links for updating settings.

![Dashboard Home Page](image)

- To access the page associated with each download and applications page, click the plus sign +.

**Downloads**

The Downloads page allows you to download files using the following methods:

- HTTP (Hypertext Transfer Protocol)
- FTP (File Transfer Protocol)
- P2P (Peer-to-Peer)

![Downloads Interface]

- To select a download method, click the
- To download files to your location, enter the information required for each download method.
Apps

The Apps page provides access to the various apps available for your use on the WD My Cloud EX4 device. Available apps vary depending on what your administrator has implemented.
Appendix B: Joomla Setup Guide

Joomla is an award-winning content management system (CMS), which allows you to build Web sites and powerful online applications. For additional information on Joomla, Joomla is one of the many apps available for use from your WD My Cloud EX4 device. Provided in this section are the steps you’ll need to setup Joomla.

Requirements

- Database (e.g., MySQL, FireBird, MS SQL server, oracle, PostgreSQL, SQLite)
- If you’re using phpMyAdmin as your SQL database, ensure that you’ve added the phpMyAdmin app to your My WD Cloud EX4.

Setting Up Joomla

1. Add the Joomla app to your WD My Cloud EX4 device (see “Adding an App” on page 84 for information on adding an app to your device).
2. On the App screen, click Joomla in the left pane.
3. In the Configuration URL field, click the configuration URL link. The Joomla Installation page displays.
4. Select a language from the scrolling window. This is the language that will be used during Joomla installation.

5. Click Next.
6. Review the Joomla Pre-installation check to ensure that all items passed, then click Next.

7. Read the Joomla license declaration, then click Next.

8. Complete the Database Configuration screen with the following information, then click Next.
   - **Database Type**: Select MySQL if not already selected.
   - **Host Name**: Enter localhost.
   - **Username**: Enter your MySQL account user name.
     - If you’re using the phpMyAdmin app, enter admin.
   - **Password**: Enter your MySQL password.
     - If you’re using the phpMyAdmin app, enter admin.
   - **Database Name**: Enter a name for your database to be used for Joomla.
   - **Table Prefix**: Enter a table prefix. The prefix should be three - four characters long, contain only alphanumeric characters, and MUST end in an underscore. Make sure that the prefix chosen is not used by other tables.
     - You can also use the randomly generated table prefix pre-loaded into this field.
   - **Old Database Process**: Select one of the following options:
     - **Backup**: Backs up the old database.
9. Keep the FTP Configuration screen default settings as they are and click **Next**.

10. Complete the Database Configuration screen with the following information:

   - **Site Name**: Enter a name for your Joomla site.
   - **Your Email**: Enter the email address of the individual that will act as the administrator for the Joomla site.
   - **Admin Username**: Enter the user name you’ll use to log into your Joomla site.
   - **Admin Password**: Enter the password you’ll use to log into your Joomla site.
   - **Confirm Admin Password**: Reenter the password you entered in the Admin Password field.

11. Click **Install Sample Data**.

12. Click **Next**.
13. Review the information on the screen, then click **Remove installation folder**.

14. At the top of this page, click **Site**. Your Joomla site has been created and installed on your WD My Cloud EX4 device.
Appendix C: phpBB Setup Guide

phpBB™ is a popular Internet forum package written in the PHP scripting language. You can use phpBB to create your own customized forum that can be accessed and commented on from any internet connection.

phpBB is one of the many apps available for use from your WD My Cloud EX4 device. Provided in this section are the steps you’ll need to setup phpBB.

Requirements
- MySQL database

Setting Up phpBB
1. Add the phpBB app to your WD My Cloud EX4 device (see “Adding an App” on page 84 for information on adding an app to your device).
2. On the App screen, click phpBB in the left pane.
3. In the Configuration URL field, click the configuration URL link. The phpBB Installation page displays.
4. Review the phpBB introduction, then click the Install tab.
5. Review the Welcome to Installation information on your screen, then click Proceed to next step.
6. Review the Installation compatibility information, then click **Start Install**.

7. On the Database configuration screen, enter the following information, then click **Proceed to Next Step**.
   - **Database Type**: Select **MySQL** if not already selected.
   - **Database server hostname or DSN**: Enter **localhost**.
   - **Database server post**: Leave this field blank.
   - **Database name**: Enter a name for your database to be used for phpBB.
   - **Database username**: Enter your MySQL account user name.
     - If you’re using the phpMyAdmin app, enter **admin**.
   - **Database password**: Enter your MySQL password.
     - If you’re using the phpMyAdmin app, enter **admin**.
   - **Table Prefix**: Enter a table prefix. The prefix must start with a letter and must only contain letters, numbers and underscores. Make sure that the prefix chosen is not used by other tables.
     - You can also use the randomly generated table prefix pre-loaded into this field.
8. Review the Database connection screen to ensure that it was performed successfully, then click **Proceed to next step**.

![Database connection screen](image)

9. Complete the Administrator Configuration screen with the following information, then click **Proceed to next step**.

   - **Default board language**: Select the language for your bulletin board from the pull-down menu.
   - **Administrator username**: Enter the user name you’ll use to log into your bulletin board.
   - **Administrator password**: Enter the password you’ll use to log into your bulletin board.
   - **Confirm administrator password**: Reenter the password you entered in the Administrator password field.
   - **Contact e-mail address**: Enter the email address of the individual administering the board.
   - **Confirm contact e-mail**: Reenter the email address you entered in the Contact e-mail address field.

![Administrator Configuration screen](image)
10. Review the Administrator details screen to ensure that the administrator configuration was performed successfully, then click **Proceed to next step**.

![Administrator details screen]

11. Review the screen, then click **Proceed to next step**.

12. Review the information on the screen, then click **Proceed to next step**.

*Note:* Keep the default settings on this screen for now. If you find that you need to update this information in the future, it can be updated on the Administration Control Panel after phpBB is installed.
13. Review the information on the screen, then click **Proceed to next step**.

14. Review the information on the screen. phpBB is now installed.
Appendix D: Supported RAID Modes

Provided below is a chart identifying those modes that are supported for RAID storage.

<table>
<thead>
<tr>
<th>Supported RAID Modes</th>
<th>1 Disk</th>
<th>2 Disks</th>
<th>3 Disks</th>
<th>4 Disks</th>

</tr>
<tr>
<td></td>
<td>• RAID 5 (4 disks)</td>
</tr>
</tbody>
</table>

Note: RAID 1 + Spanning migration to RAID 5 is not supported.
Appendix F: Safe Mode Firmware Update Procedures

If you see the following screen, use the steps outlined below to recover your server from safe mode.

![Safe Mode UI](image)

Note: Before performing these steps, downloaded WD My Cloud EX4 firmware from the WD support website (http://support.wd.com) and save it to a location to which you can browse from your computer. Make sure that you unzip the firmware file.

1. Logon to your router’s DHCP LAN/Device Client Table to obtain the IP address for your device.

![Device Client Table](image)

2. Type device IP address in a browser window. The Safe Mode UI appears.
3. Browse to the location where you saved the downloaded firmware.
4. Click **Apply** to load the firmware.
5. On the dialogue box, click **OK**. The device will reboot.
6. Once your reboot is completed, ensure that you clear your browser’s cache.
   - Check your browsers help to determine the best way to clear the cache.
7. Once your device has completed the reboot, we recommend that you do a system restore (See “System Restore” on page 132.)
Regulatory and Warranty Information

Regulatory Compliance

Federal Communications Commission (FCC) Class B Information
Operation of this device is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC Requirements, Part 15
This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer’s instruction manual, may cause interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the retailer or an experienced radio/television technician for help.
Any changes or modifications not expressly approved by WD could void the user’s authority to operate the equipment.

ICES/NMB-003 Compliance
Cet appareil de la classe B est conforme à la norme NMB-003 du Canada.
This device complies with Canadian ICES-003 Class B.

Safety Compliance
Approved for US and Canada. CAN/CSA-C22.2 No. 60950-1, UL 60950-1: Safety of Information Technology Equipment.

This product is intended to be supplied by a listed limited power source, double insulated, or direct plug-in power unit marked “Class 2.”

CE Compliance for Europe
Verified to comply with EN55022 for RF emission; EN-55024 for Generic Immunity, as applicable; and EN-60950 for Safety.

GS Mark (Germany only)
Machine noise - regulation 3. GPSGV: Unless declared otherwise, the highest level of sound pressure from this product is 70db(A) or less, per EN ISO 7779. Maschinenlärminformationen-Verordnung 3. GPSGV: Der höchste Schalldruckpegel beträgt 70 db(A) oder weniger gemäß EN ISO 7779, falls nicht anders gekennzeichnet oder spezifiziert.

Warranty Information (All Regions Except Australia/New Zealand)

Obtaining Service

WD values your business and always attempts to provide you the very best of service. If this Product requires maintenance, either contact the dealer from whom you originally purchased the Product or visit our product support Web site at http://support.wd.com for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided on your return paperwork. Your original box and packaging materials should be kept for storing or shipping your WD product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via http://support.wd.com. WD shall have no liability for lost data regardless of the cause, recovery of lost data, or data contained in any Product placed in its possession.

Limited Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD’s specification therefor. The term of your limited warranty depends on the country in which your Product was purchased. The term of your limited warranty is for 2 years in the North, South and Central America region, 2 years in the Europe, the Middle East and Africa region, and 2 years in the Asia Pacific region, unless otherwise required by law. The term of your limited warranty period shall commence on the purchase date appearing on your purchase receipt. WD may at its discretion make
extended warranties available for purchase. WD shall have no liability for any Product returned if WD determines that the Product was stolen from WD or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, unless the product is on the list of limited user-serviceable products and the specific alteration is within the scope of the applicable instructions, as found at http://support.wd.com), accident or mishandling while in the possession of someone other than WD. During the period of warranty specified above and at WD's option, the repair or replacement of the Product with an equivalent or better Product. The foregoing warranty of WD shall extend to repaired or replaced Products for the balance of the applicable period of the original warranty or ninety (90) days from the date of shipment of a repaired or replaced Product, whichever is longer.

The foregoing limited warranty is WD's sole warranty and is applicable only to products sold as new. The remedies provided herein are in lieu of all other remedies and warranties, whether expressed, implied or statutory, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose, and a) any and all obligations and liabilities of WD for damages including, but not limited to accidental, consequential, or special damages, or any financial loss, lost profits or expenses, or lost data arising out of or in connection with the purchase, use, or performance of the Product, even if WD has been advised of the possibility of such damages. In the United States, some states do not allow exclusion or limitations of incidental or consequential damages, so the limitations above may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Warranty Information (Australia/New Zealand only)

For consumers purchasing products in Australia and New Zealand, please refer to this warranty information.

Nothing in this warranty modifies or excludes your legal rights under the Australian Competition and Consumer Act or the New Zealand Consumer Guarantees Act. This warranty identifies WD's preferred approach to resolving warranty claims which is likely to be quick and simple for all parties.

No other warranties either express or implied by law, including but not limited to those contained in the Sale of Goods Act, are made with respect to the Product. If you purchased your Product in New Zealand for the purposes of a business, you acknowledge and agree that the New Zealand Consumer Guarantees Act does not apply.

In Australia, our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure. What constitutes a major failure is set out in the Australian Consumer Law.

Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD's specifications. The term of your warranty is 2 years in Australia and New Zealand, unless otherwise required by law. The term of your warranty period shall commence on the purchase date appearing on your purchase receipt from an authorized distributor or authorized reseller. Proof of purchase shall be required to be eligible for this warranty and to establish the commencement date of this warranty. Warranty service will not be provided unless the Product is returned to an authorized dealer, authorized reseller or regional WD return center where the Product was first shipped by WD. WD may at its discretion make extended warranties available for purchase. WD shall have no liability for any Product returned if WD determines that the Product was (i) not purchased from an authorized dealer or authorized reseller, (ii) not used in accordance with WD specifications and instructions, (iii) not used for its intended function, or (iv) stolen from WD, or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, including the mounting frame, unless the product is on the list of limited user-serviceable products and the specific alteration is within the scope of the applicable instructions, as found at http://support.wd.com), accident or mishandling while in the possession of someone other than WD.

PRODUCTS ARE COMPLEX AND FRAGILE ITEMS THAT MAY OCCASSIONALLY FAIL DUE TO (A) EXTERNAL CAUSES, INCLUDING WITHOUT LIMITATION, MISHANDLING, EXPOSURE TO HEAT, COLD, AND HUMIDITY, AND POWER FAILURES, OR (B) INTERNAL FAULTS. SUCH FAILURES CAN RESULT IN THE LOSS, CORRUPTION, DELETION OR ALTERATION OF DATA. NOTE THAT YOU SHALL BE RESPONSIBLE FOR THE LOSS, CORRUPTION, DELETION OR ALTERATION OF DATA HOWSOEVER CAUSED, AND FOR BACKING UP AND PROTECTING DATA AGAINST LOSS, CORRUPTION, DELETION OR ALTERATION. YOU AGREE TO CONTINUALLY BACK UP ALL DATA ON THE PRODUCT, AND TO COMPLETE A BACKUP PRIOR TO SEEKING ANY GENERAL SERVICE AND TECHNICAL SUPPORT FROM WD.

In Australia, if the Product is not of a kind ordinarily acquired for personal, domestic or household use or consumption, provided it is fair and reasonable to do so, WD limits its liability to replacement of the Product or supply of equivalent or better Product.
This warranty shall extend to repaired or replaced Products for the balance of the applicable period of the original warranty or ninety (90) days from the date of shipment of a repaired or replaced Product, whichever is longer. This warranty is WD’s sole manufacturer’s warranty and is applicable only to Products sold as new.

Obtaining Service

WD values your business and always attempts to provide you the very best of service. Should you encounter any problem, please give us an opportunity to address it before returning this Product. Most technical support questions can be answered through our knowledge base or e-mail support service at http://support.wd.com. If the answer is not available or, if you prefer, please contact WD at the applicable telephone number shown in the front of this document.

If you wish to make a claim, you should initially contact the dealer from whom you originally purchased the Product. If you are unable to contact the dealer from whom you originally purchased the Product, please visit our product support Web site at http://support.wd.com for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided with your RMA number. If following receipt of a qualifying claim under this warranty, WD or the dealer from whom you originally purchased the Product determines that your claim is valid, WD or such dealer shall, at its discretion, either repair or replace the Product with an equivalent or better Product or refund the cost of the Product to you. You are responsible for any expenses associated with a claim under this warranty. The benefits provided to you under this warranty are in addition to other rights and remedies available to you under the Australian Competition and Consumer Act or the New Zealand Consumer Guarantees Act.

Your original box and packaging materials should be kept for storing or shipping your WD product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via http://support.wd.com.
